## 1.1 About this Report

This Report is the eighth Sustainability Report before 2021, (previously referred to as Corporate Social Responsibility Report) issued by the Company. The previous report was released in August 2022. We plan to issue this Report annually, following the framework and content based on the GRI Standards of the Global Reporting Initiative (GRI). The Report is voluntarily prepared and published to transparently disclose the value and performance created by the Company. Through the issuance of this Report, we aim to provide stakeholders with an understanding of Fine Blanking & Tool's efforts and achievements in promoting sustainable development, additionally, serving as an essential tool for future communication with stakeholders and internal management.

### Principles and Standards for Compilation of this Report

This report follows the GRI Standards: 2021, and refers to the Sustainability Accounting Standards Board (SASB) disclosure indicators for the automotive parts industry (auto parts) and the Financial Stability Board (FSB) Task Force on Climate-related Financial Disclosures (TCFD) as reporting principles:

Category	Sustainability	Financial	Environmental	Occupational Health and Safety
Standards Followed	 <ul style="list-style-type: none"> <li>▼ GRI Standards</li> <li>▼ AA1000ASv3 Accountability Principles</li> <li>▼ SASB Sustainability Accounting Standards</li> </ul>	 <ul style="list-style-type: none"> <li>▼ IFRS recognized and issued by the Financial Supervisory Commission</li> <li>▼ Regulations Governing the Preparation of Financial Reports by Securities Issuers</li> </ul>	 <ul style="list-style-type: none"> <li>▼ ISO 14001 Environmental Management System</li> <li>▼ ISO 14064-1 GHG inventory</li> <li>▼ ISO 14051 Material Flow Cost Accounting</li> <li>▼ ISO 50001 Energy Management System</li> <li>▼ TCFD Task Force on Climate-related Financial Disclosures</li> </ul>	 <ul style="list-style-type: none"> <li>▼ ISO 45001/ CNS 45001 Occupational health and safety management system</li> </ul>

# About this Report

### Report Compilation and Quality Control Process

The Company compiles and edits this Report through the following organization and procedures:

A task force, composed of representatives and key members from various departments, including the President's Office, Department of Business Management, Management Department, Quality Assurance Department, Research and Development Department, and Manufacturing Department, is formed. The task force is overseen by the Administration Office, responsible for overall planning, and requests committee members and key personnel from each department to work on their respective sections. The Administration Office then consolidates and communicates the information, and after the initial draft is completed, it undergoes internal document management review before being sent to the Chairperson of the Sustainability Committee and the President for final approval and publication.

### Reporting Period

The data and content in this report pertain to the year 2022 (from January 1, 2022, to December 31, 2022). The Report is expected to be issued in August 2023 and will be made public on the Company's website.

### Scope of Report

This report follows the principles of consolidated financial statements in setting organizational boundaries, and sources financial data are the consolidated financial statements that have been audited by a certified public accountant and have been released to the public. Environmental and occupational health and safety management systems undergo regular internal audits and annual external audits based on ISO 14001 and ISO 45001, respectively. The energy management system ISO 50001 also receives regular verification and certification. Greenhouse gas inventory and material flow cost accounting data have been verified externally by a third party in accordance with ISO 14064-1, ISO 14051 and the TCFD respectively. For other operating and management performance results related to governance, economy, environment, society, labor and human rights, with the exception of system validation, intellectual property protection, personnel structure, and employee development, include the subsidiaries in China and Vietnam. The remaining operating and management results are based on the Taiwan region and exclude the subsidiaries in China and Vietnam, and the disclosed data are based on the results of the Company's own surveys and investigations. The data subject to statutory testing have been measured or certified by impartial organizations, and are presented in the usual numerical descriptions, and the information contained therein are exact figures. The data citations and reporting boundaries for the 2022 Sustainability Report are the same as in 2021.

### External Assurance of the Report

To enhance the credibility of this Report, we sought external verification through the decision of senior management. The external assurance was carried out by BSI Taiwan Branch of the British Standards Institution, an independent third-party auditing organization, in compliance with the requirements of AA1000AS v3, the GRI Standards, and the SASB Sustainability Accounting Standards. The assurance statement can be found in the External Independent Assurance Statement (Appendix 7).

## 1.2 Sustainability Committee

### Sustainability Committee

For a long time, the Company has been actively promoting corporate governance, sustainable environment development, and social welfare. To enhance the efficiency of sustainable development efforts, the "Corporate Social Responsibility Committee (CSR Committee)" was established in 2015. On November 11, 2015, the Board of Directors authorized the appointment of Mr. Wu Zong-ming, a director and President of the Company, as the chairperson of the implementing organization. The committee was tasked with establishing a sustainable management system in line with the GRI Standards. On December 21, 2021, the Board of Directors approved the revision of the "Corporate Social Responsibility Committee" to the "Sustainability Committee" as shown in the organizational chart below. The Company aims to enhance sustainable development management by appointing (through the Board of Directors) the Management Department (Administration Office) to be responsible for managing the economic, environmental, and social impacts of the organization. This includes promoting sustainable development policies, systems, relevant management guidelines, and specific action plans. The committee reports on the implementation results to the Board of Directors five months after the end of each year.

## 1.2 Sustainability Committee

Sustainability Committee Organizational Chart

### Sustainability Committee Operating Procedures

- An annual meeting is held once a year, and the relevant departments of each task force explain the implementation status of the sustainable development promotion and stakeholder consultation and communication (additional meetings may be held as needed).
- The preparation of the annual sustainability report for the previous year is completed each year.
- Regular reviews of performance in economic, environmental, and social aspects are conducted, and the results of sustainable development are reported to the Board of Directors within five months after the end of each year.
- The fulfillment of sustainable development is disclosed in the annual report.

## 1.2 Sustainability Committee

### Message from the Chairperson of the Sustainability Committee

Fine Blanking & Tool's ongoing commitment is to providing high-quality services in the global automotive supply chain with professional fine blanking technology. In addition to expanding markets and product development to improve operational performance, we actively promote corporate governance, sustainable environment development, and social welfare in our daily operations. To make the implementation of sustainable development work more efficient, the "Corporate Social Responsibility Committee" was established in 2015. Following the Global Reporting Initiative's (GRI) fourth-generation guidelines (G4), our first Corporate Social Responsibility Report was issued in August 2016 and received the Bronze Award in the 9th Taiwan Corporate Sustainability Awards (TCSA). From 2017 to 2021, we continued to issue the annual Corporate Social Responsibility Reports and received the Silver Award in the 10th to 12th TCSA in the Electronics and Information Manufacturing category and also in the 13th to 15th TCSA in the Traditional Manufacturing category. The Board of Directors approved the amendment of the "Corporate Social Responsibility Committee" to "Sustainability Committee" on 2021/12/21 for the purpose of sound management of the Company's sustainable development.

In 2021, to strengthen the relationship between social responsibility and business philosophy in our daily operations, we identified stakeholders through internal discussions within the Sustainability Committee. We surveyed stakeholders' concerns about issues through a questionnaire on the Company's website. The Sustainability Committee then conducted a survey on the degree of impact based on the electronic questionnaire and conducted

internal discussions to identify the major issues of concern to the stakeholders to stakeholders and disclosed the implementation results for the past year in this Report.

**Regarding corporate governance**, we continued to promote sustainable development and internal communication in 2022 to advance corporate governance. Our corporate governance evaluation has consistently ranked within the top 6% to 20% in the (listed) category from the first to the ninth evaluation (April 2023 evaluation for the fiscal year 2022).

**Economically**, we share business achievements with shareholders and employees. In 2022, the Company's earnings per share were NT\$2.82, and the return on equity was 11.44%. Cash dividends of NT\$2 per share were distributed, accounting for 70.92% of the year's earnings. In terms of profit-sharing with employees, total employee benefits was NT\$438,201,000, an increase of 7.55% compared to 2021.

**Regarding the environmental aspect**, we adhere to environmental safety policies and relevant management systems, including supervising implementation, complying with regulations, preventing pollution, managing risks, performance management, continuous improvement, energy conservation, and controlling harmful substances in products. Pollution prevention and control in various environmental aspects all meet legal requirements. Through various environmental safety and health programs, we have achieved continuous progress. In 2022, Scope 1 and Scope 2 greenhouse gas emission intensity decreased by 4.53% compared

## 1.2 Sustainability Committee

to 2021, and Scope 3 emission intensity decreased by 10.55%. Energy consumption decreased by 2.73%, and energy intensity decreased by 5.38% in 2022 compared to 2021. We recycled 3,032 tons of resources, and water and waste intensity decreased by 0.69% and 0.84%, respectively, in 2022 compared to 2021.

**Regarding the social aspect**, we actively participate in various community public welfare activities and provide good employment opportunities. Since 2015, we have promoted sustainability advocacy activities among suppliers in addition to the existing supplier management. In 2022, 42 new suppliers signed the Supplier Corporate Social Responsibility Statement, with a recovery rate of 92.9% (39 suppliers). For employees, in addition to providing various employee benefits, we encourage workforce diversity, provide friendly workplace childcare, offer regular performance assessments and career training plans for employees, and promote open communication and employee participation in activities to promote labor-management harmony. We also continue to promote employee health management, health promotion, and safety

management to create a healthy, happy, and safe workplace. In 2022, we continued to promote the health information system to create another smart interactive platform for employees, providing e-health information and e-health self-management login.

### **Looking forward to a Sustainable Future:**

The Company will integrate business philosophy and core values into corporate sustainability, covering the economic, social, and environmental dimensions. We will continue to operate under the guidance of corporate governance and the Sustainability Committee, following the GRI Standards, supplemented by various management systems such as environmental, occupational health and safety, quality, personal information, energy, and greenhouse gas inventory. We will also implement the Toyota Production System (TPS) and Total Productive Maintenance (TPM) improvement activities to effectively mitigate or eliminate risks. With practical actions, we will continue to support global sustainability initiatives and aim for shareholder satisfaction, happy customers, efficient processes, employee recognition of core values, and contributions to society.

Chairperson of the Sustainability Committee

**Chairperson and President:** Wu, Chung-Ming

## 1.3

## Corporate Sustainability Vision and Development Policies

Fine Blanking & Tool is a part of the global automotive supply chain, and our highest goal is to “Provide the Best Service and Flourish Worldwide.” We are committed to conducting all our business activities with integrity and a sustainable management approach. We establish positive interactions with stakeholders, including employees, shareholders, customers/clients, suppliers/contractors, government agencies, and the group, to jointly create and share sustainable value for the future.

## Company Mission Statement

## Company Core Values

## Implementation Guidelines for Sustainable Development

In terms of corporate governance, in addition to focusing on sustainable development, profitability, and growth, we are committed to optimizing product processes and developing new products/technologies to enhance customer satisfaction. We also work together with the supply chain to maintain compliance with regulations and environmental protection. In terms of environmental sustainability, we continue to promote energy conservation, waste reduction, and greenhouse gas reduction, fulfilling our global citizenship responsibility in environmental protection. For social care, we strengthen labor-management relations and employee engagement, provide employee training and development opportunities, enhance employee health management, create a safe and healthy environment, and actively participate in social welfare activities.

Fine Blanking &amp; Tool Co., Ltd.

Chairman: Wu, Chung-Yi

## 1.4 About Fine Blanking & Tool Co., Ltd. (FBT)

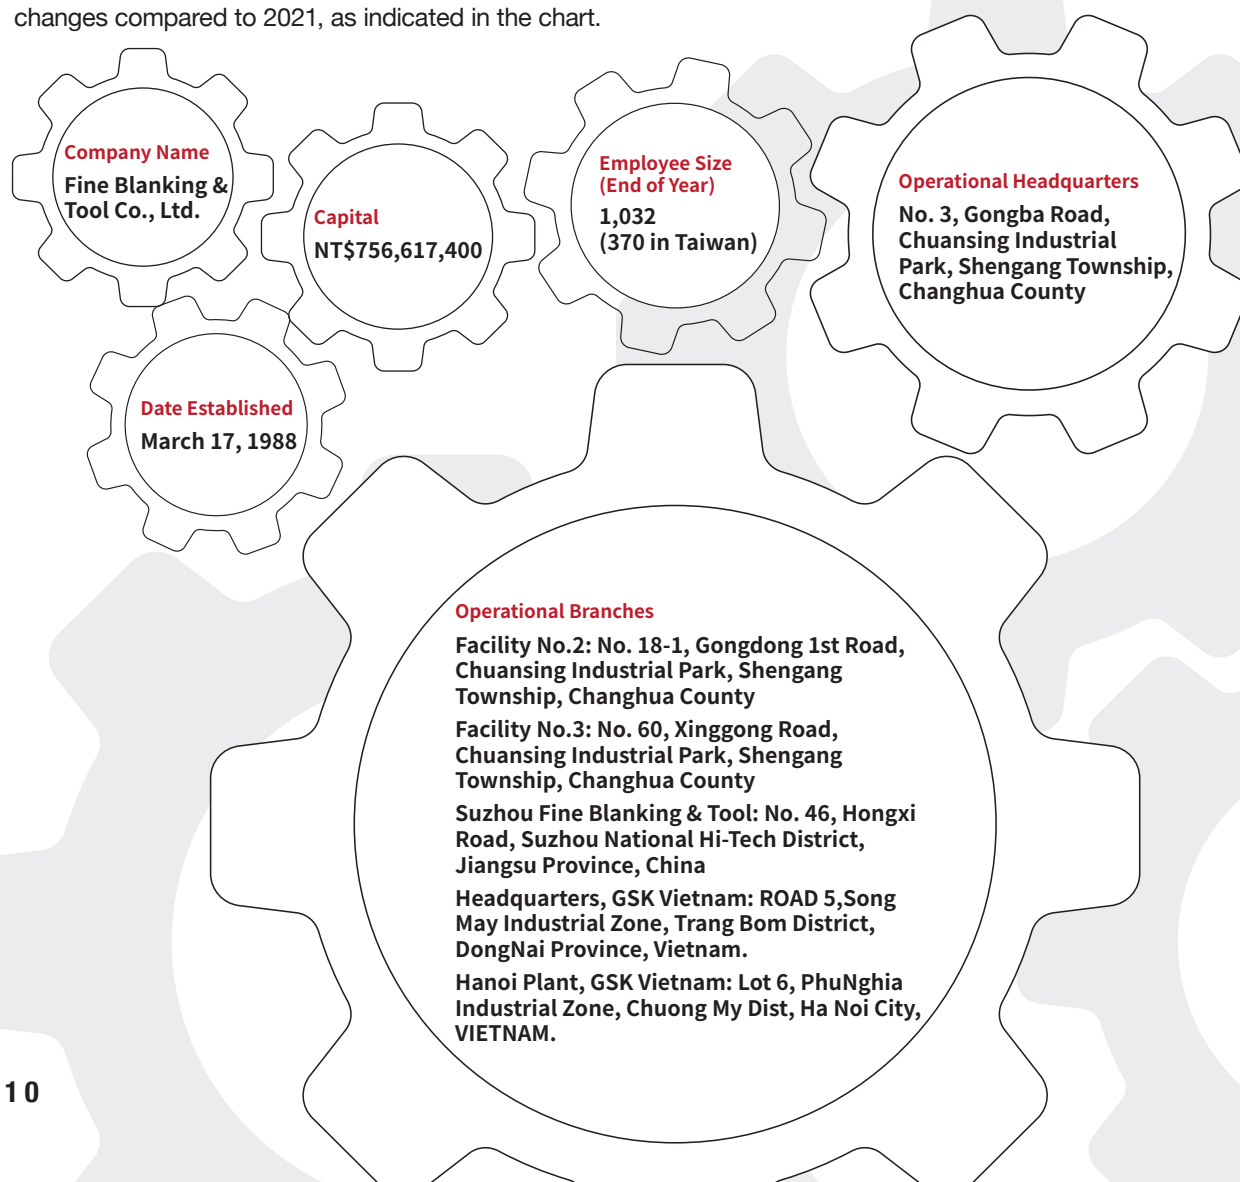

### 1.4.1 Company Introduction

#### ● Rooted in Taiwan, Globally Positioned

The Company's operational headquarters are located in Taiwan, equipped with advanced technology and research and development capabilities. We have also established operations and sales points in Vietnam, serving as a hub for Southeast Asia, where we actively nurture manufacturing and research and development talents to enhance our advanced blanking technology. With the experience gained from 35 years of production and marketing, we demonstrate our drive and actively expand into overseas markets, positioning ourselves globally.

Currently, we have established production bases in Vietnam and China. Through resource integration and sharing from the operational headquarters, we strive to enhance efficiency and expand our overseas business, ensuring steady growth for the Group.

The distribution of 2022 sales revenue by region and overseas operating branches showed no significant changes compared to 2021, as indicated in the chart.

## 1.4.2 Main Business Activities and Products

The main businesses operated by the Company and its affiliated enterprises include the manufacturing, processing, trading, import and export of automotive, motorcycle, special automotive products, fine blanking parts, and car seats. Regarding the manufacturing and trading of equipment, tooling, and molds for the above products, as well as import and export business, there were no significant changes in the Company's business in 2022 compared to 2021.

### Percentage of total annual revenue accumulated by the main products in 2022

### Quantity of Main Products for Domestic and Export in 2022

Note: Others include adjusters, gear components, raw materials, steel plates, materials, and prototypes.

Description: "Others" includes Car Seat Recliner Mechanism, Gear Parts, Raw Materials, Steel Plates, Materials, Prototypes.

Product Category	Total Production (k PCS、k Sets、k KG)	Total Production Weight(ton)
Precision Blanking Components	17,936	2,363.70
Disk Brakes	3,621	1,766.82
Others	2,059	186.23
<b>Total</b>	<b>23,616</b>	<b>4,316.75</b>

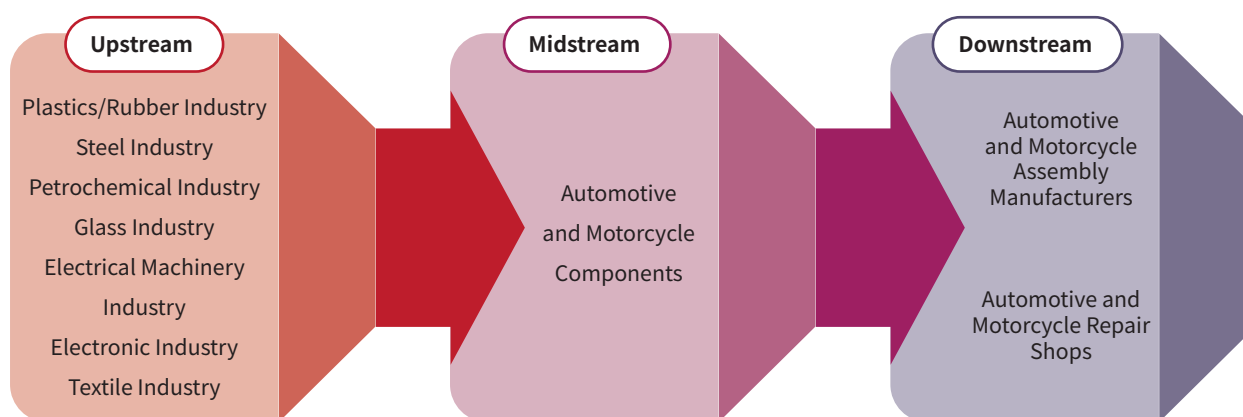

Our main products are automotive and motorcycle OEM stamping components. To better serve our customers, we continuously improve and enhance our precision blanking technology to meet customer requirements in both cost and quality. We also collaborate with major global automotive manufacturers' supply chains to pursue manufacturing excellence and highly competitive pricing, ensuring that each product can have optimal competitiveness in the market.

## About Fine Blanking &amp; Tool Co., Ltd. (FBT)

▪ Automotive and Motorcycle Components Industry Upstream, Midstream, and Downstream Relations Diagram

Our main product categories are automotive, motorcycle, bicycle, and other parts:

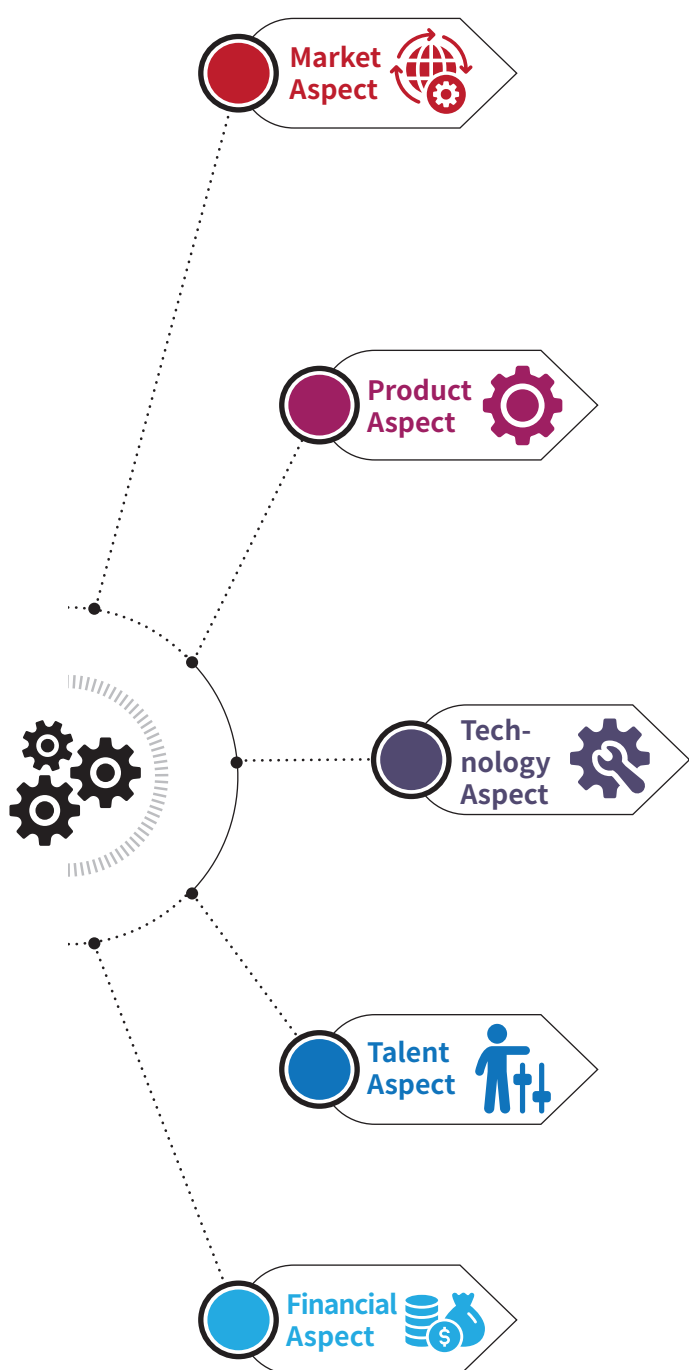

## 1.4

## About Fine Blanking &amp; Tool Co., Ltd. (FBT)

We dedicate efforts to five main aspects, including market, product, technology, talent, and finance, to ensure the Company's sustainable development through different strategies.

- ▶ Expand the automotive parts market in Europe, and North America, China, and Southeast Asia, actively seek new customer models, and increase revenue.
- ▶ For motorcycle, special vehicle (such as beach cars and golf carts), and bicycle components, expand local stamping components and seat markets in China and Vietnam, and develop the Southeast Asian market through the Vietnam subsidiary. Continuously expand markets in Europe and North America through the Taiwan operational site, aiming for niche and leisure-oriented industry development, developing high-value-added products and components.
- ▶ Automotive components mainly include safety belt parts, pipes, precision blanking compound parts, and car seats.
- ▶ Motorcycle components mainly include brake discs, gears, brake levers, and motorcycle seats.
- ▶ Special vehicle components (such as beach cars and golf carts) mainly include steering mechanism assemblies, pedal assemblies, and secondary clutch assemblies.
- ▶ Bicycle components include brake discs.
- ▶ Established a joint laboratory with China Steel Corporation and integrated relevant resources from the Group to develop new materials, optimize material usage, and improve processes.
- ▶ Automate production process equipment, increase production speed, and conduct in-depth innovation in precision blanking mold technology and material technology to achieve specialized product precision.
- ▶ Develop mold and tooling product packages products to provides customers with wider portfolio choices at lower costs and gradually develop product and process patent applications to increase the Company's competitive advantage.
- ▶ **Technical Talent Cultivation:** Cultivate talents in development and technical capabilities through SE standards, ME process technology, and development quality assurance systems.
- ▶ **Management Talent Development:** Enhance management capabilities and shorten learning and growth time through project management methods.
- ▶ Maintain a sound financial position and strengthen the Company's research and development capabilities in new products and technologies.
- ▶ Pursue a balance between shareholder equity and sustainable growth for the Company.

## 1.5

## Sustainable Development Performance

Relevant Issues on Sustainable Implementation Policies	Key Factors	Performance Outcome Indicators	2020 Results	2021 Results	2022 Results
Sustainable Development	Continue to pursue profit and growth	 Shareholder rate of return on equity of at least 10% or higher	■ Shareholder rate of return on equity 5.85% (Note 1)	■ Shareholder rate of return on equity 10.06%	■ Shareholder rate of return on equity 11.44%
		 Operating profit margin of at least 12% or higher	■ Operating profit margin 8.13% (Note 1)	■ Operating profit margin 12.07%	■ Operating profit margin 11.99% (Note 1)
Future Continuous Action Plan					
<p>→ Continued investment in mold and product development to achieve future growth momentum.</p> <p>→ Emphasize strengthening intellectual property through patent applications, encourage "innovation," and hold "patents." In 2022, 1 patent application and 12 utility model patents were approved in Taiwan and China, continuously creating competitive advantages.</p> <p>→ Continued promotion of activities such as TPS, TPM, to optimize production lines and improve efficiency to maintain profitability.</p> <p>→ Continuously enhance actions for customer service and product service to increase customer satisfaction and order procurement rate.</p>					
Customer Service	Continuously improve customer service actions	 Customer satisfaction rate average of 75% or higher	■ Customer satisfaction rate average of 81.35% or higher	■ Customer satisfaction rate average of 82.86% or higher	■ Customer satisfaction rate average of 79.69% or higher
Future Continuous Action Plan					
<p>→ New product development and market actions:</p> <p>→ Keep abreast and cooperate with existing customers' development directions and regulatory requirements and pay attention to the schedule and subsequent market demand for new customer developments to increase sales opportunities for new product lines.</p> <p>→ Establish AI systems and customer technical exchange to save mold costs and shorten development schedules.</p> <p>→ Adjust production line demands to meet customer scheduling changes, provide CP products to save costs and assembly time.</p> <p>→ Feedback on product development progress, rapid order response, customer complaint feedback, and customer visit plans to provide the best service to customers and cement customer satisfaction and loyalty.</p> <p>→ Based on the results of satisfaction surveys, formulate improvement plans to increase customer satisfaction.</p>					
Supply chain management	Enhance localized manufacturing and reduce supply risk	 Local supplier procurement amount of 85% or higher	■ Domestic supplier procurement of 87.0%	■ Domestic supplier procurement of 87.0%	■ Domestic supplier procurement of 87.0%
		 Supplier on-site evaluation average score of 80 points or above	■ Supplier on-site evaluation average score of 85.2 points	■ Supplier on-site evaluation average score of 87.7 points	■ Supplier on-site evaluation average score of 90.2 points
Future Continuous Action Plan					
<p>→ Continuously diversify single supply risks and increase local procurement rates.</p> <p>→ Implement supplier guidance and evaluation plans to improve supplier delivery time and quality to reduce delivery risks to manufacturing schedules.</p>					

## 1.5 Sustainable Development Performance

Relevant Issues on Sustainable Implementation Policies	Key Factors	Performance Outcome Indicators	2020 Results	2021 Results	2022 Results
Compliance with laws and regulations	Continuously improve employees' awareness and compliance with regulations, and work with customers and suppliers to maintain proper compliance with regulations.	 Achieve 100% of employee training and education on regulations	■ 100% achievement rate for annual training on safety and health, personal information, and energy	■ 100% achievement rate for annual training on safety and health, personal information, and energy	■ 100% achievement rate for annual training on safety and health, personal information, and energy
		 Prevent occurrence of non-compliance	■ None	■ None	■ None
Future Continuous Action Plan					
→ Monthly regulatory audits by regulatory personnel to verify compliance with regulations related to environmental safety, finance, industry, personal data, and labor, to confirm compliance with laws and regulations, make immediate improvements to operations, and establish a risk warning mechanism.					
→ Continued implementation of regulatory education and training					
Energy saving and waste reduction	Reduce energy intensity, increase process water recycling rate, reduce waste volume	 Reduce energy intensity by more than 1% per year	■ Energy intensity of 42.23 increased by 10.58% (Note 3)	■ Energy intensity of 39.23 decreased by 7.1%	■ Energy intensity of 37.12 decreased by 5.38%
		 Increase the recycling rate of process water by at least 0.5% per year	■ Process water recycling increased by 12.7% per year	■ Process water recycling increased by 9.81% per year	■ Process water recycling increased by 11.92% per year
		 Reduce the amount of industrial waste by more than 3% per year	■ Amount of industrial waste reduced by more than 46.54% per year (Note 2)	■ Amount of industrial waste increased by more than 17.63% per year (Note 2)	■ Amount of industrial waste increased by more than 2.13% per year (Note 2)
Future Continuous Action Plan					
→ Continue to promote ISO 14001 environmental management system and ISO 50001 energy management system.					
→ Strictly comply with regulatory requirements and prioritize the purchase of energy-efficient products.					
→ Continue to promote process optimization to provide recycled water volume.					
→ Continue to promote waste reduction at the source and waste reuse.					
→ Raise awareness of energy conservation and waste reduction among all employees					
Reduce greenhouse gas emissions (Scope 1 + Scope 2)	Reduction of greenhouse gas emission intensity	 Reduction of greenhouse gas emission intensity of at least 1%	■ Greenhouse gas emission intensity of 4.97 increased by 5.29% per year (Note 3)	■ Greenhouse gas emission intensity of 4.64 increased by 6.64% per year	■ Greenhouse gas emission intensity of 4.43 increased by 4.53% per year
Future Continuous Action Plan					
→ Continuously promote energy-saving and carbon-reduction measures through ISO 50001 energy improvement projects.					

Relevant Issues on Sustainable Implementation Policies	Key Factors	Performance Outcome Indicators	2020 Results	2021 Results	2022 Results
Strengthen labor relations and employee identification	Maintain smooth communication channels and strengthen employee identification	 Achievement rate of internal customer satisfaction over 95% [(1-Net Departure)*Adoption of service employee achievement rate] Departure)*Adoption of service employee achievement rate]	■ Achievement rate of internal customer satisfaction 97.94% per year	■ Achievement rate of internal customer satisfaction 97.81% per year	■ Achievement rate of internal customer satisfaction 97.87% per year
		 Zero labor disputes	■ Loss due to labor disputes 0	■ Loss due to labor disputes 0	■ Loss due to labor disputes 0
Future Continuous Action Plan					
→ Continuously strengthen employee identification with the core value of “Inclusive Growth”					
→ Maintain smooth communication channels with employees					
Create a safe and healthy environment	Provide employees with a safe and healthy environment through management systems	 0 cases of serious occupational safety incidents	■ No serious occupational safety incidents	■ No serious occupational safety incidents	■ No serious occupational safety incidents
		 Disabling frequency rate less than 5 and severity rate less than 10	■ Disabling frequency rate 0 and severity rate 0	■ Disabling frequency rate 0 and severity rate 0	■ Disabling frequency rate 0 and severity rate 0
Future Continuous Action Plan					
→ Continue to promote ISO 14001 and ISO 45001 environmental and occupational health and safety management systems and continuously improve the establishment of a safe and healthy environment through environmental health and safety management programs.					
Enhance employee health management and promotion	Continuous promotion of health management and promotion activities	 Achievement rate of health management tracking for health promotion activities over 97% per year	■ Achievement rate of health management tracking for health promotion activities over 98% per year	■ Achievement rate of health management tracking for health promotion activities over 98.4% per year	■ Achievement rate of health management tracking for health promotion activities over 98.1% per year
Future Continuous Action Plan					
→ Continue to promote employee self-health management activities on a monthly basis					
→ Continue to launch employee health promotion activities on a quarterly basis					
Active participation in social care	Active participation in community activities	 Number of participated community activities	■ Participated in community activities 20 times	■ Participated in community activities 16 times	■ Participated in community activities 16 times
Future Continuous Action Plan					
→ Continue to participate in various social/community activities					

Note: 1.The achievement of the operating profit margin and the shareholder rate of return on equity in 2022:

Since 2020, the global economy has been impacted by the COVID-19 pandemic, leading to a decline in overall revenue in 2020, and the operating profit margin and shareholder rate of return on equity were not achieved.

In 2022, the COVID-19 pandemic continued to affect Europe, America, and Southeast Asia, resulting in the continued recovery of orders compared to 2021. However, global economic inflation factors increased costs, leading to the failure to achieve the operating profit margin.

2.The decrease in business waste from 2019 to 2020 was due to the introduction of the electroplating sludge dryer in March 2019 and a decrease in orders. The increase in business waste in 2021 was due to the increase in new electroplating (galvanized wire) production, which changed from outsourcing to in-house, leading to increased electroplating sludge. The increase in 2022 was due to an increase in non-hazardous dust and paint slag.

3.The increase in energy intensity and greenhouse gas emission intensity in 2020 compared to 2019 was due to the impact of the COVID-19 pandemic, leading to an overall decline in revenue.

## 1.5 Sustainable Development Performance

### Sustainable Development Implementation Policies and United Nations Sustainable Development Goals (SDGs)

Mission Statement	Core Values	Guidelines for Sustainable Implementation	SDGs
	<ul style="list-style-type: none"> <li>Customer Satisfaction</li> </ul>	We commit to maintaining good regulatory compliance and enhancing customer satisfaction when serving customers and managing the supply chain.	   
<b>Talent Development</b> 	<ul style="list-style-type: none"> <li>Service Integrity</li> </ul>	We pursue profitability and growth while emphasizing corporate governance and ethical operation. We identify and manage various risks and opportunities to facilitate sustainable development.	  
<b>Teamwork Spirit</b> 	<ul style="list-style-type: none"> <li>Proactive Accountability</li> </ul>	We continuously promote energy saving, waste reduction, and greenhouse gas reduction. We advocate for environmental protection management as responsible global citizens and actively engage in social care activities.	  
<b>Customer Satisfaction</b> 			
<b>Social Contribution</b> 	<ul style="list-style-type: none"> <li>Professional Innovation</li> </ul>	We are dedicated to optimizing product processes and developing new products/technologies to provide better services to customers. During initial development assessments, we consider environmental and occupational safety evaluations to minimize harm to the environment and workers.	   
	<ul style="list-style-type: none"> <li>Inclusive Growth</li> </ul>	We strengthen labor-management relations and employee identification, plan employee training and competency development, enhance employee health management and promotion, and create a safe and healthy environment.	   

## Implementation of SDGs

Goal	SDG Detailed Goals	FBT Performance Summary
	3.4 Promote Mental Health	<ol style="list-style-type: none"> <li>In 2022, a total of 365 consultations were provided by doctors, physical therapists, and counselors for health-related services.</li> <li>There were zero cases of occupational diseases in 2022.</li> </ol>
	3.8 Ensure Good Health and Well-being	<ol style="list-style-type: none"> <li>In 2022, a total of 3,040 participants measured their weight, blood pressure, and waist circumference in monthly self-health management activities.</li> <li>In 2022, a total of 890 participants with a participation rate of 92.3% attended various health promotion events organized by the company quarterly, such as the "FBT Fun Darts Competition."</li> <li>Through the health information system, we set up autonomous management authorization for health self-management, health checkups and consultations, and provide monthly health promotion messages to strengthen employees' health awareness.</li> </ol>
	3.9 Reduce Hazardous Emissions to Reduce Possible Diseases and Deaths	<ol style="list-style-type: none"> <li>In 2022, direct greenhouse gas emissions + indirect greenhouse gas emissions from energy category 2 decreased by 1.95% compared to 2021.</li> <li>The Company had no ozone depleting substances (ODS) and sulfur oxide emissions. Regular outsourced testing and reporting of nitrogen oxides, volatile organic compounds, particulate matter, and air pollutants (hexavalent chromium) comply with emission standards.</li> <li>There were zero cases of occupational injuries in 2022, with a Frequency-Severity Indicator (FSI) of 0.</li> </ol>
	4.3 Promote Gender Equality in Capacity Building	In 2022, a total of 18,060.5 hours of training were provided in Taiwan and overseas subsidiaries. The average training hours per person at Taiwan operational sites: 31.48 hours for males and 37.44 hours for females.
	5.1 Eliminate Discrimination Against Women	The Company's salary standards are the same for men and women, and the ratio of standard wages to basic wages for entry-level employees is 1:1.
	5.2 Eliminate Exploitation of Women	In 2022, the confirmation rate of environmental and social standards screening for 42 new suppliers was 100%. The key points of the signed declaration include requirements for freedom of employment and labor rights, and the prohibition of violence and exploitation.

## 1.5 Sustainable Development Performance

Goal	SDG Detailed Goals	FBT Performance Summary
	6.3 & 6.4 Water	Total water intake is 180.258 million liters, wastewater discharge is 178.361 million liters, and water consumption in 2022 was 1.897 million liters with a recovery rate of 11.92%.
	7.3 Improve Energy Efficiency	In 2022, a total of 8 energy-saving projects were completed, saving 1,138,975 megajoules of energy and reducing 161 tons of CO2e emissions. The energy cost savings amounted to NT\$1.11 million, and the average annual electricity savings rate from 2015 to 2022 was 2.165%.
	8.1 Sustainable Economic Growth	<ol style="list-style-type: none"> <li>1. In 2022, the combined after-tax net profit grew by 21.16%, with a 17.76% increase in net profit attributable to the company's owners.</li> <li>2. The average employee benefit expenses at Taiwan operational sites increased by 6.1% in 2022 compared to 2021.</li> </ol>
	8.5 Provide Decent Work Opportunities	100% of senior management positions at Taiwan and China operational sites were filled by local residents. In Vietnam, 79.3% of the managerial positions were filled by local residents.
	8.8 Promote a Safe Working Environment	<ol style="list-style-type: none"> <li>1. In Taiwan operations, 62 sessions of occupational safety training were conducted, with 594 participants.</li> <li>2. No major occupational accidents occurred at Taiwan operational sites.</li> </ol>
	9.4 Innovation and Research & Development	In 2022, Taiwan and China operational sites obtained 1 patent and 12 certificates, accumulating a total of 62 patents since 2012.

Goal	SDG Detailed Goals	FBT Performance Summary
	12.4 Reduction of Waste Management	<ol style="list-style-type: none"> <li>1. In 2020, the company obtained BSI certification ISO 14051:2011 Environmental Management - Material Flow Cost Accounting, which continued to operate the material utilization design project.</li> <li>2. The waste recycling rate at Taiwan operational sites reached 96.48% in 2022.</li> </ol>
	12.6 Sustainability Report	<ol style="list-style-type: none"> <li>1. Since 2015, the Company has been publishing CSR or sustainability reports and has established a dedicated Corporate Social Responsibility page on the official website to disclose non-financial information.</li> <li>2. Since 2015, direct and indirect greenhouse gas emissions have been inventoried, and from 2020 onwards, estimates of other indirect emissions have been added, all verified by third-party verification agencies.</li> </ol>
	16.1 Reduce All Forms of Violence and Death Rates	<ol style="list-style-type: none"> <li>1. No occupational accidents occurred in 2022 (excluding commuting accidents) and no occupational injuries or illnesses.</li> <li>2. The target for safety observation and near-miss accident investigations in 2022 was 54 cases, and the actual number was 78 cases.</li> </ol>
	16.3 Promote Compliance with National and International Laws and Regulations	<ol style="list-style-type: none"> <li>1. In 2022, there were no fines for non-compliance with laws and regulations concerning the provision and use of products and services.</li> <li>2. In 2022, there were no violations of regulations regarding the health and safety impacts of products and services during their life cycle, as required by sales markets and customer requirements.</li> <li>3. In 2022, there were no environmental leaks or other violations of environmental laws and regulations, and no fines or sanctions were imposed beyond the fines received.</li> </ol>

## 1.6 Stakeholders and Material Issues

The Company is committed to managing with care and listening to the voices of stakeholders. We establish transparent and effective communication channels to accept diverse opinions from all parties. Through identifying and communicating with stakeholders, we gain valuable insights, understand their needs and expectations, and use this information as references for company decisions. We also aim to create and share maximum benefits with stakeholders across various dimensions of our business activities. The identification of stakeholders and relevant issues is conducted as follows:

### Step 1 Stakeholder Identification

To pursue sustainable business operations, we continuously listen to the voices of stakeholders. Individuals or groups that may have a significant impact on our operations are considered stakeholders. Members of our company's Stakeholder Task Force (comprised of representatives from various departments and key individuals) will identify primary stakeholders among six major groups: employees, customers/clients, suppliers/contractors, shareholders, the community, and governmental agencies by conducting survey based on the five principles of the AA1000SES Stakeholder Engagement Standard - dependency, responsibility, influence, diversity of perspectives, and tension.

### Step 2 Collecting Sustainability Issues

To enable information disclosure to be more focused, we identified 29 sustainability issues (11 economic, 9 environmental, and 9 social issues) based on benchmarking with domestic and overseas industry-leading companies' issues of concern and the Sustainability Accounting Standards Board's (SASB) automotive components industry standards. We integrated insights with reference to the industry, the 15 members of the stakeholder group and the external consultants' communication and interaction, to conduct a detailed and standardized internal assessment for reporting purposes, considering factors such as the economic, environmental, and social impacts, the likelihood of occurrence, and risks related to human rights violations.

### Step 4 Analyzing Operational Impact

We measured the operational impact of each sustainability issue based on seven factors, including access to funds/capital, revenue growth, cost reduction, brand trust enhancement, reputation risk reduction, increased employee morale, and social impact, in consideration of the economic, environmental and social impacts. The Stakeholder Task Force (19 members) filled out questionnaires to evaluate the impact of each issue on our operations. We received a total of 19 completed impact questionnaires.

### Step 3 Investigating the Topics of Concern

To understand stakeholders' level of concern about sustainability issues, we conducted a survey through an online questionnaire to investigate the major impacts of the topics of concern on the Company's sustainable operations. In 2022, we collected 162 valid responses.

### Step 5 Identification of Material Topics

Through questionnaire analysis, we conducted matrix analysis of stakeholders' concern scores of each topic and the impact scores of the Stakeholder Task Force on sustainability. After discussions between the Stakeholder Task Force and external consultants, we identified seven material issues for submission to the Chairperson of the Sustainability Committee for approval in 2022. Effective management policies were formulated for each major issue.

### Step 6 Regular Review

For the identified material topics and related reporting sections, we established management policies and goals and disclosed relevant information in our Sustainability Report. We carry out reviews annually to determine if adjustments to the material topics are necessary.

### 1.6.1 Stakeholder Communication Channels and Frequency

Apart from interacting with stakeholders through various departmental businesses, FBT values stakeholders' opinions and respond appropriately through various communication channels based on their concerns and interests. We have established a Corporate Social Responsibility section on the official website, including an external communication mailbox (adm20@fineblanking.com.tw) as the main communication channel between the company and stakeholders.

Stakeholder **Employees**

Importance to the Company	Communication Channels	Communication Frequency
Employees are the most important partners for the sustainable development of the Company. They are the crucial key to building core competitiveness and the foundation for achieving sustainable operations. We are committed to creating a diverse, equitable, and healthy work environment, aiming for mutual growth with employees and the coexistence of their development with the company's sustainability. Sustainability Issues	Resolution Results	Response Chapter
1.Environmental Protection Management System	<p>1.The Company works with government agencies regularly and as needed in implementing and coordinating programs. The company also learns details of policies and regulations and assists in promoting them.</p> <p>2.Exceed compliance with regulations and fully support government policies.</p>	4.4 Environmental Management Policy
2.Workplace Safety and Health Management		5.4 Occupational Health and Safety
3.Employee Benefits and Compensation		5.3 Remuneration and Benefits
4.Climate Change and Energy-Saving and Carbon Reduction		4.1 Climate Change 4.2 Greenhouse Gas Management 4.3 Energy Management 4.4 Environmental Management Policy
5.Greenhouse Gas Emissions Management		4.2 Greenhouse Gas Management
6.Information Security Management		2.4 Risk Management

## 1.6.2 Analysis and Management of Material Issues

**I** We collected 29 sustainability issues through the Stakeholder Task Force and external consultants. The sustainability issues are as follows:

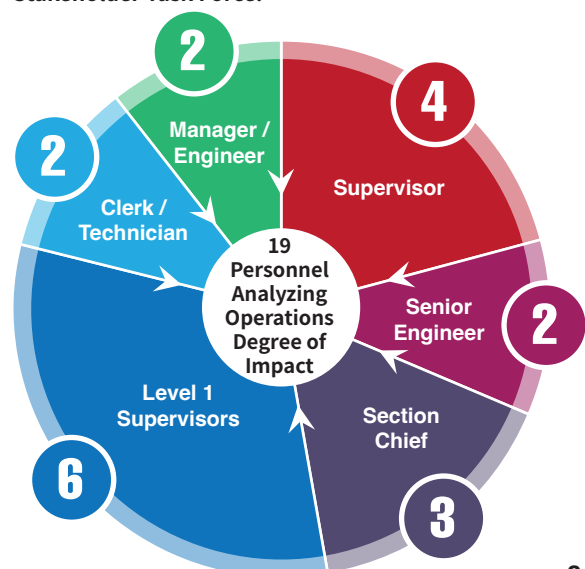

Code	Economic Considerations	Code	Environmental Considerations	Code	Social Considerations
1	Corporate Governance	1	Environmental Protection Management System	1	Workplace Safety and Health Management
2	Operational and Financial Performance	2	Climate Change and Energy-Saving and Carbon Reduction	2	Labor Relations
3	Intellectual Property Right Protection	3	Green Product	3	Talent Cultivation and Development
4	Risk Management	4	Greenhouse Gas Emissions Management	4	Human Rights Concerns and Protection
5	Code of Ethics and Ethical Behavior	5	Circular Economy	5	Employee Benefits and Compensation
6	Ethical Management and Regulatory Compliance	6	Water Management	6	Community Engagement and Social Contribution
7	Technology and Innovation R&D	7	Waste Management	7	Product Labeling and Product Health and Safety
8	Customer Relations Management	8	Chemical (Hazardous Substances) Management	8	Talent Recruitment and Retention
9	Information Security Management	9	Peripheral Noise Management	9	Customer Personal Data Protection
10	Procurement Policies and Supplier Management				
11	Operational Continuity Management				

**I** We received a 162 completed stakeholder concern questionnaires.

- The number of questionnaires received from the var

**I** We measured the operational impact of each sustainability issue based on seven factors, including access to funds/capital, revenue growth, cost reduction, brand trust enhancement, reputation risk reduction, increased employee morale, and social impact, in consideration of the economic, environmental and social impacts. The n conducted questionnaire surveys at various levels of the Stakeholder Task Force:

## 1.6 Stakeholders and Material Issues

### ● Identification of Material Issues

Through the questionnaire analysis, the concern scores of each topic and the impact of management on sustainable management were analyzed in a materiality matrix, and the results of the analysis showed that a total of seven issues of concern fell within the scope of material issues, which were selected by the Stakeholder Task Force after discussion. In addition, the economic aspect of “ethical corporate management and compliance with laws and regulations” was the second most important issue of concern, but because it was difficult to collect data, it was changed to “greenhouse gas emissions and management” after the Stakeholder Task Force’s deliberation. The distribution of the analysis of the materiality of the issues of concern is shown in the figure below:

Code	Economic Considerations	Note	Code	Environmental Considerations	Note	Code	Social Considerations	Note
1	Corporate Governance		12	Environmental Protection Management System	▲	21	Workplace Safety and Health Management	★
2	Operational and Financial Performance	★	13	Climate Change and Energy-Saving and Carbon Reduction	★	22	Labor Relations	
3	Intellectual Property Right Protection		14	Green Product		23	Talent Cultivation and Development	▲
4	Risk Management		15	Greenhouse Gas Emissions Management	▲	24	Human Rights Concerns and Protection	
5	Code of Ethics and Ethical Behavior		16	Circular Economy		25	Employee Benefits and Compensation	★
6	Ethical Management and Regulatory Compliance		17	Water Management		26	Community Engagement and Social Contribution	
7	Technology and Innovation R&D	★	18	Waste Management		27	Product Labeling and Product Health and Safety	▲

Code	Economic Considerations	Note	Code	Environmental Considerations	Note	Code	Social Considerations	Note
8	Customer Relations Management	★	19	Chemical (Hazardous Substances) Management		28	Talent Recruitment and Retention	
9	Information Security Management	▲	20	Peripheral Noise Management		29	Customer Personal Data Protection	
10	Procurement Policies and Supplier Management	★						
11	Operational Continuity Management	▲						

## ● Regular Review

Based on the seven material issues identified, which correspond to the seven specific material topics in the GRI Standards, we used stakeholders as the boundary for disclosure of sustainability information on material issues, and carried out collection and disclosure of sustainability information in accordance with the reporting requirements and management policies and objectives for each topic. Other sustainability issues evaluated by the Company's Sustainability Committee as worthy of attention will also be disclosed to the public at the same time.

## ● Changes in Material Issues

In 2022, we assessed the material issue areas with reference to the GRI's sustainability issues, in addition to the disclosures required by SASB standards for the industries in which we operate. Furthermore, in response to customer evaluations that require additional sustainable management of suppliers, we have included "Procurement Policies and Supplier Management" to enhance the sustainable management of suppliers.

### ■ Changes to Material Issues in 2022

Material Topics in 2021	Material Topics in 2022	Change Overview	Description for Change
Employee Benefits and Compensation	Workplace Safety and Health Management	↑	In 2022, due to customer evaluation requirements for increased sustainability management among suppliers, a new major issue "Procurement Policy and Supplier Management" was added. This involves collaborating with more suppliers/contractors to jointly create a sustainable future.
Workplace Safety and Health Management	Employee Benefits and Compensation	↓	
Customer Relations Management	Customer Relations Management	No Change	
Operational and Financial Performance	Procurement Policies and Supplier Management	New	
Technology and R&D	Operational and Financial Performance	↓	
Climate Change and Energy-Saving and Carbon Reduction	Technology and Innovation R&D	↓	
	Climate Change and Energy-Saving and Carbon Reduction	↓	

## 1.6 Stakeholders and Material Issues

### ● Material Issues and Boundaries

Based on the results of the questionnaire survey, the Stakeholder Task Force identified and agreed on seven key issues, namely, operational and financial performance, technology and innovation, customer relationship management, procurement policy and supplier management, climate change and carbon reduction, workplace safety and health management, and employee benefits and compensation. The following table is a comparison of the GRI Standards and Stakeholder Concerns Boundary Table, and the related information and management policies are disclosed in the relevant sections of this Report:

Core Values	Material Issues	GRI Standards Specific Material Topics / Custom Material Topics	Boundaries			Disclosure on Management Approach Section	
			Internal (Direct Impact)				
			Taiwan	Suzhou	Vietnam		
Service Integrity	Operational and Financial Performance	GRI 201 Economic Performance	●	●	●	Shareholders (indirect impact), Customers/Clients (business conduct impact), Suppliers/Contractors (business conduct impact), Group (indirect impact)	2.2 Operational and Financial Performance
	Technology and Innovation R&D	Custom Material Topics	●	●	●	Customers/Clients (business conduct impact), Shareholders (indirect impact), Group (indirect impact)	3.2 Technology and Innovation R&D 3.4 Product Quality Control
Customer Satisfaction	Customer Relations Management	Custom Material Topics	●	●	●	Customers/Clients (business conduct impact)	3.1 Customer Service Management
	Procurement Policies and Supplier Management	GRI 204 Procurement Practice	●	◎	◎	Customers/Clients (business conduct impact), Suppliers/Contractors (business conduct impact)	3.3 Supplier Sustainability Management
Pro-active Accountability	Climate Change and Energy-Saving and Carbon Reduction	GRI 305 Emissions	●	◎	◎	Government Agencies (indirect impact), Group (indirect impact), Customers/Clients (business conduct impact)	4.1 Climate Change 4.2 Greenhouse Gas Management 4.3 Energy Management 4.4 Environmental Management Policy

Note: ● indicates the disclosed materiality information; ◎ indicates minor significance, planned for future inclusion in disclosure.

## ● Management of Material Issues

### Due Diligence Process

To mitigate and prevent the impacts of major topics and enhance organizational resilience, FBT conducts due diligence investigations on major topics regularly, following the PDCA process, to assess the related impacts and potential negative effects, and actively take corresponding mitigation measures.

### 1. Identifying Impacts

Internal experts regularly review the degree of impact and risk assessment analysis of major topics on the Company's operations, confirming the degree of impact of each issue.

### 2. Developing Plans

Based on the investigation results, plans for mitigation, improvement, and prevention are developed for issues with high potential risks.

### 3. Supervising Implementation

Implement the improvement plan and track it regularly to assess the effectiveness of the plan's execution.

### 4. Reviewing Improvements

Review the management process and performance to adjust the execution plan.

## 1.6 Stakeholders and Material Issues

Material Issues	Impact	Impact on the Organization	Mitigation, Improvement, and Prevention Plans
Operational and Financial Performance	Positive Benefit	> Increase in stock price, profit, and feedback to shareholders, as well as increased employee compensation and benefits.	<b>Continuously collaborate with customers and develop new products independently to establish a stable revenue source and enhance profitability.</b>
	Potential Benefit	> Increased trust from customers and suppliers, boosting employee morale.	
	Negative Impact	> Decline in stock price and affecting the company's operational funding needs.	
	Potential Impact	> Affecting trust from customers and suppliers, leading to reduced orders and suppliers being hesitant to supply goods.	

Material Issues	Impact	Impact on the Organization	Mitigation, Improvement, and Prevention Plans
Technology and Innovation R&D  Customer Relations Management	Positive Benefit	> Obtaining long-term cooperation orders to achieve stable revenue.	<b>Adopting IATF 16949 quality management system's customer-oriented PDCA operation and management, becoming a trusted supplier for customers and achieving continuous growth.</b>
	Potential Benefit	> Cooperate with customers and independently develop new products to achieve sustained revenue growth.	
	Negative Impact	> Product defects resulting in customer complaints, claims deductions, affecting subsequent orders, and even disqualification as a supplier.	
	Potential Impact	> Unable to qualify for customer's new product development, resulting in order loss and revenue decline.	

Material Issues	Impact	Impact on the Organization	Mitigation, Improvement, and Prevention Plans
Procurement Policies and Supplier Management	Positive Benefit	> Reduced inventory, transportation, and raw material costs, meeting delivery and quality requirements, and valuing environment, safety, and health to achieve customer satisfaction.	<b>Implement supplier management and development in line with the IATF 16949 quality management system and environment, safety, and health system, stabilize customer cooperation, and achieve sustainable development of the supply chain.</b>
	Potential Benefit	> Establish stable cooperative relationships and trust, enhance local procurement, and exert influence to promote the sustainable development of the entire supply chain.	
	Negative Impact	> Delayed delivery, unstable quality, poor environment, safety, and health management leading to customer disengagement.	
	Potential Impact	> Unstable supply affecting customer orders, damaging the company's image, and leading to revenue decline. Failure to meet customer environment, safety, and health evaluation requirements, resulting in the inability to qualify for new development projects.	

Material Issues	Impact	Impact on the Organization	Mitigation, Improvement, and Prevention Plans
Climate Change and Energy Saving and Carbon Reduction	Positive Benefit	> Continuously achieve energy-saving and carbon-reduction goals and reduce costs through greenhouse gas inventory and the promotion of energy systems.	<b>1. Identify climate-related risks and opportunities through cross-departmental discussions and assessments.</b> <b>2. Evaluate the potential operational and financial impacts of significant climate risks and opportunities on the company.</b>
	Potential Benefit	> Implement regulatory risk management mechanisms through TCFD opportunity/risk identification to gain leading opportunities and reduce cost losses.	
	Negative Impact	> Failure to conduct greenhouse gas inventory and set energy-saving targets may lead to penalties due to non-compliance with FSC requirements.	
	Potential Impact	> Increased additional costs due to physical and transitional risks caused by climate change, such as the implementation of international carbon taxes and domestic carbon fees.	

Material Issues	Impact	Impact on the Organization	Mitigation, Improvement, and Prevention Plans
Workplace Safety and Health Management	Positive Benefit	> Establish a safety culture, cultivate compliance habits, and eliminate, reduce, or avoid injuries and unhealthy incidents among all workers during operations.	<b>Create a safe and healthy workplace through the PDCA cycle of the ISO 45001 Occupational Safety and Health Management System.</b>
	Potential Benefit	> Continuously promote occupational safety management awareness in the supply chain through the "Safety Home" program, drive safety and health improvements, and create a safe and healthy workplace.	
	Negative Impact	> Insufficient safety awareness among employees resulting in work-related accidents.	
	Potential Impact	> Unsafe environment and behaviors may cause harm to employees, affecting the company's image, and increasing costs.	

Material Issues	Impact	Impact on the Organization	Mitigation, Improvement, and Prevention Plans
Employee Benefits and Compensation	Positive Benefit	> Increase employee retention rate and reduce recruitment costs.	<b>The Company continuously improves its operational and financial performance to achieve overall employee compensation growth.</b>
	Potential Benefit	> Enhance the company's competitiveness in the industry and increase employee morale.	
	Negative Impact	> Increased employee turnover rate, affecting company operations, and increasing costs.	
	Potential Impact	> Loss of human capital, affecting organizational capital, and posing risks to the company's internal process operations.	

The background of the slide features a stylized illustration. At the top, there's a city skyline with yellow buildings against a light sky with clouds. Below the skyline, several interlocking gears of different sizes and colors (red, grey, blue) are shown. Some gears have a checkmark inside them. In the foreground, there are silhouettes of people working at desks with laptops, and a large red arrow pointing upwards and to the right, symbolizing growth and progress.

# 2 Sustainable Governance of the Company

2.1 Corporate Governance Framework

2.2 Operational and Financial Performance

2.3 Business Ethics

2.4 Risk Management

# Chapter Performance Highlights

For nine consecutive years, the corporate governance evaluation has consistently ranked within the top 6% to 20% in the (listed) category

Received TCSA for seven consecutive years in sustainability reporting with one bronze award and six silver awards

In 2022, the attendance rate of the Board of Directors was 100%.

In 2022, the consolidated revenue reached NT\$3.141 billion, with a growth of 13.55%.

In 2022, the consolidated after-tax net profit reached NT\$306 million, with a growth of 21.16%.

## 2.1 Corporate Governance Framework

### 2.1.1 Company Organizational Structure

The Company was approved as a public offering company in 1998. Since then, it has continuously improved its internal control management, and completed the listing on the OTC market in 2003. Since our listing, we have been operating under the premise of integrity of corporate governance and transparency of information, and have minimized operational risks under various conditions under our control. To provide the best service to customers, production and service facilities have been established in Taiwan, China, and Vietnam, offering global services that meet customer satisfaction in terms of quality, cost, and delivery.

The Company continuously strengthens the functions of the Board of Directors, enhances the leadership and management capabilities of the management team, and increases information transparency to safeguard shareholders' interests. Our efforts in corporate governance have been recognized through the consistent ranking within the top 6% to 20% in the (listed) category from the first to the ninth evaluation for our corporate governance evaluation. The Company has established an Audit Committee, a Remuneration Committee, and a Sustainability Committee. The Sustainability Committee is responsible for decision-making related to economic, environmental, and social impact responses.

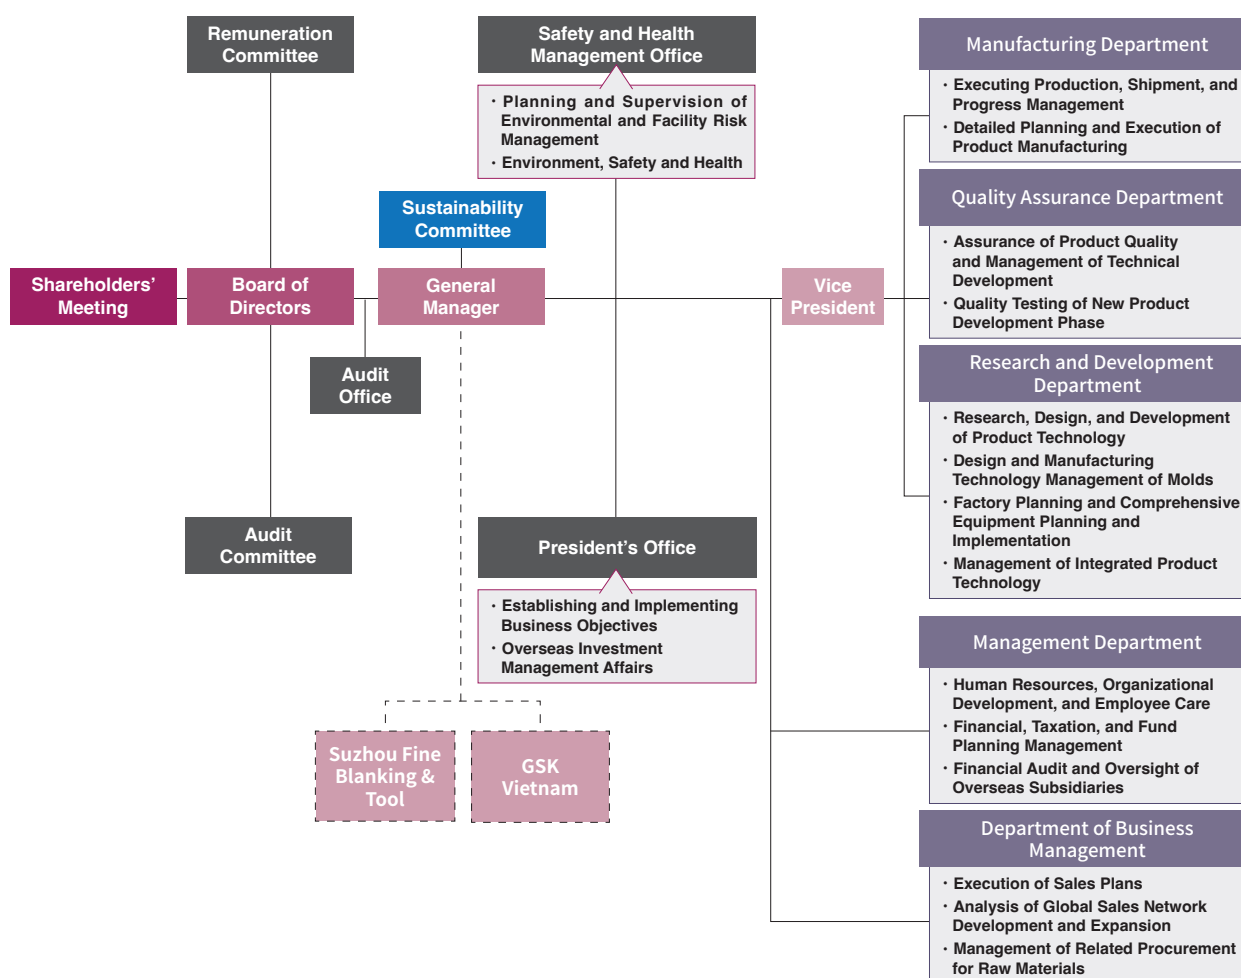

### 2.1.2 Company Shareholder Structure

The Company's stock was listed on the OTC market in Taiwan on April 16, 2003 (stock code 4535). As of 2022, the organizational size, structure, ownership, shareholder structure, and operational bases of the supply chain have not undergone significant changes.

## 2.1

## Corporate Governance Framework

Regarding ownership, there have been no significant changes in the shareholdings of directors. Therefore, both ownership and management rights remain unchanged. Shareholdings among shareholders have been subject to market fluctuations, and shareholders adjust their holdings accordingly. As of March 31, 2023, no government entities are included in the shareholder structure, and the shareholder structure is shown in the following figure:

Statistics Date: March 31, 2023

## 2.1.3 Company Governance Operating Structure

### ● Operations of the Board of Directors

Except as required by law, the shareholder meeting is convened by the Board of Directors. The Board of Directors is the highest governing body of the company. The chairperson serves as the chairman of the shareholder meeting and the Board of Directors. The chairperson does not concurrently hold the position of the President. The President is recommended by the chairperson to the Board of Directors. The Vice President is recommended by the President to the Board of Directors. Both the President and Vice President are professional managers. The President implements the resolutions of the Board of Directors and oversees the company's operations, with the Vice President delegating duties in business divisions to assist the President.

The Board of Directors is the highest decision-making and governance unit of the Company and is responsible for overseeing the overall operational responsibilities and the results of management's policy implementation. The Company's President is also a director, which enables the Board of Directors to effectively implement the Company's development blueprint into planning and execution, and enhances the Board of Directors' understanding of the Company's operating conditions. The management team maintains good communication with the Board of Directors and carries out the Board's strategic guidance and business operations in accordance with the business execution aspects, so as to maximize the benefits for all shareholders. In addition, the President of the Company is also the head of the Sustainability Committee, which is responsible for decision-making and management of economic, environmental, and social impacts, and submits a summary report on the effectiveness of the Board's implementation of sustainability and TCFD in May of each year.

### ■ Election of Directors and the Diversity and Independence of the Board of Directors:

#### (1).Board of Directors Diversity

According to the Company's "Corporate Governance Practice Guidelines," Article 20, on the necessary capabilities that the Board of Directors should possess, the Board members should generally possess the necessary knowledge, skills, and competencies required to perform their duties.

To achieve the ideal goal of corporate governance, the Board of Directors should possess the following capabilities:

## 2.1

# Corporate Governance Framework

In addition, the selection of director candidates will be based on diversity criteria and will consider the Company's business model and specific needs, including but not limited to gender, age, race, language, cultural background, educational background, industry experience, and professional experience.

The Company's board structure, taking into account the scale of corporate development and the ownership of major shareholders, has set the appropriate number of board seats to be between seven and eleven in the Articles of Incorporation.

Considering the diversity of the Board of Directors, the number of directors who concurrently serve as company executives should not exceed one-third of the board seats. The Board should formulate appropriate diversity policies based on its own operations, business models, and development needs, including but not limited to the following two major aspects:

I. Basic Conditions and Values: Gender, age, nationality, and culture.

II. Professional Knowledge and Skills: Professional backgrounds (such as law, accounting, industry, finance, marketing, or technology), professional skills, and industry experience, among others.

### (2). Implementation of Diversity

The Company's Articles of Incorporation specify the candidate nomination system for electing directors, which allows shareholders holding 1% or more of the shares to nominate candidates in accordance with Articles 30 and 192-1 of the Company Act. The board structure, taking into account the scale of corporate development and the ownership of major shareholders, has set the appropriate number of board seats to be between seven and eleven in the Articles of Incorporation.

The current Board of Directors consists of 10 directors, including 3 independent directors, representing diverse genders, ages, professional knowledge, and backgrounds. Members possess a wealth of experience and expertise in business management, leadership decision-making, industry knowledge, financial accounting, marketing, and other fields. The Company emphasizes the financial and accounting expertise of Board members, aiming for a target of 30% or more. Currently, there are 10 directors, of which 5 have accounting backgrounds and experience, reaching 50% in practice. The Company also focuses on gender equality among Board members, aiming for female directors to account for 20% or more. Currently, there are 10 directors, including 2 female directors, achieving the goal of 20%. The proportion of directors concurrently serving as company executives does not exceed one-third of the Board, with 2 out of 10 directors also serving as employees of the company, accounting for 20% of the total Board seats.

### (3). Independence of the Board of Directors

The appointment of all directors is based on the Company's Articles of Incorporation, the Rules Governing the Election of Directors, the Corporate Governance Guidelines, the Scope of Duties of Independent Directors, and Article 14-2 of the Securities Exchange Act. Since 2006, the overall voting and candidate nomination system for the election of all directors and independent directors have been established to encourage shareholder participation. Shareholders holding a certain number of shares or more can propose a candidate list, and the qualification of each candidate is reviewed. Each nominated candidate must sign a declaration stating that they do not fall under any of the circumstances described in Article 30 of the Company Act. The related procedures

are carried out and announced in accordance with the law to safeguard shareholders' rights and prevent monopolization of nomination rights, maintaining the independence of the Board of Directors. To assist directors in clearly understanding their rights and responsibilities upon assuming office, important regulations that directors must follow (e.g., "Compliance Brochure for Directors and Supervisors of TWSE/TPEx-Listed and Emerging Market Companies," "Securities Market Regulations for Listed Companies, Their Directors, Supervisors, and Major Shareholders," "Compliance Brochure for Independent Directors") are provided after directors assume office.

The Board of Directors guides the Company's strategies and supervises management's responsibilities to the company and shareholders. The exercise of powers by the Board of Directors is based on the Company's Articles of Incorporation, Corporate Governance Guidelines, Board Meeting Rules, Code of Ethics for Directors and Managers, Code of Ethical Conduct, shareholder resolutions, and relevant laws. The current structure of the Board of Directors consists of three independent directors, accounting for 30% of the total Board seats, and seven non-independent directors, accounting for 70% of the total board seats. Although there are three directors who have relationships within the second degree of kinship, the Board of Directors continuously assesses the independence of directors, considering all relevant factors, including: whether the relevant directors can continue to raise constructive questions to management and other directors, whether their opinions are independent from management or other directors, and whether their conduct within and outside the Board of Directors is appropriate. The behavior of independent non-executive directors must meet expectations under appropriate circumstances, emphasizing independent operations and transparency of the Board of Directors. Both directors and independent directors act independently and exercise their duties independently.

The Company has established a Board performance evaluation system, which includes an annual internal evaluation of the Board of Directors, self-assessment of board members, and self-assessment of functional committees. The evaluation results are reported to the Board of Directors and disclosed in the Company's annual report and website.

### ● Mechanism to Prevent Conflicts of Interest

According to the Company's "Regulations Governing Procedure for Board of Directors Meetings" and "Corporate Governance Guidelines," if a conflict of interest exists for a director or the legal person they represent with a specific matter on the agenda, then the director may not take part in the discussion and voting. They should also excuse themselves during the discussion and voting process, nor represent any other director during voting.

The Company does not have situations where major suppliers or other shareholders have cross-shareholdings, nor does it have any controlling shareholders. Furthermore, the Company has established independent directors, who make recommendations based on their professionalism and experience from an objective and impartial standpoint.

Relevant information on the directors of the Company, who are either corporations or individuals, who are already working in the management of other companies, is listed on pages 13 to 17 of the 2022 Annual Report, and the restriction on prohibiting competitive behavior by new directors and their representatives has been lifted at the 2023 Annual General Meeting of Shareholders.

Description: Directors Wu Chung-yi, Lee Chung-wu, Wu Yu-mei, and Wu Yen-hsing did not arrange for further education due to their work schedule.

## 2.1 Corporate Governance Framework

### Audit Committee

The Audit Committee of the Company consists of all independent directors and meets at least once per quarter and meetings may be convened at any time as necessary. After the general election of the Board of Directors at the shareholders' meeting on June 18, 2020, the former system of supervisors was replaced by the Audit Committee. The description of the operation of the Company's Audit Committee, the communication between the Audit Committee and the certified public accountants, and the principles of communication between the independent directors, the head of internal audit, and the certified public accountants are disclosed in the Company's annual report and on the Company's website.

In 2022, the Audit Committee met five times and the attendance of the independent directors was as follows:

#### 2022 Audit Committee Attendance Schedule of Independent Directors

Title	Name	1st	2nd	3rd	4th	5th
		2022/3/2	2022/5/3	2022/8/2	2022/11/1	2022/12/12

### Remuneration Committee

The Company established the Remuneration Committee in accordance with the "Regulations Governing the Appointment and Exercise of Powers by the Remuneration Committee of a Company Whose Stock is Listed on the Stock Exchange or Traded Over the Counter" on August 26, 2011. The Remuneration Committee, approved by the Board of Directors, consists of 3 independent directors and meets at least twice a year. In 2022, the Remuneration Committee has convened two meetings with 100% attendance rate. The main functions of the Remuneration Committee are to strengthen corporate governance and risk management, and to evaluate and supervise the compensation system of the Company's directors and managers based on the consideration of motivation and retention of talents. The remuneration of the directors and managers is reported to the Board of Directors for approval by the Remuneration Committee, and is based on the requirements of the Company's remuneration regulations and is reported in consideration of the Company's operating conditions, individual performance and future risks. In the future, the remuneration of directors and managers will be linked to the element of sustainable performance. The composition, duties and operations of the Remuneration Committee are disclosed in the Company's annual report and website.

## 2022 Remuneration Committee\_Attendance Schedule of Independent Directors

## Board Performance Evaluation

In order to implement corporate governance and enhance the functionality of the Board of Directors, the Company has established performance indicators to strengthen the efficiency of the Board's operations. The "Board of Directors Performance Evaluation Guidelines" have been formulated and passed. Each year, the Board of Directors and functional committees conduct self-assessment through questionnaires, with the evaluation content as shown in the table below:

### Implementation of Board Evaluation

Note: The Board performance self-assessment for 2022 has been completed and the evaluation results were submitted in the Board of Directors meeting report on March 6, 2023, as a basis for review and improvement. Some key points of the self-assessment with lower scores are as follows:

Self-assessment of the Board of Directors: 37. Directors have participated in diversified courses beyond their respective professional competencies, engaging in appropriate training hours annually. 38. The company keeps a formal record of director training hours and maintains an ongoing professional development plan to strengthen directors' knowledge and skills.

Self-assessment of the individual Board members: 19. Directors have participated in diversified courses beyond their respective professional competencies.

Self-assessment of the functional committees: 13. Sufficient time is allocated for discussions in functional committee meetings.

## 2.2 Operational and Financial Performance

### GRI 201 Economic Performance Management Approach

Item	Description	Content
Material Topics and its Boundaries	Reason for the materiality of this topic	Stable and strong financial performance is essential to achieve shareholders' equity and the sustainable development of the company in the future. The Company is committed to enhancing profitability and creating higher economic value, aiming to achieve value recognition and satisfaction among shareholders, customers, suppliers, contractors, employees, and other relevant stakeholders.
	Boundary for this topic	Employees (direct impact), Customers/Clients (business operations impact), Suppliers (business operations impact), Shareholders (indirect impact), Group (indirect impact)
	Limitations of disclosure within this boundary	The financial disclosures in this year's report mainly focus on consolidated financial information, while other information related to the parent company's individual financial statements and the relevant information of investee companies is presented in the parent company's individual financial statements and annual report.
Management Approach and Its Components	Management objectives for this topic	Continue to pursue sustainable development, profitability, and growth.
	Policy	Continuously collaborate with customers and develop new products independently to establish a stable revenue source and enhance profitability.
	Commitments	Comply with regulations from various regulatory authorities and implement management policies to continuously create maximum benefits for the company and all stakeholders.
	Goals and Targets	The Company formulates operational strategies and objectives annually based on the future development direction of the company, changes in internal and external environments, and the company's strengths and weaknesses.
	Responsibility	The President's Office is responsible for aggregating and reviewing the goal plans of various departments within the company.
	Resources	<ol style="list-style-type: none"> <li>Overall customer relationships in the group externally and core capabilities in developing precision stamping molds and product development capabilities internally.</li> <li>Integration of upstream and downstream processes, making full use of external resources.</li> </ol>
	Grievance Mechanism	<p>If any stakeholders discover any suspected violations of ethics and integrity, they can report it through the following channels:</p> <p>External Complaint Unit: Wu Gao-chuan, Department of Auditing</p> <p>External Complaint Phone: 04-7990118 ext. 105</p> <p>External Complaint Email: gmo12@fineblanking.com.tw</p> <p>Internal Complaint Phone: 04-7990118 ext. 120</p> <p>Internal Complaint Email: adm20@fineblanking.com.tw</p>
Evaluation of the Management Approach	Specific Actions	<ol style="list-style-type: none"> <li>Continue to carry out self-development of products and update and optimize production equipment or processes to enhance the company's operational competitiveness.</li> <li>Promote TPS and TPM activities to improve production efficiency and reduce defective rate.</li> </ol>
	Management Assessment Mechanism	Monthly regular management meetings are held by executives at level 1 and above to conduct performance reviews for the current month.
	Results of Management Policy Evaluation	In 2022, the consolidated revenue was NT\$3.141 billion, and the after-tax net income was NT\$306 million.
	Management Policy Adjustments	We have set targets for consolidated revenue and net income after tax for the five years starting from 2022, and will continue to maximize the benefits for the Company and its stakeholders in the future.

The Company's consolidated financial statements include the subsidiaries SUPERIORITY ENTERPRISE CORP., PROPITIOUS INTERNATIONAL INC., Suzhou Fine Blanking & Tool Co., Ltd., and GSK VIETNAM CO., LTD. In 2022, due to the continuous lifting of COVID-19 restrictions in Europe, North America, and Southeast Asia, orders rebounded compared to 2021, coupled with new development and mass production, resulting in a 13.55% increase in consolidated revenue and a 21.16% overall growth in consolidated after-tax net income. Financial highlights for 2020-2022 are shown in the table below:

Unit: Thousand NTD

Item	2020	2021	2022	Percentage of increase or decrease in 2022 over 2021
Total assets	2,887,974	3,110,772	3,312,029	6.47%
Total liabilities	448,545	519,416	545,093	4.94%
Owners' equity attributable to parent company	2,193,302	2,316,133	2,440,776	5.38%
Net operating revenue	2,112,014	2,766,438	3,141,305	13.55%
Pre-tax profit	180,358	343,500	418,195	21.75%
Net income for the period	143,338	252,953	306,478	21.16%
Net income attributable to owners of the parent company	103,071	181,204	213,388	17.76%

The Company's main products are blanking components for motorcycles and automobiles. Due to the lack of statistical data on individual products of automotive and motorcycle parts from industry research institutions, market share estimates for the Company's four major product categories are mainly based on statistics from the Taiwan Transportation Vehicle Manufacturers Association.

#### (1).Motorcycle Disc Brakes

The main production locations for motorcycle disc brakes are Taiwan and GSK Vietnam. The market share in Taiwan and Vietnam is as follows:

##### A. Market share in the Taiwan domestic market for motorcycle disc brakes for 2020 to 2022:

The Company's Taiwan operational sites mainly supply motorcycle disc brakes directly to manufacturers such as SYM, KYMCO, YAMAHA Taiwan, Gogoro, PGO Scooters, and SUZUKI. The market share in the domestic motorcycle disc brake market for 2020 to 2022 was over 70%.

##### B. Market share in the Vietnam market for motorcycle disc brakes for 2020 to 2022:

The Company's Vietnam operational sites mainly sell motorcycle disc brakes directly or indirectly to local Taiwanese and Japanese car manufacturers, such as Honda, SYM, SUZUKI, PGO, and KYMCO. The market share in the Vietnam motorcycle disc brake market for 2020 to 2022 was approximately 60%.

#### (2).Other Precision Blanking Components

Since 2000, the Company has obtained orders for related precision blanking components for the world's largest vehicle safety airbag and seatbelt manufacturer, Autoliv Group. The annual production quantity of seatbelt

## 2.2 Operational and Financial Performance

metal components by Taiwan and China operational sites from 2020 to 2022 was approximately 10 million PCS, 6.5 million PCS, and 6.5 million PCS, respectively. The global sales volume from 2020 to 2022 was approximately 79 million vehicles, 83 million vehicles, and 82 million vehicles, respectively. The usage of seatbelts accounted for approximately 1.6% to 2.5% of the global market.

### (3).Motorcycle Seats

The main production location for motorcycle seats are the Vietnam operational sites. The Company directly sells motorcycle seats to local Taiwanese and Japanese car manufacturers, such as Honda, YAMAHA, SYM, PGO, and KYMCO, with a production share of approximately 50% to 100% for each manufacturer. The market share in the Vietnam motorcycle seat market from 2020 to 2022 was approximately 60%, 63%, and 66%, respectively.

### (4).Automobile Seats

The main production location for automobile seats is GSK VIETNAM CO., LTD. The Company directly sells automobile seats to local car manufacturers such as Honda. The Company's shipment volume in 2021 and 2022 accounted for approximately 9% of the local assembly and sales volume in Vietnam.

The Company will continue to cultivate the OEM market for automotive and motorcycle components through the overall resources of the group, strengthen the development mechanism and process technology capabilities to expand products and markets. We will also continuously integrate and implement various operational information systems to enhance operational efficiency, promote TPS improvement activities to increase management capacity, implement the dashboard management system to reduce production lead time and improve delivery efficiency, reduce costs, and ultimately increase profitability.

### ▪ Financial Performance

Unit: Thousand NTD

Financial Items	2020	2021	2022
Operating Revenue (A)	2,112,014	2,766,438	3,141,305
Operating Costs (B)	1,775,307	2,226,107	2,532,909
Operating Expenses (C)	164,917	206,472	231,704
Employee Remuneration and Benefits (Note 1)	337,103	394,455	421,257
Cash Dividends Paid to Shareholders (D) (Note 3)	52,963	121,059	151,323
Income Tax (E)	37,020	90,547	111,717
Community Investment Donations (Note 2)	176	211	239
Retained Economic Value (a) (a=A-B-C-D-E)	81,807	122,253	113,652

Description:

Note 1: Employee salaries and benefits are included in both operating expenses and operating costs.

Note 2: Donations are included in operating expenses.

Note 3: 2020 cash dividend distribution: NT\$0.7, NT\$52,963,000 2021 cash dividend distribution: NT\$1.6, NT\$121,059,000 2022 cash dividend distribution: NT\$2, NT\$151,323,000

## 2.3

## Business Ethics

The Company has established “Code of Ethical Conduct,” “Code of Ethics for Directors and Managers,” “Corporate Governance Guidelines,” “Work Rules,” and “Occupational Safety and Health Guidelines” (available for reference on the Company’s website: [https://www.fineblanking.com.tw/ec99/rwd1280/category.asp?category\\_id=38](https://www.fineblanking.com.tw/ec99/rwd1280/category.asp?category_id=38)). These regulations are issued by the Board of Directors or senior executives and apply to all activities and business relationships of the Company. They serve as behavioral standards for executives and employees. Through the risk identification mechanism of internal control self-assessment, corruption risks and risks arising from internal and external events, including risks that may affect the achievement of objectives, financial reporting risks, and compliance risks are all taken into consideration. Established corruption-prone risks and identified risks are integrated into organizational responsibilities and managed through appropriate functional divisions and internal audit mechanisms to reduce and control such risks. The Company has an independent audit unit reporting directly to the Board of Directors, responsible for internal audit affairs. The current organization consists of one audit supervisor and one audit personnel.

To ensure business performance and efficiency (including profitability, performance, asset security, etc.), reliable, timely, and transparent reporting, and compliance with relevant regulations and laws. The Company’s internal control is based on self-supervision, making adjustments in response to environmental and situational changes. The internal control system consists of five components: 1. Control Environment, 2. Risk Assessment, 3. Control Activities, 4. Information and Communication, and 5. Supervision.

## 2.3 Business Ethics

### 2.3.1 Management and Employee Signing of Corporate Social Responsibility Declaration and Anti-Corruption Statement

The “Communication Management Procedures” of the Company, reviewed by a senior executive committee, is established to provide internal training and signing of internal corporate social responsibility statements for directors and employees, and signing of corporate social responsibility statements for suppliers. In 2022, new employees received education and training and signed the Corporate Social Responsibility Declaration and Anti-Corruption Statement. Through periodic regulatory advocacy activities, internal bulletin board announcements, etc., employees are informed of the latest or regulations related to their work, further strengthening their firm commitment to adherence to professional ethics.

The Company upholds its core value of “Inclusive Growth” and supports the United Nations Universal Declaration of Human Rights (UDHR) and related international concepts of respecting human rights. At the same time, we adhere to the local regulations of all global operating locations, and treat all employees with dignity and respect. Information on human rights protection training, human rights concerns and practices, and employee communication channels for the year 2022 are covered in section 5.5 Human Rights and Communication of this Report.

#### Five Declarations of Corporate Social Responsibility

### 2.3.2 Effectiveness of Anti-Corruption Advocacy

In 2022, the Company had no incidents of corruption, bribery, illegal political donations, improper charity donations, improper benefits, or other unethical practices. It did not incur significant fines for violating regulations related to labor, environment, or society. In 2022, the total monetary loss resulting from legal disputes related to anti-competitive behavior regulations was 0.

### 2.3.3 Operation of the Company Whistleblowing System

Both internal and external websites of the Company have established e-mail and hotlines to allow employees and external parties to report any improper practices. The Company ensures the confidentiality of the whistleblower's identity and report content, and actively and prudently investigates and handles reported cases. If there are violations of ethical management regulations, they will be reported and dealt with according to relevant personnel regulations. Information on the job title, surname, violation date, violation content, and handling situation of the violators will be disclosed on the company's internal website.

If the penalized individuals believe that the company has handled the matter improperly, they may file a complaint with the management department for remediation. If human rights complaints are received, the Human Resources Arbitration Committee may convene a meeting to record the details of the incident. The committee consists of managers at the department level, with the President serving as the chairperson. The committee votes to determine whether punishment is necessary.

## 2.4

## Risk Management and Control

The Company's risk management process includes risk identification, risk analysis, risk assessment, risk response, continuous monitoring, and improvement, and it is continuously managed through the PDCA management process.

Based on the characteristics and impact of various risks generated by operations, significant policies, endorsements, guarantees, fund loans, and bank financing of the Company are all subject to evaluation and analysis by appropriate responsible departments before execution based on resolutions of the Board of Directors. The Auditing Office also formulates its annual audit plan based on risk assessment results and implements it effectively to ensure oversight and control of risk management implementation.

Major Risk Categories	Risk Management Responsible Unit (First Mechanism)	Risk Review and Control Mechanism (Second Mechanism)	Risk Decision-making and Oversight (Third Mechanism)	Response Measures
Company Overall Strategy and Objective Risks	Top Management	Business Review Meetings	※Response and Handling by Highest Decision-making Body: Board of Directors  ※Unit Responsible for Monitoring and Tracking Risk Matters: Audit Office	1. At the end of each year, review the performance of the current year and set the direction for implementing the strategy goals for the following year. 2. Monthly business review meetings to review and control the achievement status of the company's overall strategic objectives and risk response measures. 3. Immediate response to potential risks affecting goal achievement through weekly executive meetings. 4. Hold at least one Board meeting per quarter to review the achievement status of the company's overall strategic objectives. For risks associated with unmet goals, decide on response and handling measures.
Market Risks	Department of Business Management	Business Review Meetings		1. Competitive action for new product development: Understand and match the direction of existing customer development in order to increase the sales opportunities of new product lines. 2. In accordance with the Company's internal control system of the sales cycle to regulate the operations of all relevant departments to reduce the order and accounts receivable process risk management, customer credit risk assessment and control operations.
Regulatory Compliance and Control	Management Department	Business Review Meetings Board of Directors		1. The Company has set up the "Environmental Safety and Health Regulations and Requirements Identification Management Measures," and the regulation checking personnel conducts the environmental safety and health related regulations checking every month. Since 2016, it has been extended to the checking of the related laws and regulations of finance, industry and commerce, personal data, and labor, in order to confirm the legal compliance status and to improve the operation with no delay. 2. The Company has established the "Contract Review Management Regulations," which stipulates the authority to audit and the audit procedures. 3. The Company employs a legal advisor and a dedicated legal staff of the GSK Group to provide counseling services on various contracts, agreements and legal matters.

## 2.4 Risk Management and Control

Major Risk Categories	Risk Management Responsible Unit (First Mechanism)	Risk Review and Control Mechanism (Second Mechanism)	Risk Decision-making and Oversight (Third Mechanism)	Response Measures
Information Risks	President's Office	Business Review Meetings		<p>The Company has formulated standard operating procedures such as "Information Operation Management Regulations", which applies to: application system development and maintenance, data access, backup mechanism, virus and network intrusion protection, server room installation, uninterrupted power supply system, and access control system. Control measures are taken in accordance with company standards, and authorized access control is implemented.</p> <p>The management structure of information security management, information security policy, specific management programs, and resources invested in information security management are described on pages 66-68.</p>
Financial Risks	Budget Committee Management Department	Business Review Meetings Board of Directors	<p>※Response and Handling by Highest Decision-making Body: Board of Directors</p> <p>※Unit Responsible for Monitoring and Tracking Risk Matters: Audit Office</p>	<ol style="list-style-type: none"> <li>1. Liquidity Risks: The Company maintains stable profitability and sufficient operating funds, with no significant bank borrowings. We will continue to maintain cash equivalents and fixed deposits not less than monthly revenue.</li> <li>2. Interest Rate Risks: The company mainly uses operating funds to repay long-term and short-term loans. When there are short-term funds, the Company primarily invests in high-liquidity short-term notes and fixed deposits to safeguard principal and maintain liquidity.</li> <li>3. Exchange Rate Fluctuation Risk: The Company constantly monitors exchange rate fluctuations when utilizing foreign currency short-term borrowings for importing steel. It uses exchange rate hedging tools and negotiates price adjustments with customers whose business is significantly affected by exchange rate fluctuations.</li> <li>4. Inflation Risks: The Company will continuously monitor changes in inflation and adjust the procurement inventory of raw materials accordingly. We will also implement improvement proposals to reduce costs and increase efficiency.</li> <li>5. Other Financial Risks: The Company does not engage in high-risk, high-leverage investments, or derivative transactions. In 2022, the Company did not provide endorsements or guarantees for others, nor did it extend loans to others.</li> </ol> <p>The Company has established the "Procedures for Fund Lending and Endorsement Guarantees," and relevant operations are conducted in accordance with the prescribed procedures.</p>
Personnel Risks	Management Department	Business Review Meetings		<p>To respond to changes in demographics, migrant worker risks, and declining birth rates:</p> <ol style="list-style-type: none"> <li>1. The Company continues to collaborate with universities and colleges to provide training for newly recruited personnel.</li> <li>2. Continue to promote the optimization of production lines, and implementation of TPS and TPM to improve production efficiency.</li> <li>3. Evaluate and implement automation of various equipment and production lines to reduce personnel requirements.</li> </ol>

Major Risk Categories	Risk Management Responsible Unit (First Mechanism)	Risk Review and Control Mechanism (Second Mechanism)	Risk Decision-making and Oversight (Third Mechanism)	Response Measures
Disaster Risk of Environmental Health and Safety	Safety Management Office Environmental Safety Systems Committee	Business Review Meetings Occupational Safety and Health Committee		<ol style="list-style-type: none"> <li>The Company has obtained verification for environmental, safety, and health management systems, such as ISO 14001 and CNS 45001 (ISO 45001). The internal TPM environmental and safety subcommittee continues to promote system operations, set objectives, and implement programs to reduce environmental and occupational safety risks.</li> <li>For emerging infectious disease response risks (e.g., COVID-19), the response measures are explained on page 152.</li> </ol>
Climate Change Risks	Energy System Committee Greenhouse Gas Inventory Committee TCFD Promotion Committee	Business Review Meetings Occupational Safety and Health Committee Sustainability Committee	※Response and Handling by Highest Decision-making Body: Board of Directors ※Unit Responsible for Monitoring and Tracking Risk Matters: Audit Office	<ol style="list-style-type: none"> <li>On December 21, 2021, the Board of Directors approved the establishment of the “TCFD Promotion Committee” under the Sustainability Committee to utilize the TCFD framework to construct the Company’s climate risk identification process. After discussions by the Promotion Committee and key members regarding climate risks and opportunities, the “Fine Blanking &amp; Tool 2022 Climate-Related Financial Disclosure Report” was compiled and summarized. For details, please refer to section 4.1 Climate Change.</li> <li>Although the Company has not yet been included as a target under the greenhouse gas reduction regulations, plant No.1 and No.3 of the Company are energy-intensive users, and the main greenhouse gases are energy-related indirect emissions (Category 2) mainly from electricity, accounting for about 85%. Since 2015, the Company has implemented the ISO 50001 Energy Management System and established the Energy Implementation Committee to carry out various energy management action plans with a goal of achieving at least 1% energy savings annually. At the same time, the Company conducts greenhouse gas emissions inventories and indirectly reduces greenhouse gas emissions through the promotion of ISO 50001 energy projects to mitigate climate change risks.</li> <li>Many governments are considering implementing carbon taxes or energy taxes, which will increase the prices of raw materials and energy required for production over the years. These factors will raise production costs for companies. The Company will continue to monitor changes in domestic and foreign regulations, understand regulatory trends, and make preparations in advance to reduce potential financial costs.</li> </ol>

## 2.4 Risk Management and Control

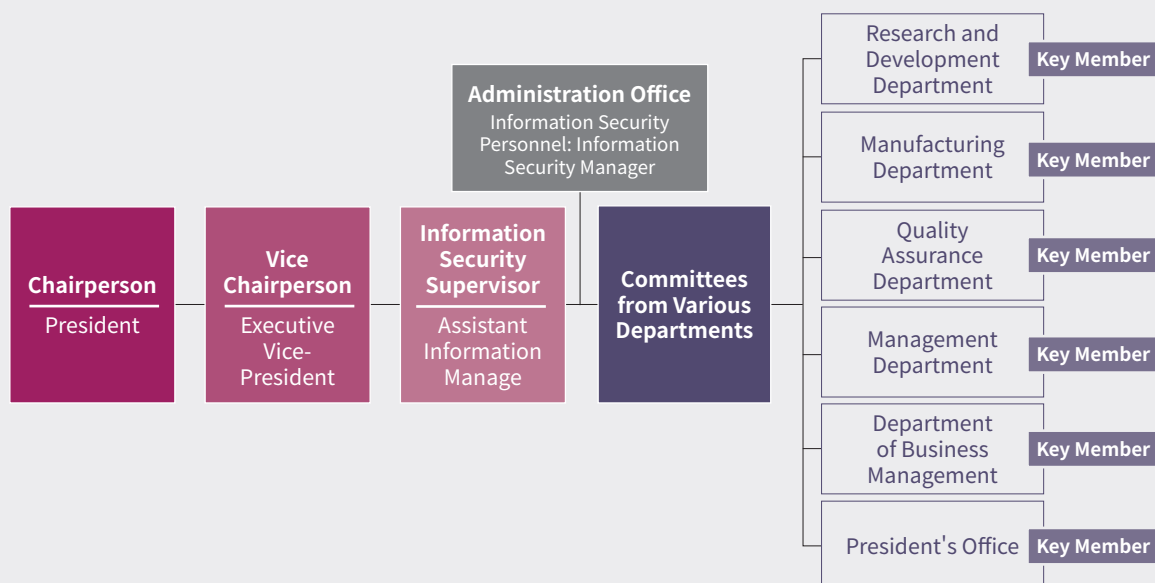

### Information Security Management

#### 1. Information Security Risk Management Framework

The Company has established a Risk Management Committee that conducts regular risk assessments annually. Starting from August 2018, due to potential failures or intrusions in information system equipment that could increase the risk of operational disruption, we have strengthened various information security protective measures and set management objectives to enhance information management efficiency. The management objectives undergo regular performance reviews and controls.

The Company has established relevant operational standards such as “Information Operation Management Regulations,” “Portable Storage Media Management Regulations,” and “Email Operation,” which cover: application system development and maintenance, data access, backup mechanisms, virus and network intrusion protection, data center installation of uninterruptible power supply systems, access control systems, management of portable hard drives and USB drives, and email usage authorization management. Employees execute and implement these activities according to company regulations and ensure the implementation of authorized access control to ensure information security.

The Information Security Management Committee was established in January 2022, with the President and Vice President serving as the Chairperson and Vice Chairperson, respectively. The Deputy Manager and managers of the President's Office are designated as responsible individuals for information security, leading and maintaining the execution of information security policies. The organization chart of the Information Security Management Committee is as follows:

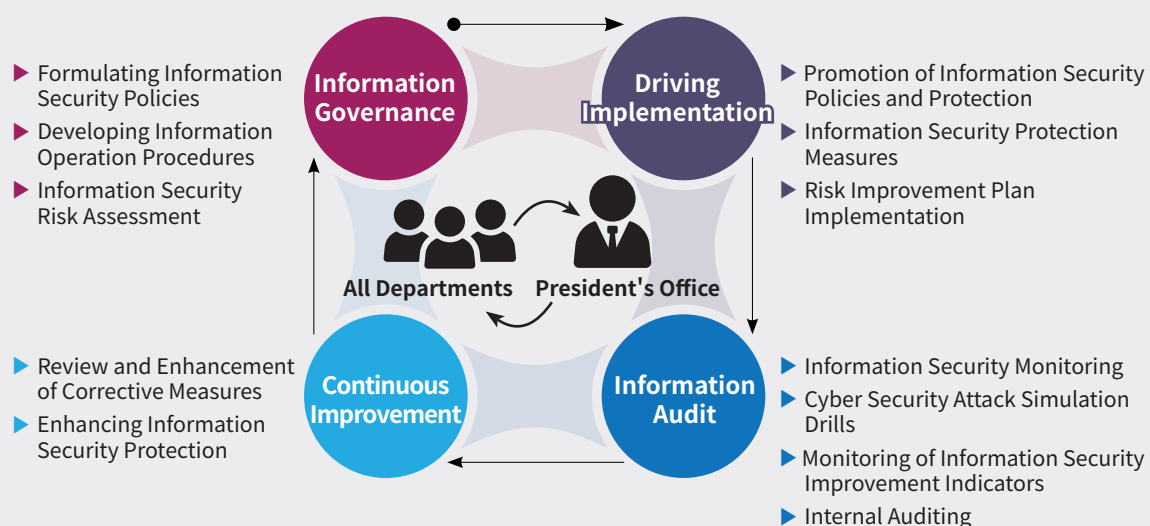

2.The Company has formulated the “Information Operation Management Regulations”, which stipulate the following information security policies:

As an enterprise engaged in the manufacture of automobile, motorcycle, and bicycle parts, in order to prevent unauthorized access, control, or other infringements of information systems and to ensure the confidentiality, integrity, and availability of information, the Company has established the following policy for all employees to follow jointly:

- Compliance with government information security-related legal requirements.
- Establishment of system and network permissions to prevent unauthorized use.
- Provision of suitable information software and hardware to maintain normal company operations.
- Establishment of a system data backup mechanism to verify the feasibility and correctness of data recovery.
- Establishment of information security protective measures to prevent viruses and hacker invasions.
- Establishment of an information security reporting mechanism to reduce the impact on company operations.
- Employee information security education and training to enhance awareness of information security.

3.Information Security Risk Management Framework and Continuous Improvement Process Flowchart

## 2.4

# Risk Management and Control

### 4. Specific Management Solutions

#### Network Safety

- ☐ Strengthen network firewalls and network controls to prevent computer virus spread across machines and factories.

#### 2022 Implementation Status

- ☒ Establish firewalls for real-time monitoring, promptly report and eliminate abnormalities.

#### Device Safety

- ☐ Conduct vulnerability detection and penetration testing at least once every two years.
- ☐ Implement endpoint antivirus measures based on computer types, and enhance malicious software behavior detection.

#### 2022 Implementation Status

- ☒ Vulnerability detection and penetration testing were carried out in July 2022 to reinforce hardware status.
- ☒ Weekly virus code updates and scans.

#### Enhanced Information Security Protection Technology

- ☐ Document and data encryption control and effective tracking.

#### 2022 Implementation Status

- ☒ Access permissions set according to department roles.
- ☒ Email usage authorization management.
- ☒ Management of portable hardware and USB drives.
- ☒ Computer system host disposal, destroy the equipment to ensure it's not used by others, so that the data is not captured or leaked.

#### Education, Training, and Advocacy

- ☐ Each unit implements information security promotion campaign at least once a year.
- ☐ Conduct at least one information security emergency response drill per year.

#### 2022 Implementation Status

- ☒ In 2022, a total of 169 people participated in information security promotion activities.
- ☒ In May 2022, an intrusion response drill for information systems was conducted, with the next scheduled for May 2023.

### 5. Resources Invested in Information Security Management

- (1). Human Resources: The Company's information security operations involve a total of 23 personnel, including the Chairperson, Vice Chairperson, responsible manager for information security, responsible personnel for information security, implementation committee members from various departments, and designated key members.

(2).Security Equipment: Includes firewalls, antivirus software, network automatic defense systems, email filtering systems, application system development and maintenance data access, mobile media management, access control and password management, backup systems, and cloud storage management.

(3).Physical Environment Setup: Includes data center access control and uninterruptible power supply systems.

6.Even though the company has established the above management processes and numerous information security protective measures, it cannot guarantee the complete prevention of network attacks from any third party that could paralyze the computer systems essential for crucial business functions such as manufacturing, operations, and accounting.

The Company will continuously review and assess information-related SOPs to ensure their appropriateness and effectiveness. Internal information security training and promotion will be carried out at least once a year in each unit, such as not to open files from unknown sources, not to install unknown programs, not to link to websites arbitrarily, etc., in order to enhance the ability of users in each unit to identify information security and develop good operating habits.

Regular simulated information system intrusion disaster recovery drills are conducted, and the results are reviewed. When necessary, the original management processes are revised and necessary facilities are added to reduce the risk of unauthorized intrusion into the information system.

Starting from 2019, due to the impact of the pandemic, the increased use of video conferencing software has introduced additional information security risks. The Company has implemented the following controls:

- 1.Tracking Video Conferencing Software Vulnerabilities: Given the advancement of hacker technologies, vulnerabilities in video conferencing software are continuously exploited. Therefore, the Company regularly tracks related vulnerability news to ensure the installation of the latest patched versions.
- 2.Usage of Video Software: The Company primarily uses Cisco Webex video conferencing software with end-to-end encryption. Other video software can only be downloaded and used after obtaining approval unless deemed necessary.
- 3.Employee Computer Usage Security: To maintain operating system security, mandatory password control is enforced when logging into computers. Personal computers and terminal hosts are equipped with antivirus software and regularly updated virus definitions.
- 4.Connection Encryption Protection: For video conferencing software connections, encryption and key methods are used to establish encrypted channels when connecting to the enterprise intranet, ensuring data security and protection.
- 5.High Information Security Awareness and Prevention: Enhanced overall company information security awareness is achieved through the FBT Digital Learning Platform, advocating relevant information security policies, implementing security measures and processes.

### Highlights

In 2022,  
15 suppliers  
signed the  
“Green  
Declaration..”

92.9%  
of the  
“Corporate Social  
Responsibility  
Statement”  
was signed.

Approximately  
87.60% of  
total purchases  
were from  
domestic suppliers.

Customer  
satisfaction  
reached a score of  
75 or above  
in 2022.

13 patent  
applications for  
intellectual  
property were  
approved  
in 2022.

## 3.1 Customer Service Management

### Customer Relations Management Management Policy

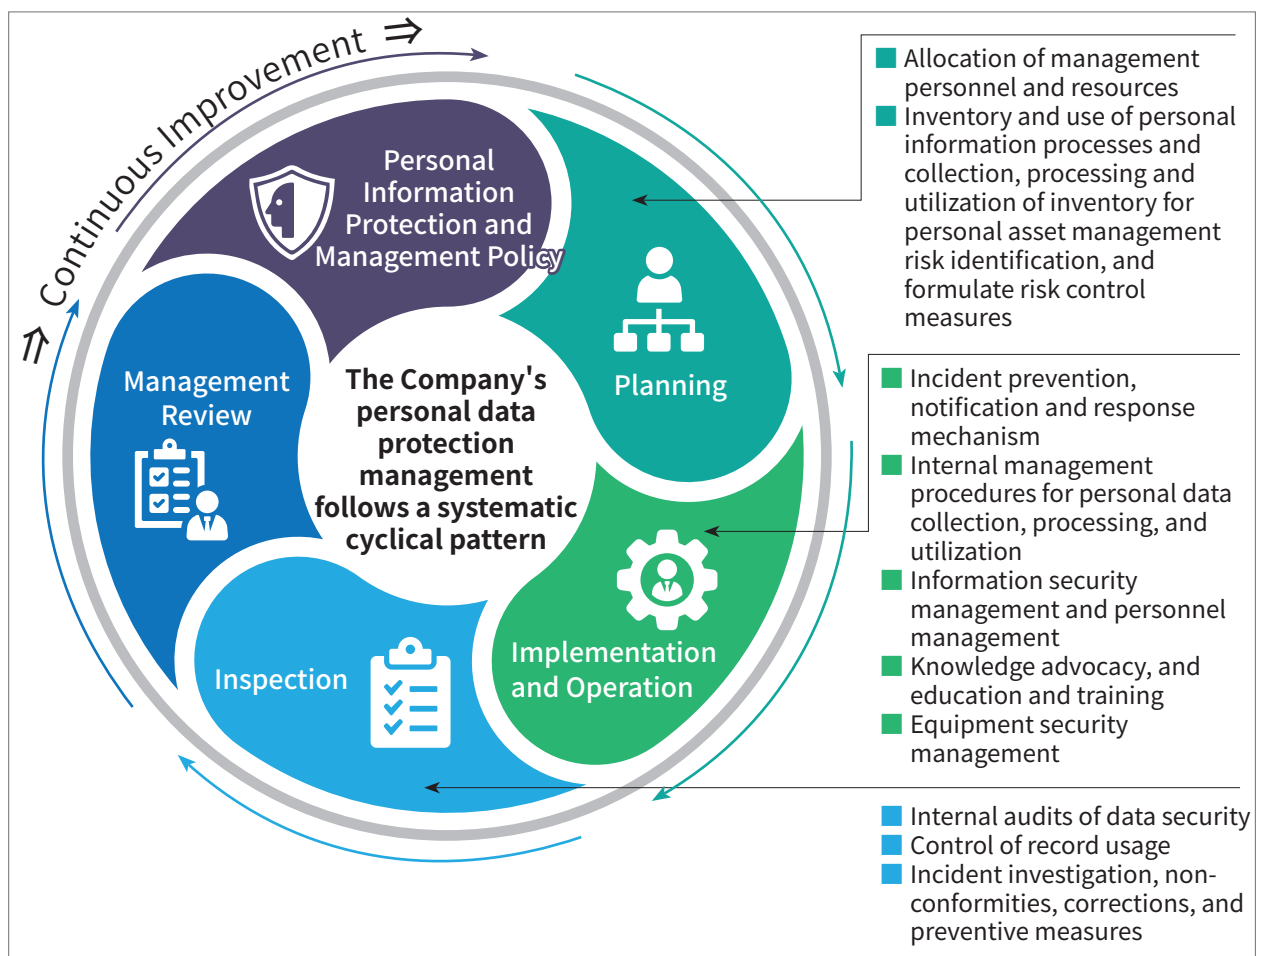

Item	Description	Content
<b>Material Topics and its Boundaries</b> 	Reason for the materiality of this topic	Company's core values: Customer satisfaction, service integrity, proactive accountability, professional innovation, and inclusive growth. The main products are blanking components for automotive and motorcycle parts, with operations based on the IATF 16949 quality management system. The Company is committed to customer relationship management to enhance product and customer service, thereby improving customer satisfaction.
	Boundary for this topic	Customers/Clients (business conduct impact)
	Limitations of disclosure within this boundary	This annual report will disclose information related to customer relationship management from Taiwan headquarters and overseas operating locations.
<b>Management Approach and Its Components</b> 	Management objectives for this topic	To effectively manage the Company's customer and product service processes and become a trusted provider of technology and capacity for customers.
	Policy	Following the quality policy of the IATF 16949 quality management system: Do it right the first time, satisfying both internal and external customers.
	Commitments	The Company commits to the execution requirements of the IATF 16949 quality management system, pledging not to accept, manufacture, or distribute defective products, and aims to provide products and services that satisfy customers.
	Goals and Targets	Each department of the Company sets annual goals based on the balanced scorecard's four management perspectives (financial/customer/internal processes/learning and growth). Specific, measurable, and quantifiable control indicators are proposed for quality policies and commitments to effectively monitor various management activities. The consolidated revenue target for 2022 is NT\$2,723,037,000.
	Responsibility	<ol style="list-style-type: none"> <li>1. Led by the President, cross-functional teams including the Department of Business Management and customer representatives provide high-value products to customers when introducing new parts to the market.</li> <li>2. The Quality Assurance Department manages the operation of the IATF 16949 quality management system.</li> <li>3. The Management Department manages the operation of various management systems, including ISO 14001, ISO 45001, and ISO 50001.</li> </ol>

## 3.1 Customer Service Management

Item	Description	Content
	Resources	<ol style="list-style-type: none"> <li>1. The Company assigns management representatives for various systems, establishes promotion committees for various management systems composed of department heads and employee representatives, and continues to promote the operation of various management systems such as IATF 16949, ISO 14001, ISO 45001, and ISO 50001.</li> <li>2. Major customers appoint managers as customer representatives. Cross-functional teams are formed for product development, procurement, production, and quality assurance management processes according to product requirements.</li> </ol>
<b>Management Approach and Its Components</b> 	Grievance Mechanism	The Company has established the “Customer Service and Complaint Handling Management Regulations,” which define the process for customers to lodge complaints through various channels, such as face-to-face discussions. The process includes prompt response, negotiation for correction and prevention, tracking and closure, and providing timely updates on customer progress and timelines.
	Specific Actions	<ol style="list-style-type: none"> <li>1. To provide better service to customers in terms of previous mold development, FBT has developed an AI mold system, which offers customers references for mold designs in new product development. This system aims to save development time and costs by reusing previously developed molds.</li> <li>2. In 2020, based on a material flow cost accounting recommendation, the design of the brake disc was modified to include wider material dimensions and a multi-cavity design analysis for the blanking disc. This modification aimed to lower material costs and create a competitive advantage for the company.</li> <li>3. Promotion of FBT's self-developed smart disc to enhance the value of customer products.</li> </ol>
<b>Evaluation of the Management Approach</b> 	Management Assessment Mechanism	Monthly regular management meetings are held by executives at level 1 and above to conduct performance reviews for the current month.
	Results of Management Policy Evaluation	<ol style="list-style-type: none"> <li>1. In 2022, the consolidated revenue achieved was NT\$3,141,305,000, with an achievement rate of 115.36%.</li> <li>2. Specific actions such as the Mold AI System and the design of multi-cavity blanking discs have been implemented and promoted to customers. The smart disc was launched at the Vietnam operational site in May 2022, while the Taiwan operational site introduced the smart disc for electric vehicles in the second half of 2022 and will be launched for gasoline vehicles in July 2023.</li> </ol>
	Management Policy Adjustments	<ol style="list-style-type: none"> <li>1. Continuously promote the operation of various management systems such as IATF 16949, ISO 14001, ISO 45001, and ISO 50001 to meet customer needs.</li> <li>2. In the future, there will be ongoing collaboration with customers in developing various products. Market demands and order frequencies will be monitored and statistically analyzed to proactively remind customers of their ordering requirements and any changes in quantity variations. Internally, efforts will be made to enhance the production line changeover mechanism to align with customer scheduling needs and capacity requirements, aiming to become the preferred choice for customer cooperation.</li> </ol>

### 3.1.1 Customer Relationship

Customer trust has always been one of the core values of the Company. The trust between the Company and customers is one of the main reasons why many customers entrust their product manufacturing to us. Therefore, in terms of customer data protection, the Company established the Personal Data Protection Task Force (referred to as the Data Protection Task Force) in May 2014. The members consist of employee representatives from various departments, responsible for formulating personal data protection policies. Each year, we conduct regular personal data inventory, risk assessment, internal audits, and evaluations. In case of customer or personal data complaints, after the responsible unit supervisor fills out the “Personal Data Incident Report and Handling Form,” the Data Protection Task Force conducts subsequent assessment, tracking, and verification before passing it to management representatives for approval in the next management review meeting. Complaints from customers or the provision of customer personal data are both protected through the aforementioned measures to ensure the security of customer personal data. In 2022, there were no incidents of information leakage, theft, or loss of customer data, nor were there any incidents of customer complaints or disputes.

## 3.1 Customer Service Management

Regarding customer relationship services, the explanations are as follows:

### ● Early-Stage Development Services

To provide comprehensive customer service, we have developed a DISK (Disc Brake) Mold AI system. This system takes customers' past development parts molds and utilizes AI to simulate and arrange more combinations. It assists customers in initial design development, facilitates technical exchange during design, and helps generate more design possibilities. Once confirmed for use, this system can save subsequent mold costs and shorten development time. This approach allows us to evolve from being a contract OEM manufacturer, to being a reliable provider of technology and production capacity, becoming an essential partner for our customers' success. Furthermore, comprehensive protection is provided for customer mold development data.

To provide customers with the best service, in 2020, FBT promoted the development of a high-value CP patent product, the smart disk mold, to customers. This involved combining single-disc brake parts and timed discs through molds and production technology to present parts in a smart (A+B) disc format. This approach significantly reduces customer assembly time and labor costs. The smart disc was introduced at the Taiwan operational site in the second half of 2022 for electric vehicles and will be launched for gasoline vehicles in July 2023. The smart disc was introduced at the Vietnam operational site in May 2022.

### ● New Product Development Services

The Company keeps track of the schedule for introducing new customer-developed parts to the market, monitors market demand and order frequencies, and promptly informs customers of their ordering requirements and any changes in quantity variations. Internally, the mechanism for changing production lines is improved to meet customer scheduling demands, allowing customers to save more assembly time and waiting time. FBT aims to become the preferred choice for customer cooperation.

An annual customer visit plan is established, with at least four visits per month, to keep track of customer needs and market conditions.

Initial stage of product development: The Company formulates internal customer service measures based on customer needs, as follows:

1	Progress of feedback evaluation of initial stage of product development: In-house production: 3 days, Outsourced production: 7 days.
2	Periodic cross-functional team meetings are held to confirm risks of new development products, evaluate new development product performance, and design processes. ISO 14001, ISO 45001, and ISO 50001 are taken into consideration.
3	Implement FAI analysis to increase material utilization rate, reduce development costs, and meet customer needs.
4	Utilize standardized mold development techniques to shorten mold development time by approximately 5%.
5	Development status: The success rate of new development project quotations in 2022 was about 50%.

In conclusion, these services collectively contribute to shortening the customers' product development and mass production time.

## ● Quick Order Service

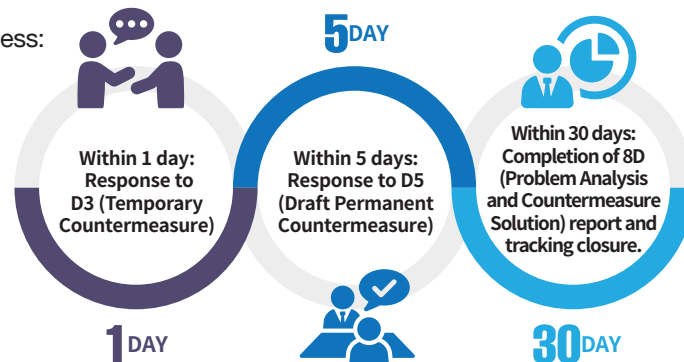

The Company consistently monitors customer market trends, demands, and order frequencies, and promptly informs customers about changing order requirements and quantity variations. Especially in 2022, due to the impact of the COVID-19 pandemic, the market experienced demand shocks for raw materials and increased preventive demand orders. In response, FBT prepared material stocks based on customer forecasted demands and followed a seasonal procurement approach. We provide continuous feedback to customers on material stock statuses and make adjustments accordingly. By maintaining a high level of attention to customer demands, the impact of these fluctuations is greatly reduced, ensuring customer needs are met. Internally, we enhance the mechanism for changing production lines to meet customer scheduling demands. Therefore, we set a target for order response rate: 100% feedback within 48 hours to meet customer order requirements.

## ● Customer Feedback and Interaction

Our customer relationship services cover early-stage development services, new product development services, and quick ordering services. We continuously improve our services throughout each product's development and production stages, keeping pace with customer preferences and needs to enhance customer loyalty.

Details of customer feedback and interaction are as follows:

### 1.Customer Complaint Feedback Process:

2.Four customers (AUTOLIV, KYMCO, PPN, YAMAHA) provide monthly evaluation feedback. If the evaluation criteria are not met, countermeasure actions will be taken promptly, involving relevant units in improvement efforts and providing feedback to customers.

3.Revenue from new development products: developed product accounted for 3.5% of total revenue in 2022.

## ● Product Safety Assurance

For manufactured products, a self-inspection station is established for quality control at the beginning and end of the manufacturing process. In addition, finished products undergo confirmation by quality personnel before leaving the factory to ensure quality control before shipment. Consequently, in 2022, there were no significant quality issues or recalls.

## 3.1 Customer Service Management

### 3.1.2 Customer Satisfaction

The Company is committed to providing the best customer service, we firmly believe that customer service is key to consolidating customer satisfaction and loyalty. In 2022, FBT developed a smart disc production technology, reducing production and labor costs for customers. This achievement was highly praised by domestic automakers and adopted for use in the market. This not only enhanced customer satisfaction through new technology but also attracted new customers and strengthened customer relationships, exerting a significant impact. At the Taiwan operational sites, in accordance with the “Customer Satisfaction Management Method,” questionnaires are sent to customers in June each year to conduct surveys regarding four aspects: quality, cost, service, and delivery time. Each aspect has a maximum score of 25, with satisfaction standards set at: 20, 15, 20, and 20 points, respectively. The total maximum score is 75 points. In 2022, a total of 16 questionnaires were collected, with a cumulative score of 79.69 points. All indicators were met. The global impact of COVID-19 disrupted supply chains, causing demand shocks for raw materials and increased precautionary orders, which slightly affected the delivery and cost evaluations in 2022 compared to 2021. The Company remains committed to enhancing customer satisfaction to meet customer demands.

The results of the customer satisfaction survey are shown in the chart below.

#### ▪ Satisfaction Survey Annual Average

The two largest customers of the Vietnam operational sites: NISSIN (NBV) and HONDA (HVN). The customer system provides monthly ratings based on customer needs, and the ratings were 100% in 2022.

For our China operational sites, the customer system actively rates the satisfaction of our customers based on service, quality, and delivery time every month, and the score for 2022 was over 90 points.

Evaluation of the Management Approach 	Management Assessment Mechanism	Monthly regular management meetings are held by executives at level 1 and above to conduct performance reviews for the current month.
	Results of Management Policy Evaluation	<ol style="list-style-type: none"> <li>1. Achieved a 100% development, design change, and sample submission rate for 2022.</li> <li>2. Results of specific actions in 2022:               <ol style="list-style-type: none"> <li>(1). Provided 13 products with the best cost-to-performance ratio in 2022.</li> <li>(2). Obtained 13 patents in 2022, accumulating a total of 62 patents acquired by Taiwan and China operational sites.</li> </ol> </li> </ol>
	Management Policy Adjustments	<ol style="list-style-type: none"> <li>1. Continuously promote the operation of various management systems such as IATF 16949, ISO 14001, ISO 45001, and ISO 50001 to meet customer needs.</li> <li>2. In the future, we will continue to collaborate with customers to develop various products and apply for patents through self-research and development. Our goal is to become the most trusted business partner for customers.</li> </ol>

### 3.2.1 Intellectual Property Right Protection

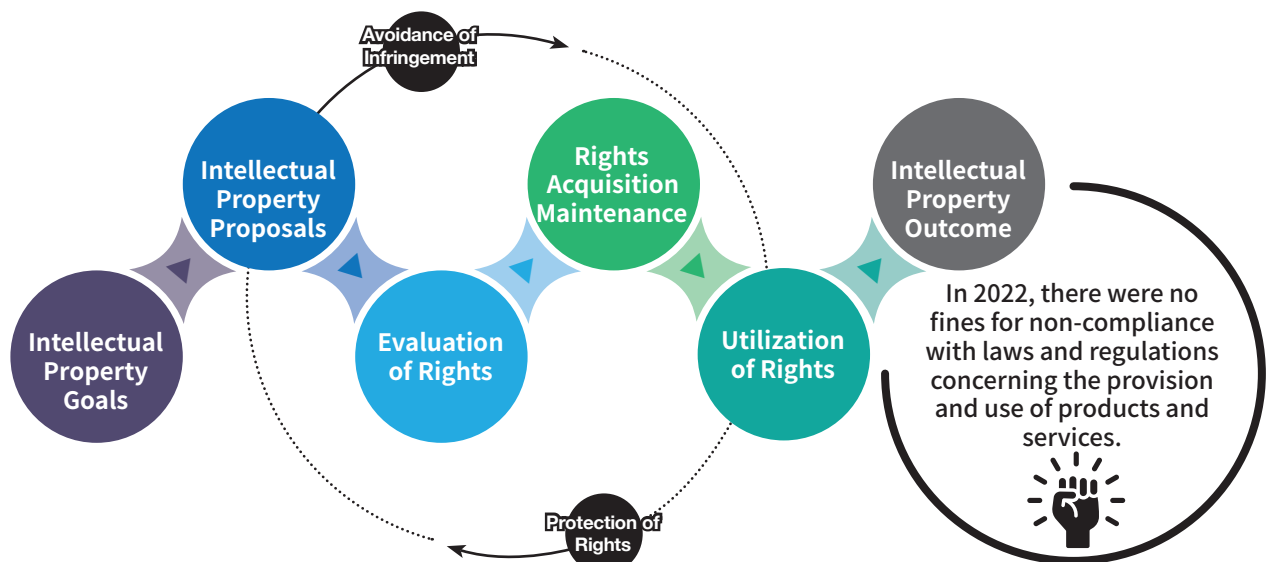

#### Innovation R&D and Advanced Technology

In response to technological trends, consumer and customer demands, and global trends, FBT has been actively engaged in innovative research and development in recent years to break through the status quo. We emphasize strengthening intellectual property rights, encouraging "innovation," owning "patents," and creating competitive advantages. We aspire to leverage our existing strengths as a preferred global business partner for customers when purchasing automobiles, motorcycles, and bicycles.

In terms of intellectual property achievements and patent development, the Company obtained two patents in 2012. In 2017, 2 patents were granted. In 2018, 8 patents were granted. In 2019, 4 patents were granted. In 2020, 5 patents were granted. In 2021, 3 patents were granted. In 2022, 1 patent was granted. We will continue to pursue various innovations and apply for patents.

By 2021, the China operational sites had accumulated 25 patents, and in 2022, it acquired 12 certificates. We will continue to pursue various innovations and apply for patents.

## 3.2 Technology and Innovation R&D

### 3.2.2 Innovation R&D Process

FBT has established a comprehensive development and technological advancement process to provide products that meet customer expectations. The Company meticulously records ideas, data, technology, and issues related to project development to ensure that customer needs are fully realized, while the valuable experience gained is preserved. The design and development data and experience are precious assets for FBT as they represent our commitment to customers, shareholders, and employees.

In 2022, the production of smart discs as single brake discs and timing disc combinations increased material utilization, reduced development costs, and met customer demands. Simultaneously, it decreased material usage and greenhouse gas emissions. In 2022, the total shipment of smart discs from the Vietnam operational sites was: 73,633 PCS, reducing material usage by 43,021 KG. For the Taiwan operational sites, the total shipment in 2022 was: 12,906 PCS, reducing material usage by 2,525 KG. We will continue to introduce new products and styles.

The Taiwan operational sites shared molds for brake pad blanking discs, saving material usage and processing time and effectively reducing greenhouse gas emissions. In 2022, a total of 154,262 PCS of multi-hole blanking discs were processed, increasing material utilization by 5% and saving 8,098.85 KG of material. The 2022 product benefits from “reducing emissions” at the Taiwan operational sites totaled a reduction of 11,243.85 KG of steel.

The Company employs diverse product packaging methods to prevent pollution and increase resource recycling. Some products are shipped using trolleys, with cumulative shipments of 111,174 PCS in 2022 and 100% packaging material recycling.

Ferrous, stainless steel, aluminum, and plastic components sold to customers by FBT can all be recycled and reused. Therefore, the percentage of recyclable products sold by the Company in 2022 was 100%.

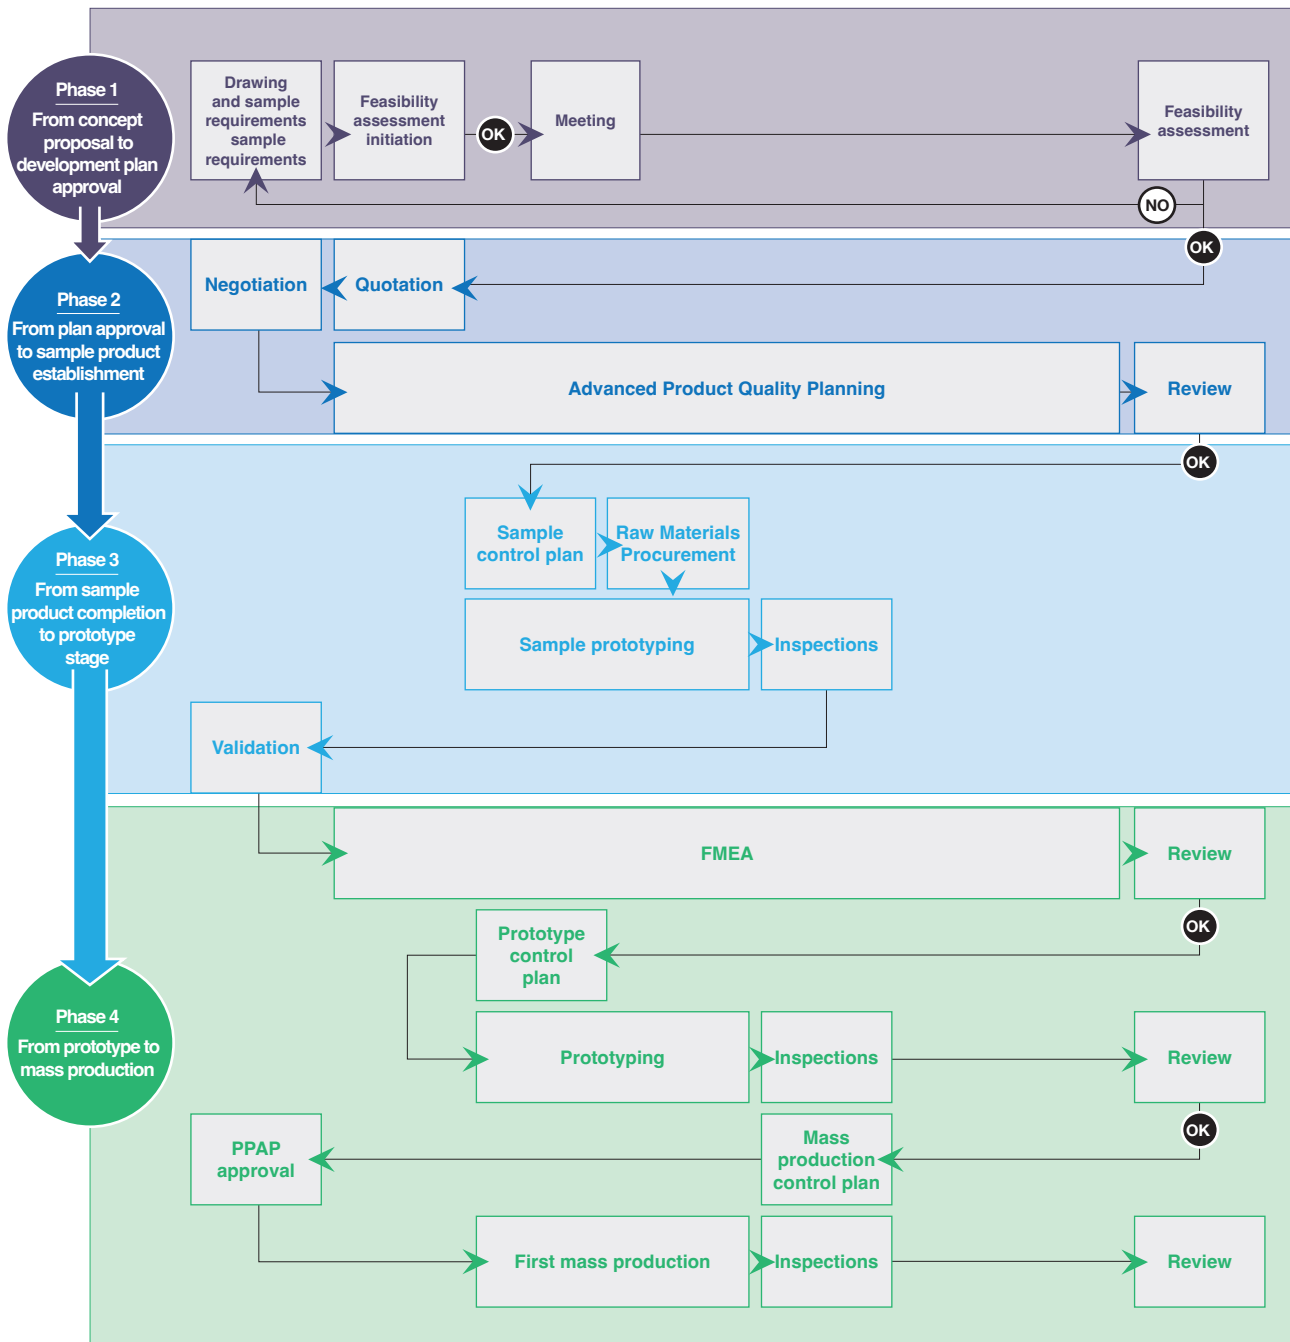

The Company’s products, which are metal structural components in the automotive supply chain, cannot directly influence increased fuel efficiency or emission reduction in automobiles and motorcycles.

In 2022, larger stamping products generated scrap iron, which was recycled to produce smaller stamping products. A total of 90,186 PCS (106,816 KG) were processed, generating revenue of NT\$74,373,000. The percentage of recycled or remanufactured materials used is  $106,816 \text{ KG} / \text{total production weight of } 7,829,600 \text{ KG} = 1.36\%$ .

## ■ Innovation R&amp;D Process: Advanced Product Quality Planning (APQP)

## 3.2 Technology and Innovation R&D

### 3.2.3 Product Responsibility

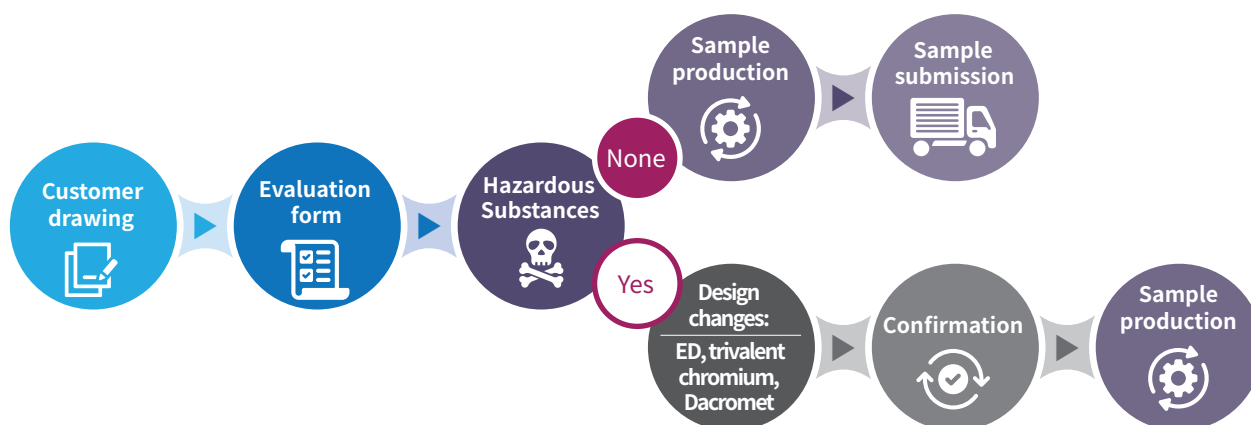

#### ● Initial Development Assessment

The escalating environmental pollution has become the most significant issue faced by global citizens. With the rise of environmental awareness and demands, countries around the world have begun to control various substances harmful to humans and the environment. Various assessment legislations have also been enacted to protect the environment. In response to environmental protection trend, the Company requires the use of trivalent chromium plating processes for outsourced electroplating. This is to reduce the use of toxic chemicals and comply with the European Union's Restriction of Hazardous Substances (RoHS) and REACH regulations, including RoHS2.

In 2022, the total shipment quantity of externally processed surface treatment products was 208,610 PCS. Currently, all 208,610 PCS comply with RoHS and REACH, including RoHS2, accounting for 100% of the total.

During the development or prototype phase, the Company adheres to the "Advanced Product Quality Planning and Control Plan Management Procedure." Environmental considerations are taken into account during product development and design. The customer's drawings are reviewed for environmental requirements. If not present, the Company recommends modifications such as ED (black ED coating), trivalent chromium, Dacromet (also known as Dacrotizing, zinc-chromium coating, etc.). In 2022, a total of 14 development items were assessed. There were 6 items with black ED coating, 2 with Geomet, and the remaining 6 items did not require surface treatment. 100% of the items requiring surface treatment comply with the European Union's RoHS and REACH RoHS2 regulations.

FBT focuses on the RoHS 2.0 regulations. During the process assessment and development stage, environmental considerations are the guiding principles. The Company avoids using raw materials containing harmful substances in the process, ensuring that the produced products comply with international regulations and customer requirements.

## 3.3

## Supplier Sustainability Management

## GRI204 Procurement Practices Management Policy

Item	Description	Content
<b>Material Topics and its Boundaries</b> 	Reason for the materiality of this topic	<ol style="list-style-type: none"> <li>1. In the future, suppliers will be requested to sign "CSR Corporate Social Responsibility Declaration" and "Green Declaration" to fulfill their responsibilities as global citizens.</li> </ol>

### 3.3.1 Procurement Policy

The Company's main products are OEM blanking components for automobile and motorcycle. The primary supply chain involves metal-related products. There was no significant change in the collaboration with around 600 domestic and international suppliers in 2022 compared to 2021. These suppliers are categorized as raw material suppliers, outsourced processing suppliers, equipment purchasing suppliers, tool and fixture suppliers, contract manufacturers, administrative suppliers, and others.

#### Domestic and international suppliers percentage in 2022

ote: The percentage of other suppliers is below 0.1%, so they are not shown in the chart.

### 3.3

## Supplier Sustainability Management

The Company's procurement strategy prioritizes selecting domestic Taiwanese suppliers to reduce transportation costs, carbon emissions, and risks, while also aiming to support local industries, create employment opportunities, and stimulate the domestic economy. However, some raw materials and equipment with specific characteristics cannot be sourced from domestic suppliers and must be procured from foreign manufacturers. According to the statistics based on the system entry date, domestic procurement accounted for approximately 87.60% of the total procurement amount in 2022, while foreign supplier procurement accounted for around 12.40%. Furthermore, the proportion of domestic procurement each year has remained above 85% from 2020 to 2022.

#### ▪ Percentage of domestic and international procurement from 2020 to 2022

The procurement of machinery, equipment, materials, products, and personnel protective gear by the Company follows the "Fixed Asset Management Regulations," "Supplier Selection and Assessment Management Regulations," "Material and Component Procurement Management Guidelines," and references the Ministry of Labor's "Procurement Management Technical Guidelines," and customer requirements on "Substance s of Concern Management Specifications.". This ensures compliance with regulations related to machinery and equipment safety protection, Restriction of Hazardous Substances (RoHS), Safety Data Sheets (SDS), energy consumption standards announced by the Ministry of Economic Affairs, qualifications of environmental safety and health testing companies, and other professional technical service requirements, all aligned with the needs of various environmental and safety management systems.

As a member of the automotive and motorcycle supply chain, the Company uses the IATF 16949 global automotive quality management system as the basis for its product manufacturing processes. Additionally, due to customer requirements within the entire automotive and motorcycle supply chain to sign declarations against the use of hazardous substances, suppliers are also encouraged to emphasize and promote this activity. In 2022, 15 suppliers signed the "Green Declaration," and this initiative will continue to be promoted to reduce environmental impact.

### 3.3.2 Supplier Evaluation and Management

The Company has established the “Supplier Selection and Assessment Management Regulations” and “Supplier Initial and Periodic Audit Management Regulations” to assess products, environmental and social responsibility, and human rights. The selection and assessment process for suppliers is as follows:

**Supplier Qualification:** If the assessment results of the supplier and the sample test report provided by quality assurance are both qualified, and the qualified third-party auditors complete the “Supplier Initial Assessment Form” during the audit, with the conclusion being qualified, then procurement can list the supplier as an approved supplier for the desired product. New suppliers need to sign the “Supplier Corporate Social Responsibility Statement,” formulated by the Company as part of its sustainable supply chain initiative. The Statement covers the following points:

Compliance with Regulations	Adhere to international and government regulations related to labor, environment, safety, and health.
Employment Freedom	Ensure all work is voluntary and refrain from employing staff through coercion or mandatory conditions.
Labor Rights	No child labor, no physical punishment, abuse, or coercive treatment of employees. Equal treatment and opportunities for employment, compensation, training, promotions, dismissal, and retirement, irrespective of race, nationality, social origin, social status, lineage, religion, physical disabilities, gender, sexual orientation, family responsibilities, marital status, union membership, political views, age, or other forms of discrimination.
Compensation and Benefits	Strictly comply with international and government wage laws, and transparently disclose various company management aspects to employees.
Health and Safety	Promote a healthy, safe, and clean working environment for employees.
Environmental Protection	Promote waste reduction, garbage sorting, and contribute to international efforts and promotion of the protection of the earth's environment.

## 3.3

## Supplier Sustainability Management

Communication Mechanism	Establish internal and external communication channels. Encourage communication and direct participation between employees and management. Display company policies regularly through the company website or bulletin messages.
Ethical Standards	Conduct business operations and employee behavior according to the highest ethical standards. Prohibit any form of bribery, corruption, deception, and other improper behavior. Respect and protect customer information, ensuring the confidentiality and security of information.
Intellectual Property	Respect and protect any technology, expertise, documents, and data belonging to international clients. Employees and suppliers should sign relevant confidentiality agreements to ensure the confidentiality and security of company and customer information.
Promotion and Participation	The Company actively participates in government and community activities, encouraging relevant partners to jointly promote corporate social responsibility through audits or advocacy.

Additionally, all suppliers of the Company contribute positively to the environment, human rights, and society. At the end of each year, a “Supplier Questionnaire Survey” is issued, requiring suppliers to complete the survey.

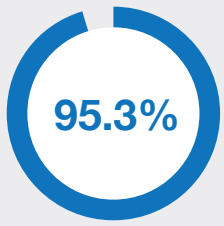

In 2022, the Company’s organizational size, structure, ownership, and supply chain did not undergo any significant changes. There were 42 new suppliers that complied with environmental, human rights, and social standards and completed the initial supplier assessment, corporate social responsibility statement, and supplier questionnaire survey. The Company will continue to promote sustainable supply chain practices among its suppliers.

Among the 42 new suppliers in 2022, 39 out of 42 (92.9%) confirmed compliance with environmental and social standards through the “Corporate Social Responsibility Statement” and the “Supplier Questionnaire Survey.” The remaining 3 suppliers completed this process in January 2023, reaching a 100% confirmation rate.

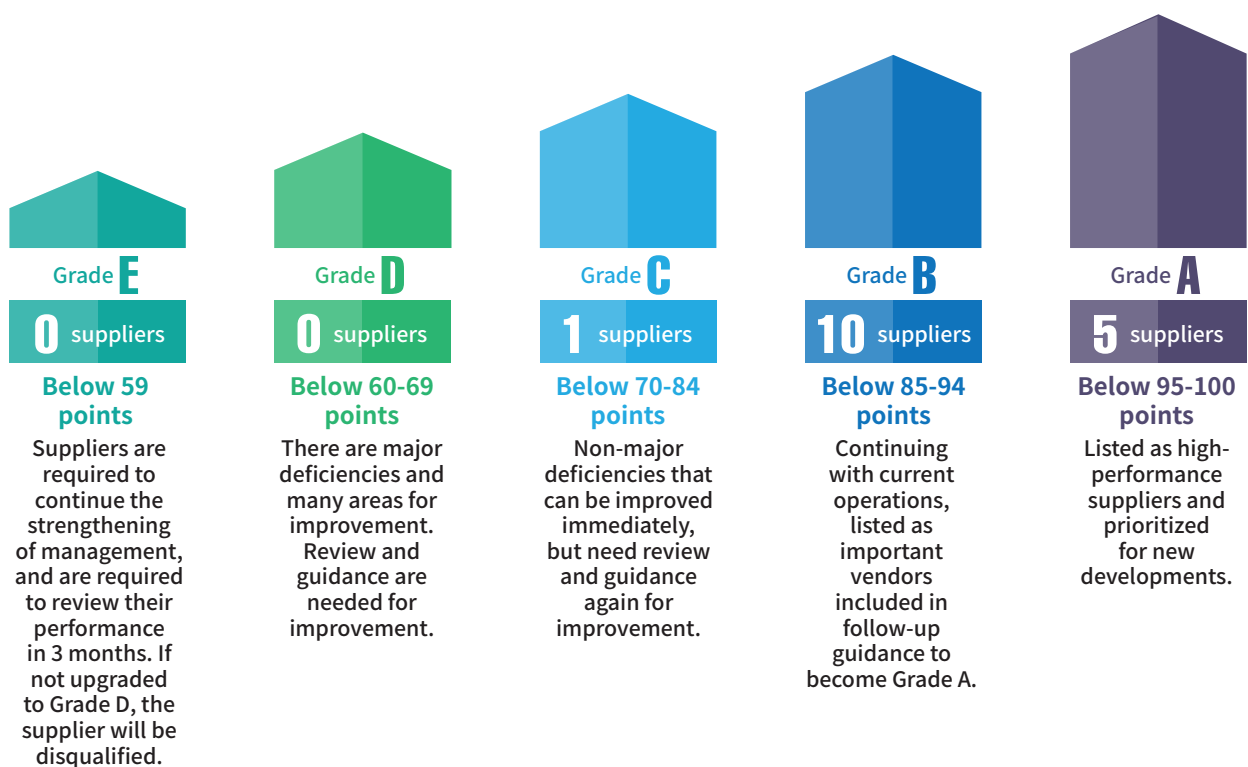

Existing suppliers sign a corporate social responsibility declaration and undergo an annual supplier questionnaire survey, which includes issues related to potential violations or significant threats to freedom of association and collective bargaining, child labor, and forced or compulsory labor. During regular supplier audits, the items in the supplier questionnaire survey are reviewed on-site. In 2022, no suppliers were found to violate human rights norms. According to the “Supplier Selection and Assessment Management Regulations,” the frequency of the supplier questionnaire survey is determined based on transaction amounts and the impact of sustainability. In 2022, a total of 86 suppliers were eligible for the survey, and the response rate to the supplier questionnaire survey was 95.3%.

#### Completion Rate of Supplier Statements and Questionnaires in 2022

Year	Item	Content	New Vendors	Status	Number of Vendors	Response Rate
2022	Number of new transactional suppliers added by Fine Blanking & Tool Co., Ltd.	Supplier Corporate Social Responsibility Statements	42 suppliers	Responded	39 suppliers	92.9%

Year	Item	Content	New Vendors	Status	Number of Vendors	Response Rate
2022	Number of transactional suppliers of Fine Blanking & Tool Co., Ltd.	Supplier Questionnaire Survey Form	86 suppliers	Responded	82 suppliers	 95.3%

Regular audits and evaluations are conducted for suppliers, using the audit items in the “Supplier Daily Audit Form” to conduct the evaluation and review the evaluation grade. In accordance with the “Supplier Initial and Periodic Audit Management Regulations,” if a supplier is evaluated to be an E-grade supplier, members of the Company’s cross-functional teams will request the supplier to continue to strengthen its management. The supplier will be re-audited after three months to address the audit deficiencies and the supplier must be improved to an acceptable level to achieve the standard of a qualified supplier, and then the supplier will be allowed to continue to undertake manufacturing and outsourcing. In 2022, there were 5 suppliers in Grade A, 10 suppliers in Grade B, 1 supplier in Grade C, 0 suppliers in Grade D, and 0 suppliers in Grade E.

### 3.3

## Supplier Sustainability Management

Supplier annual routine evaluation procurement at the end of each year will focus on safety/regulatory requirements (10%), supplier performance (50%), quality management system certification level (10%) and customer designation (30%) to determine the form and frequency of the annual audit plan, to take place at the supplier site to re-evaluate and review whether to continue to work with or wait for the opportunity to phase out the supplier. The total number of suppliers audited under the annual supplier audit plan from 2020 to 2022 was 16, 14, and 15, respectively with audit scores above 70, and their average assessment scores from 2020 to 2022 were 85.2, 87.7, and 90.2, respectively, with the contents of the reevaluation to be revised to include the environment and social; aspects from 2020 onwards. The Company's auditing and guidance of suppliers is ongoing, and the Company will continue to improve its performance year after year through continuous supplier guidance.

#### 2020-2022 Average Assessment Score for Suppliers

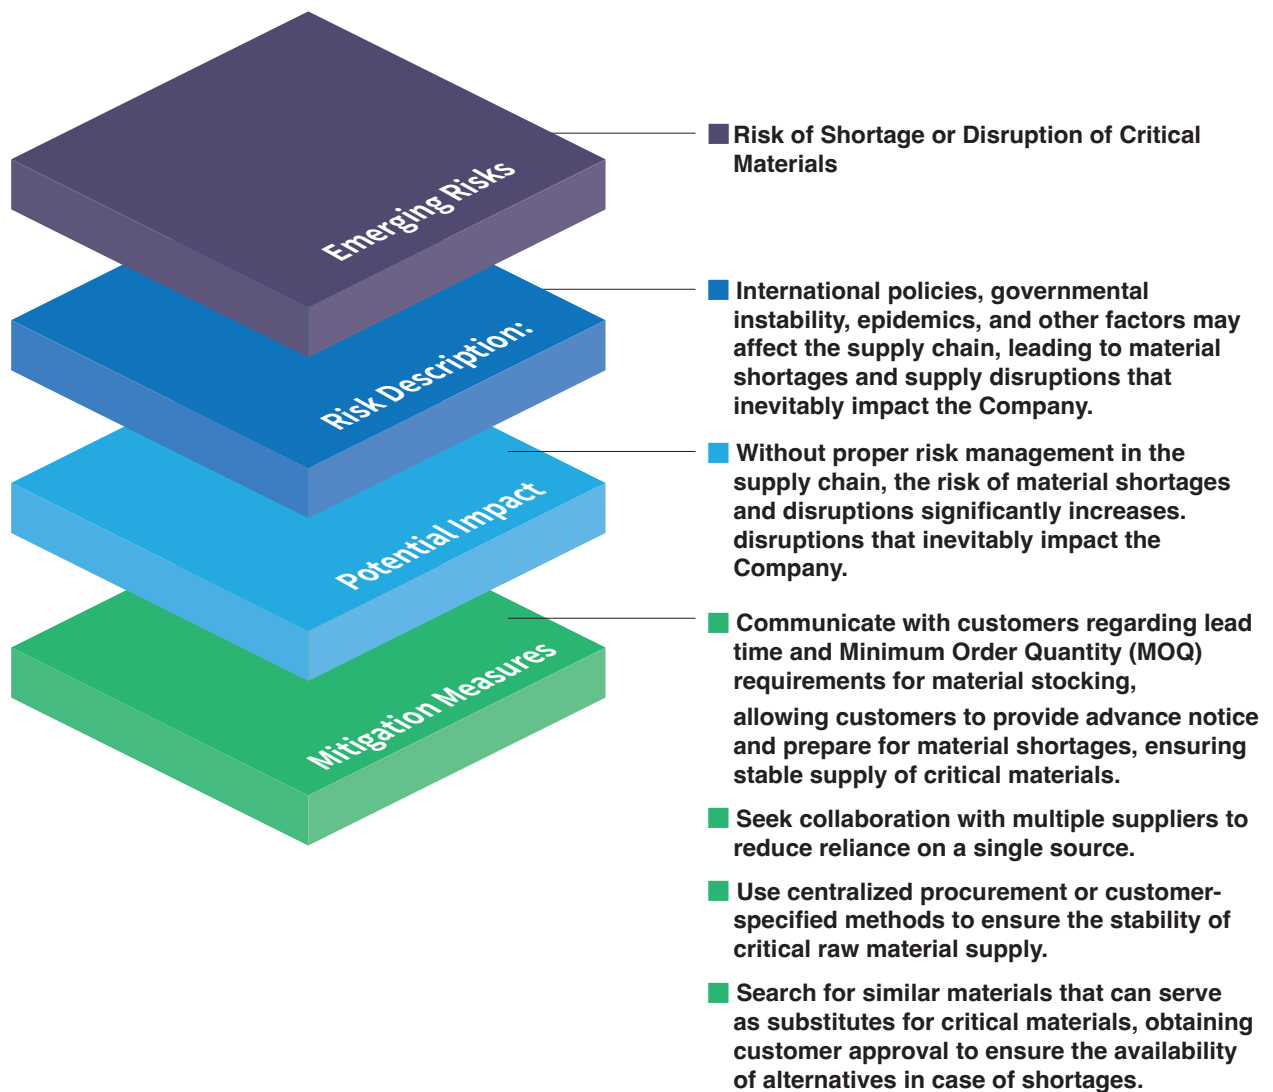

#### Mechanism and Framework for Supplier Audit Assistance

### 3.3.3 Risk Management of Critical Materials

In order to address the risks associated with critical materials and their management, FBT has implemented mechanisms for authorized material stocking and alternative supply chains to avoid the impact of material shortages and interruptions caused by political factors, epidemics, and other external influences. Additionally, efforts are made to strengthen the dependency relationships with suppliers to enhance the stability and reliability of the supply chain.

## 3.3 Supplier Sustainability Management

### 3.3.4 Contractor Management

The Company manages contractors based on the “Material and Component Procurement Management Guidelines” and regularly conducts evaluations and assessments of contractors according to the relevant regulations. The procurement process also considers the “Contractor Management Guidelines” and compliance with the Company’s requirements.

For major projects undertaken by contractors, an agreement is organized and regulated in consultation with relevant departments within the company before commencing work. Temporary or repair projects must adhere to guidelines, and contractors must fill out the “Contractor Plant Site Operation Safety Promotion Record” and “Hazard Factor Notification Form,” along with the contractor’s “Work Safety Commitment.” For workers contracted by contractors, if welding work needs to be performed outside the designated safe welding area of the plant site, a “Welding Permit” must be obtained before implementing welding work. The facilities safety management division or contractor fills out a “Special Hazardous Operation Permit” based on the nature of the contractor’s operation, and after review by the Safety Management Office, it is provided to the contractor for inspection at their work site.

Contractors (including raw material suppliers and subcontractors) who need to operate plant forklifts or overhead cranes must provide the operator’s qualification certificate or a copy of their technician’s certificate. The Safety Management Office issues the permit for operating plant forklifts and the permit for operating overhead cranes to the contractor only after these requirements are met.

If a contractor is found to violate regulations or the Company’s safety and health management regulations during their operation, the non-compliant matters should be recorded in the “Contractor Violation Statistics Table” as a basis for evaluating the contractor’s qualification.

knowledge is provided through platforms of communication with the Changhua County Government's Department of Labor Affairs, Chuansing Industrial Park Service Center, and the Company, in order to enhance the safety and health management standards of family members and improve the working environment. In 2021, FBT received certificate of commendation from the Changhua County Government.

Based on Changhua County Government's working environment guidance and improvement promotion plan for small and medium-sized enterprises, the “FBT Occupational Safety Family Operation Meeting - Safety and Health Member Gathering Training” was held on July 27, 2022. Due to the impact of the pandemic, the training was conducted online using the Webex system. A total of 27 participants attended with positive results.

## 3.4 Product Quality Control

### 3.4.1 Product Liability Guarantee

FBT's operational sites in Taiwan, Vietnam, and China are professional precision blanking and automotive component OEMs that have been verified through ISO 9001 and IATF 16949 certifications.

Following the lifting of COVID-19 restrictions, global economic forecasts have generally been revised downward due to the increased inventory resulting from the easing of port controls, causing an oversupply situation in manufacturing. Additionally, the escalating US-China trade war and technology conflicts are driving a trend of forming alliances to find partners, leading supply chains to make forced choices in the future. “Diversification” and “proximity to markets” will become key considerations for future supply chain layouts. Quality requirements must be raised to higher levels to avoid supply chain disruptions and customer complaints. The comprehensive promotion of the Total Quality Management (TQM) concept, continuous review of the rationality and rigor of control plan engineering sheets, simplification and acceleration of inspection processes, will all strengthen the fundamental organizational structure, promoting both vertical and horizontal collaboration within the organizational structure to emphasize the concept that “quality is the responsibility of every employee.” This is achieved through internal promotion driven by the FBT Management System (FMS) improvement task forces, the implementation of TPM Phase III activities, external BSI audits, and more. These efforts continue to enhance product quality, production efficiency, reduce quality costs, and strengthen the Company's quality culture.

## 3.4

### Product Quality Control

#### Quality Management Approach

Item	Responsibility	Division	Management Content	Control Method
Calibration of Gauges and Measuring Instruments	Quality Control Division 1	Internal Calibration	1. Internal calibration of gauges such as vernier calipers, micrometers, scales, etc. 2. Internal calibration of process, finished product measuring instruments, and gauges	Calibration Record Form
		External Calibration	1. Annual external calibration plan for large-scale gauges such as coordinate measuring machines, profile projectors, etc. 2. External calibration plan for testing specialized machines"	Calibration Report
Product Development	Quality Control Division 1	Sampling and Measurement	1. Development of Quality Control Plans (QC), Inspection Standards, and SOP Manuals 2. Full-scale measurement of new machine models 3. Measurement System Analysis (MSA) for gauges 4. Statistical Process Control (SPC) process capability analysis	Measurement Report Analysis Report
		Functional Testing	1. Material spectrum analysis, metallographic microscopy analysis, Vickers and Rockwell hardness testing, etc. 2. Disc durability testing, axial direction curve strength testing, impact testing 3. Salt spray testing 4. Weld penetration depth testing"	Testing Report
		SQA	1. Supplier assessment and evaluation (initial assessment, annual assessment) 2. Supplier project inspection, education, training, and guidance 4. Planning and implementation of IATF internal audits 5. Customer complaint response and tracking"	Audit report issuance 8D Report
Mass Production of Products	Division of Quality Inspection 2	Incoming	1. Inspection of raw materials, materials, and semi-finished products	Incoming Inspection Standards
		Manufacturing Process	1. Process inspection and process capability analysis 2. Review of SOP and process engineering supervision	Process Inspection Standards
		Finished products	1. Finished product shipping inspection 2. Handling and responding to abnormal customer complaints"	Shipping Inspection Standards

The Company's relevant products include manufacturing safety belt buckles and their components, brake discs, one-way bearings, starter gears, seat adjusters (single units and assemblies), steering mechanisms, balance mechanisms, pedals, clutch assemblies, car seats, and motorcycle cushions. These product categories cover safety systems, engine systems, body and interior systems, and transmission systems, all of which are closely related to the safety of people's lives and property.

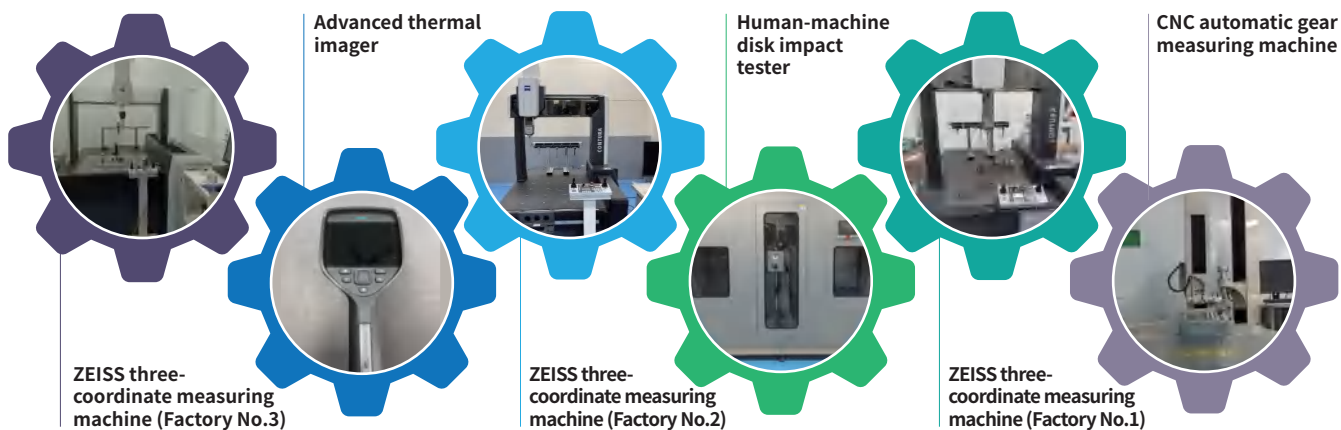

Given that the Company's products fall under the safety components of automobiles and motorcycles, in accordance with the IATF 16949 international quality standard and the critical security requirements (CC, SC) and dimensions of the drawings and specifications required by our customers, we review the failure modes (FMEA) and design the process control parameters from the development stage (APQP). The quality control plan (QC), inspection benchmarks, and standard operating procedures are all extended to the development stage design parameters for control, from material incoming (material analysis), process inspection, shipment inspection and related tests are in accordance with the quality control plan (QC) to carry out stringent quality monitoring. Furthermore, regular testing is conducted for product safety lifecycles (durability testing, high and low-temperature cycling testing, etc.) and compliance with environmental regulations such as REACH and RoHS.

The metrology room utilizes precision instruments for measurement, including the German ZEISS three-coordinate measuring machine, Japanese KEYENCE automatic measuring projector, Japanese Mitutoyo roughness contour combined measuring machine, German SPECTRO spectrometer, OLYMPUS metallurgical microscope, Vickers hardness tester, and other instruments. These ensure that product design and dimensions do not adversely impact product use. Regarding product functionality, the Company's testing laboratory employs specialized testing machines for activities such as hardness testing, tensile strength testing, salt spray testing, temperature and humidity environmental testing, and durability testing. This ensures the fulfillment of the quality commitment of "no acceptance, no production, no distribution of defective products," guaranteeing product safety and consumer protection.

In 2022, we continued to collaborate with domestic and international automotive and motorcycle component customers to meet International Material Data System (IMDS) declaration certification requirements and conflict minerals declarations. Moreover, we are gradually moving towards reduction in carbon emissions and sustainable supply chain management. Through collaboration and communication with suppliers in various engineering phases, ongoing process evaluation and optimization are conducted. Rigorous quality and reliability verification methods are employed, emphasizing seamless integration and refined quality control between upper and lower processes. The goal is to achieve correct and standards-compliant products in one go, meeting customer demands and enhancing customer satisfaction.

The Company adheres to the consistent quality policy of "getting things right the first time, satisfying both internal and external customers." We manufacture products for renowned domestic and international automobile, machinery, and bicycle supply chain manufacturers. Through the measurement of precision instruments in the measuring room, the inspection of specialized testing machines and the professional third impartial units (such as the Metal Industries Research & Development Centre, Plastics Industry Development Center, Automotive Research & Testing Center, SGS Taiwan...) all conform to customer requirements, ensuring that products comply with safety standards and international environmental regulations. In 2022, the Company has insured its final market products with product liability insurance for USD 7,929 thousand to enhance consumer protection. Furthermore, there were no violations of regulations regarding the health and safety impacts of products and services during their life cycle, as required by sales markets and customer requirements. There were no product recall incidents caused by product safety in 2022.

## 3.4 Product Quality Control

### 3.4.2 Improvement Activities

Since 2017, FBT has initiated the FBT Management System activities for the purpose of sustainable development and continuous improvement. These activities incorporate TPS, TPM, TQM, and customer requirements. Through internal units proposing improvement proposals every six months, improvement activities are promoted in a circular manner. Experienced consultants are also engaged to assist and guide the progress of these improvement activities.

Outstanding teams are selected from internally proposed improvement activities to represent the Company in the Taiwan Continuous Improvement Award. In 2022, the Manufacturing Division 3 and Machinery Division jointly formed a team named “Breakthrough Circle.” With the theme of “Enhancing the Productivity of FB Tongue,” they received the Golden Tower Award in the autonomous improvement category.

The proposed product for this initiative is the most critical component in the safety belt system structure, the tongue. The tongue, along with the buckle, forms a three-point restraint that provides effective protection in emergency situations. Through the establishment of a cross-functional team, issues related to productivity and process defect rates were addressed. Problems and manufacturing bottlenecks were identified, and root cause analysis was conducted from the perspectives of people, machines, materials, and methods. The principle of three realities (Sangen) was employed for validation, confirming the viability of root causes and improvement strategies. Finally, molds were designed to consolidate the manufacturing process, resulting in a significant increase in productivity and a reduction in failure rates. Integration between upper and lower processes was undertaken to minimize engineering waste and losses, reducing labor and product inventory costs. This also meets the principles of the Toyota Production System (TPS).

Since participating in the National Solidarity Circles Competition for the first time in 2017, FBT has continuously achieved the highest honor of the Golden Tower Award in the Self-Strengthening Section. This recognition from the judges has not only bolstered team confidence but also showcased FBT’s commitment and determination in promoting “continuous improvement.” Starting in 2021, FBT has risen to a higher level of solidarity circle challenges in the national competition, gaining high praises from the judges. In the years ahead, FBT will uphold the spirit of continuous improvement, further enhancing organizational functionality, increasing production efficiency, and reducing costs, to lead the company toward a more sustainable future.

	Results of Management Policy Evaluation	<ol style="list-style-type: none"> <li>1. Since 2015, greenhouse gas inventory has been conducted based on ISO 14064-1:2006. Third-party verification organizations have been engaged annually to verify and obtain verification statements.  Starting from 2020, estimates for Category 3 and Category 4 emissions were made. Third-party verification organizations were engaged since 2016 to verify and obtain verification statements.</li> <li>2. Reset the baseline year for greenhouse gas inventory to 2021. The greenhouse gas emission intensity was 4.64 (kg CO<sub>2</sub>e/turnover of NT\$1,457,622,000). The intensity of greenhouse gas emissions in 2022 was 4.43 (kg CO<sub>2</sub>e/turnover of NT\$1,497,708,000).</li> <li>3. The target for energy-saving and waste reduction improvement benefits in 2022 was NT\$8 million, with actual achievements of NT\$7.23 million, achieving a rate of 90%.</li> </ol>
	Management Policy Adjustments	<p>Continue to promote improvement projects such as ISO 14001 Environmental Management System and ISO 50001 Energy Management System, establishing management performance indicators for control, to achieve energy conservation and carbon reduction measures.</p>

## ▪ 2022 Climate Change Management Framework (TCFD)

### Company Management Strategies and Actions

- The Board of Directors regularly reviews climate change-related risks and opportunities.
- Sustainability Committee:The highest organization for climate change management in the Company. The Board of Directors authorizes Mr. Wu Zong-ming, a director and concurrently the President of the Company, to serve as the chairperson of the implementing organization. The committee reviews the implementation effectiveness of FBT's sustainability management (including climate change strategy and goals) annually and reports to the Board of Directors.
- TCFD Implementation Committee: a The Sustainability Committee established the Energy Conservation and Carbon Reduction Team, an organization responsible for implementing and managing actions related to climate change risks and opportunities. The team is divided into Risk Adaptation Task Force, Carbon Emission Inventory Task Force, and Carbon Emission Reduction Task Force. The TCFD Implementation Committee operates under the PDCA system.

### 2022 Implementation Status Abstract

- ✓ The Sustainability Committee is composed of high-level managers from various departments within the Company, who serve as implementing committee members and key members. The committee sets targets to reduce carbon emission intensity by 20% by 2030 compared to the baseline year of 2021 and by 50% by 2050. Refer to 4.1.1. Governance for details.
- ✓ The TCFD Implementation Committee's Carbon Emission Reduction Team proposes detailed plans for strategic actions. In 2022, the focus was on process improvement, improvement activity teams, ISO 50001 Energy Management System, energy conservation, and waste reduction. The team reviews monthly implementation status and future plans. Refer to 4.1.4. Strategies for Risk/Opportunity.

### Company Management Strategies and Actions

- Cross-department discussions to identify short, medium, and long-term climate risks and opportunities.
- Evaluate the potential operational and financial impacts of significant climate risks and opportunities on the company
- Conduct scenario analysis and net-zero emission targets and pathways

### 2022 Implementation Status Abstract

- ✓ Through climate scenario simulation, identify short, medium, and long-term climate risks and opportunities, as well as potential operational and financial impacts on the company. Refer to 4.1.2. Sustainable Development Strategy and 4.1.3. Climate Scenario Strategy.

### Company Management Strategies and Actions

- Utilize the TCFD framework to establish a climate risk identification process
- Based on climate risk identification and prioritization results, establish and execute relevant response plans
- Incorporate climate risk identification and assessment into the corporate risk management process

### 2022 Implementation Status Abstract

- ✓ Use the TCFD framework to establish a climate risk identification process, a climate change risk and opportunity matrix, and to set and execute relevant response plans. Refer to Section 4.1.5 Risk Management.

### Company Management Strategies and Actions

- Set climate change-related management indicators
- Annually conduct greenhouse gas emission inventory and disclosure based on ISO 14064-1, assess the impacts on the Company's operations, and evaluate the risks and mitigation strategies of Scope 1, 2, and 3 emissions
- Formulate climate change management goals, review goal achievement and performance

### 2022 Implementation Status Abstract

- ✓ Set climate change-related management indicators, review goal achievement and performance. Refer to Section 4.1.6 Indicators and Objectives.

## 4.1

# Climate Change

### 4.1.1 Governance

Recently, whether it's governmental authorities, industries, investment institutions, stock markets, or consumer markets, ESG has been widely discussed, and ESG management is considered a necessary condition for sustainable business operations. ESG encompasses Environmental, Social and Governance, with the environmental aspect of climate change having the most significant impact on businesses.

The Company has long been proactive in promoting ESG sustainable development. On December 21, 2021, the Board of Directors revised the "Corporate Social Responsibility Committee" to the "Sustainability Committee." To address the Task Force on Climate-related Financial Disclosures (TCFD), an Energy Conservation and Carbon Reduction Team was added to the governance structure. The Sustainability Committee is composed of high-level managers from various departments within the company, who serve as implementing committee members and key members. The committee sets targets to reduce carbon emission intensity by 20% by 2030 compared to the baseline year of 2021 and by 50% by 2050. In addition, a "TCFD Implementation Committee" for climate change governance was established under the Sustainability Committee, which comprises Risk Adaptation Task Force, Carbon Emission Inventory Task Force, and Carbon Emission Reduction Task Force. They are responsible for evaluating and managing climate change-related issues. Future progress regarding TCFD goals will be included in the annual sustainability report's implementation effectiveness report in May. The climate change issues of 2022 were reported to the Board of Directors on May 30, 2023, by the TCFD Implementation Committee regarding the financial impacts, goal setting, and achievement status of climate-related risks and opportunities.

The Company holds two energy and environmental management system review meetings each year, hosted by the President, to comprehensively discuss energy conservation and carbon reduction issues.

The ISO 50001 Energy Management System is integrated with FMS projects in various units each year to promote internal energy-saving projects. Regular meetings are held to continuously track progress and effectiveness.

### 4.1.2 Sustainable Development Strategy

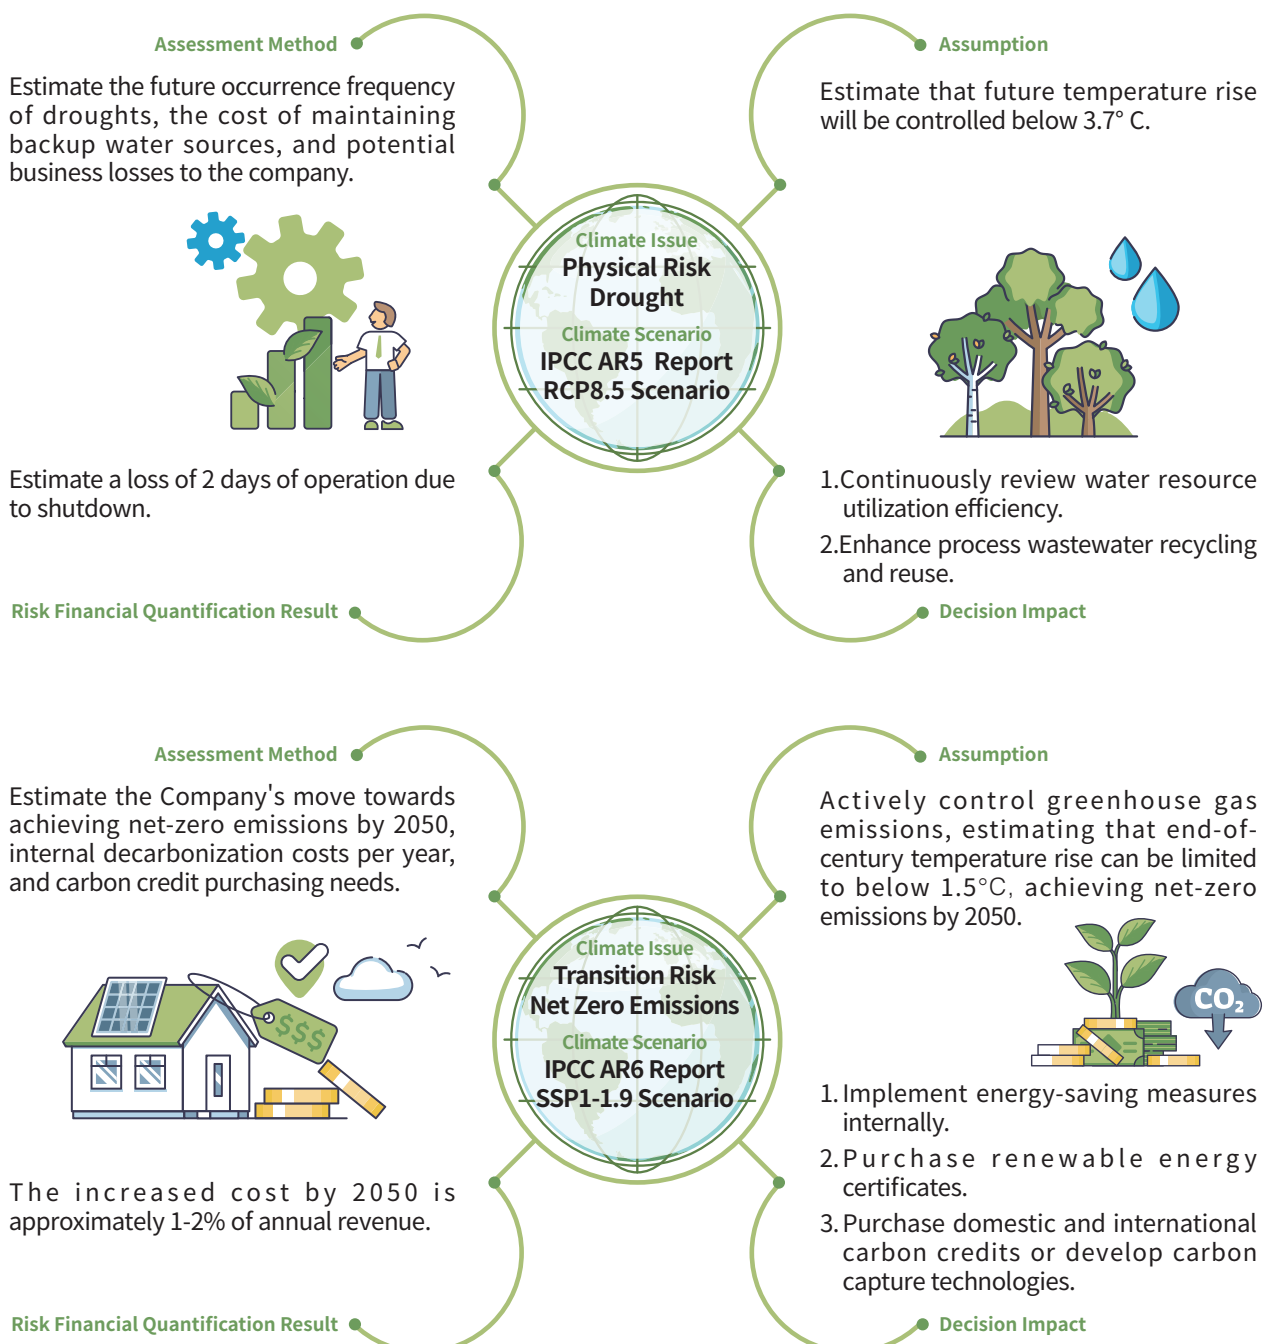

With the support of senior executives, the Company executes climate-related risk and opportunity identification based on the TCFD framework across departments, evaluates the potential operational and financial impacts of significant climate risks and opportunities, and actively develops solutions. Risk mitigation and adaptation, as well as carbon emission reduction, are the two main management strategies adopted in response.

### 4.1.3 Climate Scenario Strategy

Based on TCFD's recommendations, the Company evaluates the most severe scenarios faced by transformation and physical risks, assessing the impact of different greenhouse gas emission controls on the Company's operations, and incorporating assessment results into strategic resilience considerations. By referring to the IPCC's scientific assessment reports for SSP1-1.9 and RCP 8.5 emission scenarios, the Company evaluates the maximum impact of

transformation and physical risks, incorporating potential increases in carbon emissions from future business growth and ongoing carbon reduction actions, and analyzing the financial impacts of climate risks.

The largest impacts of physical and transformation risks under RCP 8.5 and SSP1-1.9 scenarios are as follows:

## 4.1 Climate Change

### 4.1.4 Risk/Opportunity Strategy

#### ● Risk Mitigation and Adaptation

##### ■ Risk Mitigation

Annually, the Company reviews overall decarbonization effectiveness through third-party verified greenhouse gas inventory results. Given that the main emission source of greenhouse gases is indirect emissions caused by electricity use, in 2022, we executed 8 energy-saving projects under the ISO 50001 Energy Management System, replacing and procuring low-energy-consuming equipment, such as a chiller and an air compressor. These initiatives improved energy efficiency and effectively reduced greenhouse gas emissions. In 2022, the greenhouse gas emission intensity was reduced to 4.43 kg CO<sub>2</sub>e/1,000 NTD, compared to 4.64 kg CO<sub>2</sub>e/1,000 NTD in 2021, resulting in a reduction of 0.21 kg CO<sub>2</sub>e/1,000 NTD. In 2023, the Company will execute 8 energy-saving projects under the ISO 50001 Energy Management System to achieve the 2024 goals.

##### ■ Risk Adaptation

In the face of increasingly extreme climate phenomena and events, having resilience to cope with climate-related disasters is crucial for effective business management.

##### Flood

The Company regularly inspects public facilities, strengthens disaster prevention measures, develops emergency response plans, and conducts drills. During flood incidents, guidelines are established for employee work or suspension, alert communication, and other necessary assistance to achieve the goal of uninterrupted production.

##### Drought

The Company implements water conservation measures internally, continuously reviews water resource utilization efficiency, and enhances the use of process wastewater recycling. These actions aim to reduce the impact of climate risks.

##### ■ Carbon Emission Reduction

1		Continue to promote ISO 50001, set energy-saving goals and action plans, and implement significant energy equipment's electricity monitoring and adjustments along with energy-saving projects to achieve a 1% annual electricity reduction goal, thereby reducing energy costs and carbon emissions.
2		Continue to promote Material Flow Cost Accounting (MFCA). In 2020, verified MFCA was implemented for "motorcycle brake discs" as the targeted product. In 2021, MFCA analysis suggested the establishment of a designated unit for wider material design in the brake disc to reduce material usage and subsequent indirect greenhouse gas emissions, thus lowering product costs.
3		Continue to improve FMS, TPS, and TPM activities, enhance process defect rates, and increase production efficiency, thereby reducing energy usage and carbon emissions.

## 4.1.5 Risk Management

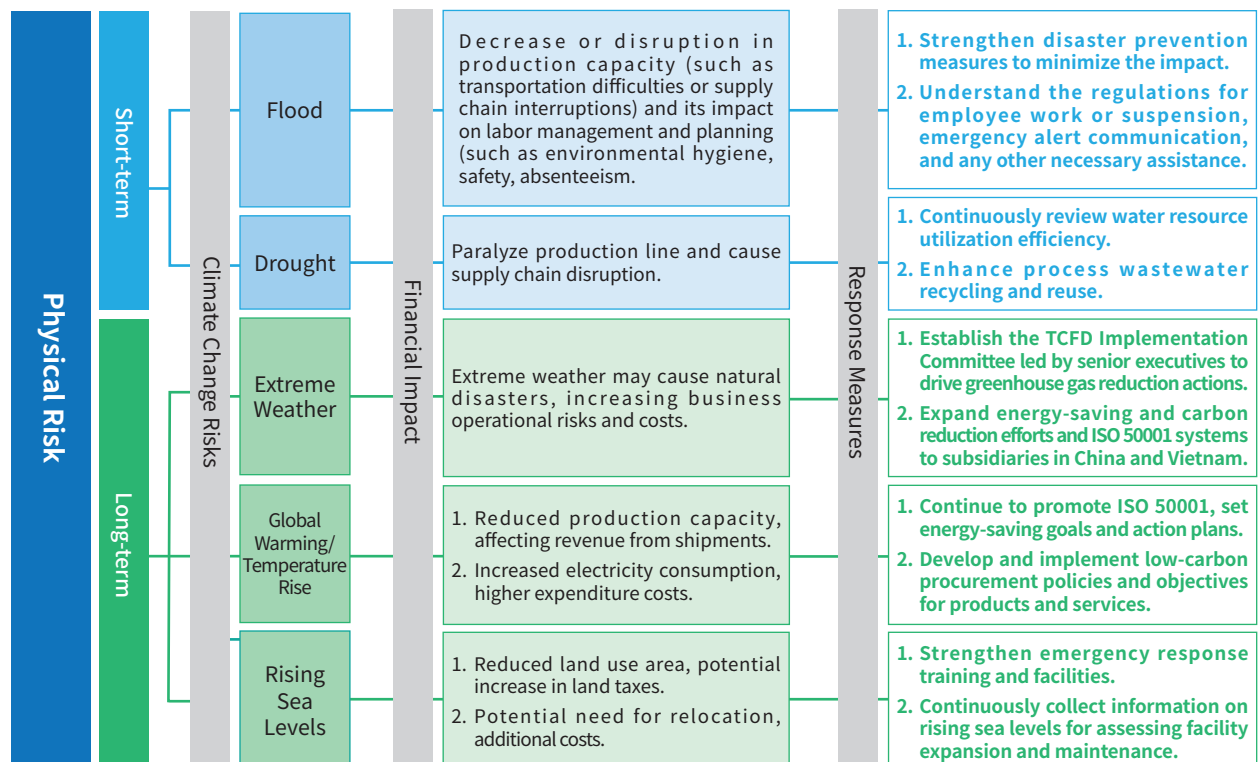

In the period of October to December 2022, TCFD working group discussions were held, involving cross-departmental discussions to identify and prioritize climate-related risks and opportunities. Based on climate risk identification, strategies for adaptation are developed.

### ● Identification of Major Climate Change Risks and Opportunities

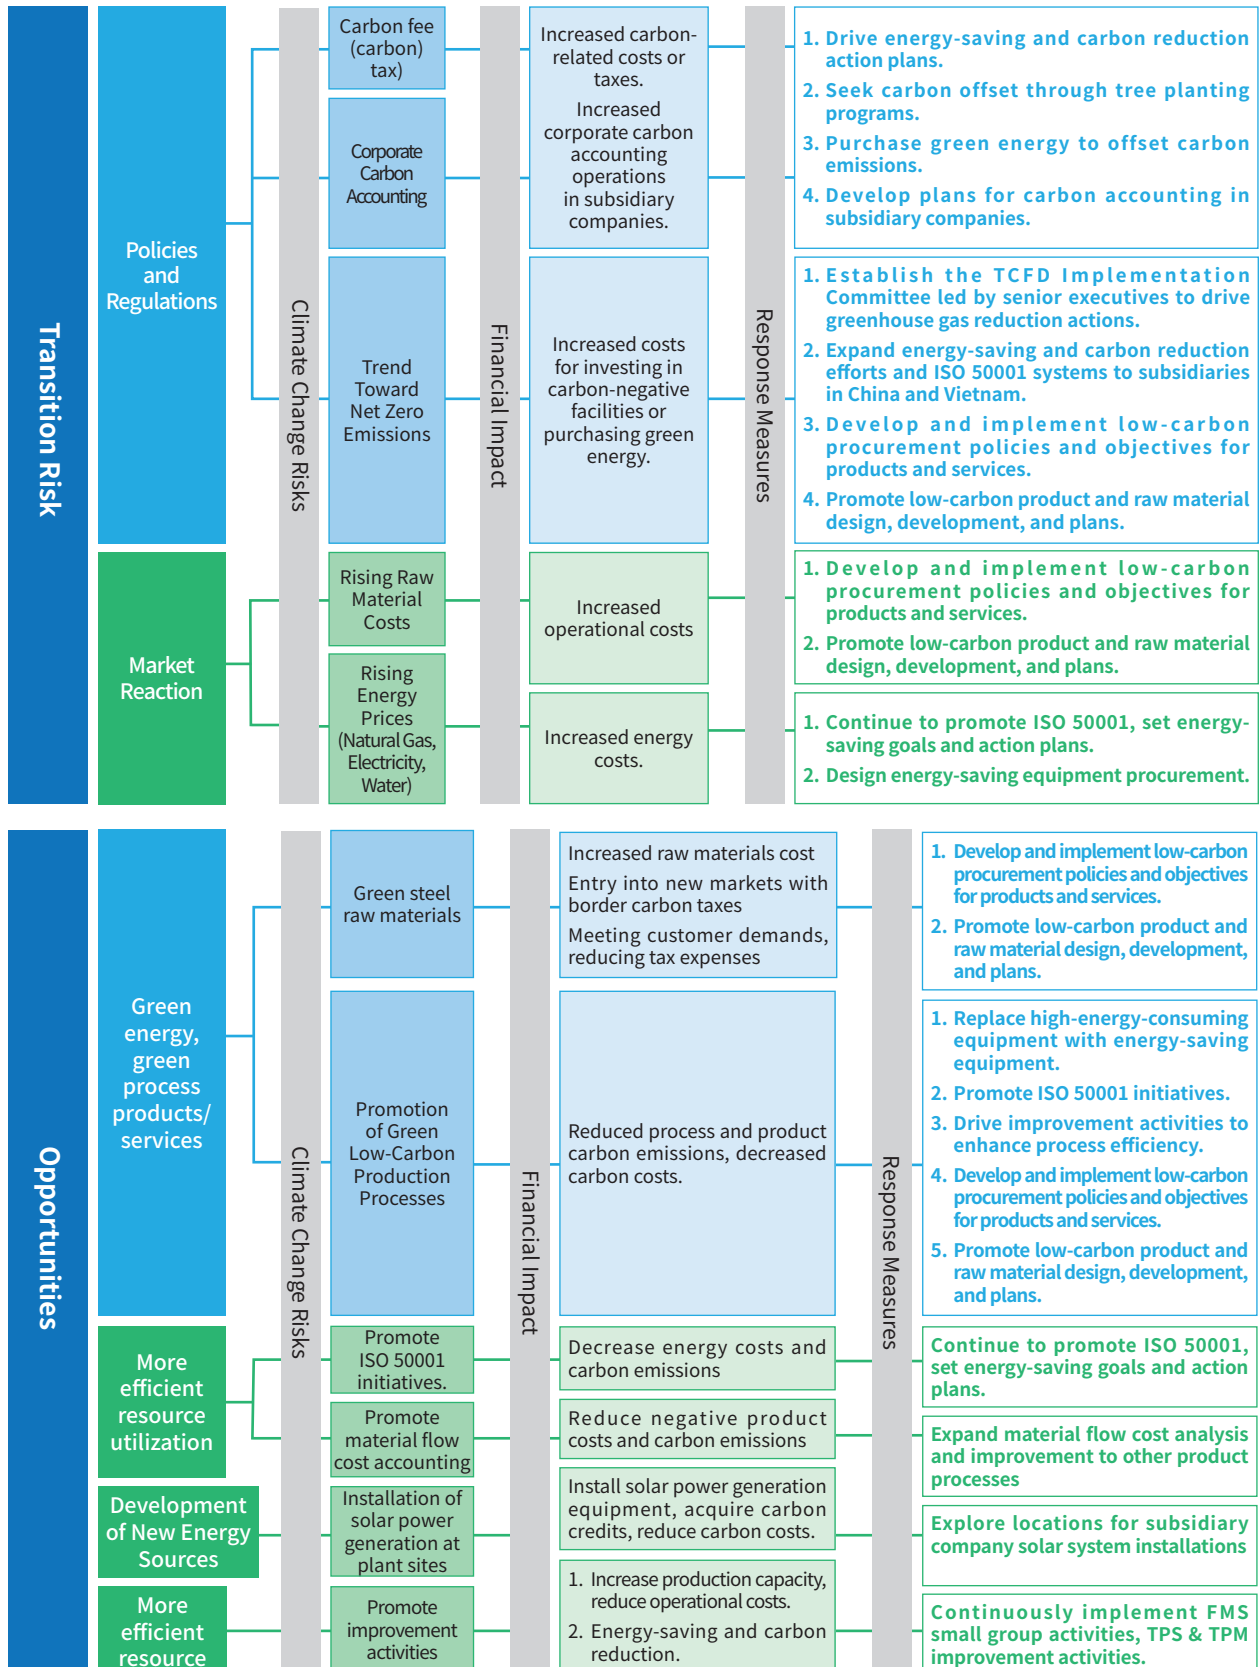

Working committee members and designated individuals categorize identified climate-related risks and opportunities into the organizational environmental issue and risk and opportunity management action tables. Analyzing results based on “impact” and “likelihood.” If the product of “impact” and “likelihood” is 15 or above, or if “impact”  $\geq 4$  and “likelihood”  $\geq 3$ , it falls under significant physical climate change risk, transition risk, or opportunity, necessitating countermeasures and plans.

### ● Results of Identifying Climate-Related Risks and Opportunities in 2022, along with Financial Impacts and Response Measures:

## 4.1 Climate Change

## 4.1.6 Indicators and Objectives

Since 2015, the greenhouse gas inventory of Taiwan operational sites has been conducted based on ISO 14064-1:2006. Third-party verification organizations have been engaged annually to verify and obtain verification statements.

Starting from 2020, the Taiwan operational sites have expanded the scope of estimation for emissions under ISO 14064-1:2018, including Category 3 and Category 4 emissions. Third-party verification organizations have verified these emissions, and verification statements have been obtained.

The emissions of the Taiwan operational sites fall under Category 1 and Category 2 (formerly Scope 1 and Scope 2) greenhouse gas inventories, with approximately 85% of emissions from Category 2 being purchased external electricity. Our greenhouse gas reduction efforts are integrated with energy management systems, and various measures for energy savings and carbon reduction are continuously promoted. Therefore, the intensity targets for the Taiwan operational sites have been reset as shown in the table below:

### ■ Comparison Table of Emission Intensity (Intensity Objectives)

Year	2021 (base year)	2022 (Target)	2022 (Achievement)	2023 (Target)	2024 (Target)	2030 (Target)
<b>Greenhouse Gas Emission Intensity (kg CO<sub>2</sub>e)/ (thousand NTD)</b>	4.64	4.50	4.43	4.36	4.27	<b>3.71</b>
<b>Compared with the base year (%)</b>		-3%	-5%	-6%	-8%	<b>-20%</b>

Note: 1.The base year is 2021. The midterm target aims for a 20% reduction in carbon intensity by 2030. The short-term target spans from 2022 to 2024, with a reduction of 3% per year in 2022 and 2023, followed by 2% per year from 2024 onwards, achieving a total reduction of 8% in carbon intensity over three years.

2.In 2022, with a 7% growth in revenue and the effects of energy-saving and carbon-reduction projects, the intensity reduction for Category 1 and Category 2 emissions relative to the base year is 5%.

Other objectives include the disclosure of energy-saving and waste reduction amounts, recycled water, wastewater, and energy usage related to climate management indicators in Taiwan's operational sites within the relevant environmental sections of this Report.

In 2023, our operational sites will assess the implementation of internal carbon pricing and begin monitoring management from 2024, gradually working towards the net-zero target.

In 2026, we will complete the 2025 greenhouse gas inventory and certification for our Vietnam and China operational sites; in 2027, we will complete the ISO 50001 Energy Management System certification for our Vietnam and China operational sites.

## 4.2

# Greenhouse Gas Management

As a responsible participant in the global community, the Company acknowledges its duty towards environmental protection. We strive to mitigate the environmental and climate impacts resulting from our greenhouse gas emissions, including carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride, and nitrogen trifluoride. In 2015, we introduced the ISO 14064-1 greenhouse gas inventory system. The base year for our greenhouse gas inventory was initially set as 2021. The reason for changing the base year was in response to significant revisions in ISO 14064-1, including updates to guidelines for significant indirect greenhouse gas emissions and comprehensive inventorying of machinery equipment and control panel cooling systems. This decision was also influenced by the release of the Intergovernmental Panel on Climate Change (IPCC) Sixth Assessment Report (2021). Hence, we determined 2021 as the new base year.

Timing for Recalculating the Base Year (Referencing ISO 14064-1:2018 Section 6.4.2):

- 1.Changes in the reporting or organizational boundary structure (mergers, acquisitions, or divestitures).
- 2.Changes in calculation methods or emission factors.
- 3.Identification of errors or cumulative errors, which are generally material (with a materiality threshold of over 5%).

In accordance with ISO 14064-1:2018 specifications for organizational boundaries, we referred to the Greenhouse Gas Protocol of the World Business Council for Sustainable Development (WBCSD). The method for summarizing this inventory information is based on the “Operational Control Approach.” Therefore, the regions covered in this report fall within the scope controlled by our organization during its operational activities.

The chosen method for conducting greenhouse gas inventory is the “Emission Factor Method.” In this quantification process, the CO<sub>2</sub> equivalents of specific greenhouse gas emissions sources are calculated using the formula:

$$\text{Activity Data (Annual Usage)} \times \text{Emission Factor} \times \text{Global Warming Potential} = \text{CO}_2 \text{ Equivalents}$$

Emission factors are based on principles outlined in ISO 14064-1:2018 and can be classified into:

### Explanation of the Quantification Method

According to ISO 14064-1:2018 specifications, quantification methods can be categorized as follows: estimation calculations, direct measurements, and combined methods. Within the estimation category, further subdivisions are possible: (1) Multiplying activity data by emission factors; (2) Modeling estimations; (3) Equipment-related estimations; (4) Mass balance. Within the measurement category, divisions include continuous measurements and indirect measurements.

Currently, the Emission Factor Method is widely used due to its convenience in estimation. Currently, only the electricity sector implements nationally announced emission factors, while others use emission factors provided by the IPCC and chemical mass balance methods for calculation.

For 2020 to 2022, the results of greenhouse gas inventory calculations conducted by the Greenhouse Gas Inventory Team are as follows:

Unit: Tons of CO<sub>2</sub>e/year

ISO 14064-1:2006		ISO 14064-1:2018					Remarks
Category		Type/Year		2020	2021	2022	
Scope 1	Direct Greenhouse Gas Emissions	Category 1	Direct greenhouse gas emissions and removals	761.080	1,076.719	993.239	Burning of natural gas, diesel, etc.
Scope 2	Indirect Energy-Related Greenhouse Gas Emissions	Category 2	Indirect greenhouse gas emissions from energy inputs	5,194.998	5,685.080	5,637.342	Purchased electricity
Scope 3	Other Indirect Greenhouse Gas Emissions	Category 3	Indirect greenhouse gas emissions from transport	509.680	555.292	491.500	Transportation of steel coils
		Category 4	Indirect greenhouse gas emissions from use of organization's products	11,520.245	14,373.294	13,220.071	Upstream products - steel coils Upstream electricity Upstream natural gas Upstream diesel Upstream gasoline
		Category 5	Indirect greenhouse gas emissions associated with use of organization's products	Not inventoried	Not inventoried	Not inventoried	
		Category 6	Other Indirect Greenhouse Gas Emissions from Other Sources	Not inventoried	Not inventoried	Not inventoried	
Total Greenhouse Gas Emissions from Scope 1 + Scope 2				5,956.078	6,761.799	6,630.581	
Total Greenhouse Gas Emissions from Scope 3				12,029.925	14,928.586	13,711.571	

Note: Category 2 electricity emission factor has not been announced by the Bureau of Energy, Ministry of Economic Affairs, so the 2021 value of 0.509 kg CO<sub>2</sub>e/kWh is used for calculation.

## 4.2 Greenhouse Gas Management

### ▪ Direct greenhouse gas emissions

A reduction of 83.48 metric tons was  
↓ from 2021 to 2022.

### ▪ Indirect greenhouse gas emissions from energy inputs

A reduction of 47.738 metric tons was  
↓ from 2021 to 2022.

The greenhouse gas emission intensity for Scope 1 + Scope 2 in 2022 was 4.43 kg CO<sub>2</sub>e/thousand NTD, a decrease of 4.53% from 4.64 kg CO<sub>2</sub>e/thousand NTD in 2021.

As electricity constitutes the primary energy source for the Company, greenhouse gas reduction efforts are integrated with the energy management system. Continuous measures to promote energy conservation and carbon reduction have been implemented since 2016, including collaboration with the Industrial Technology Research Institute (ITRI) to introduce an energy management system. This effort has enhanced energy monitoring and management, facilitating the policy for energy conservation and carbon reduction. In 2022, direct greenhouse gas emissions combined with indirect greenhouse gas emissions from energy (Category 2) were reduced by 1.95% compared to 2021.

In our company, the primary carbon emission sources within Scope 3 are categorized as Category 4 upstream products - steel coils. In April 2020, we adopted the ISO 14051 methodology for Material Flow Cost Accounting (MFCA), details are explained in in section 4.3.2.. Our company does not calculate emissions related to ozone-depleting substances (ODS).

### ▪ Intensity of other indirect greenhouse gas emissions (Scope 3)

In 2022, the greenhouse gas emission intensity for Scope 3 was 9.16 kg(CO<sub>2</sub>e/thousand NTD), a decrease of 10.55% from 10.24 kg (CO<sub>2</sub>e/thousand NTD) in 2021.

## 4.3

## Energy Management

## 4.3.1 Energy Conservation

## ● Energy Consumption and Usage

In 2022, the Company's energy sources consisted of electricity, natural gas, and diesel fuel, with electricity being the primary energy source, accounting for 72.26% of all energy consumption. Other energy sources accounted for 27.74%, and energy consumption decreased by 2.73% from 2021 to 2022. The base year for energy intensity was set as 2015. This choice was due to the fact that 2015 was the year when the company passed the ISO 50001:2011 verification, and data for energy usage in that year were readily available for calculation. However, due to adjustments in the heat value of electricity consumption in 2018,

resulting in changes in conversion coefficients, the base year was reset to 2020.

The consumption and usage of various energy sources are shown in the table below:

2020					
Item	Consumption	Unit	Conversion Factor	kWh	Megajoules
Natural Gas	309.26	1,000 m3	10,460	3,234,860	11,645,494.56
Gasoline	1.36	kL	9,066	12,359	44,494.19
Diesel	21.12	kL	9,762	206,126	742,052.18
Purchased electricity	10,206.28	Thousand kWh	1,000	10,206,284	36,742,622.40
Total				13,659,629	49,174,663.33

2021					
Item	Consumption	Unit	Conversion Factor	kWh	Megajoules
Natural Gas	400.16	1,000 m3	10,460	4,185,684	15,068,462.62
Gasoline	1.07	kL	9,066	9,728	35,020.14
Diesel	24.36	kL	9,762	237,802	856,088.35
Purchased electricity	11,324.86	Thousand kWh	1,000	11,324,860	40,769,496.00
Total				15,758,074	56,729,067.11

## 4.3 Energy Management

2022					
Item	Consumption	Unit	Conversion Factor	kWh	Megajoules
Natural Gas	384.11	1,000 m <sup>3</sup>	10,460	4,017,812	14,464,121.47
Gasoline	1.22	kL	9,066	11,053	39,789.80
Diesel	22.92	kL	9,762	223,710	805,357.03
Purchased electricity	11,075.33	Thousand kWh	1,000	11,075,328	39,871,180.80
Total				15,327,903	55,180,449.11

Description: 1. Energy unit conversions are based on information from the website of the Bureau of Energy, Ministry of Economic Affairs. Any changes will follow the standards announced by the Bureau of Energy.

2. The Company has installed solar energy generation facilities in rented areas, resulting in 0% renewable energy usage (Renewable Energy Ratio = Self-installed solar energy/Total energy consumption).

3. The Company's total energy consumption in 2022 was 55,180.45 GJ (gigajoules).

### ● Energy Performance

The ISO 50001 2022 organizational environmental issues and risk/opportunity management action plan has been assessed. To mitigate the environmental and climate impacts of greenhouse gas emissions, the Company has implemented an energy management system since 2015 and established an Energy Promotion Committee. Throughout the implementation process, multiple energy management action plans have been executed with a goal of achieving at least 1% energy savings annually. In 2022, a total of eight energy-saving projects were executed, including "Improvement of Press Allocation in Plant 1," "Reduction of Energy Consumption in Chilled Water Machine in Plant 1," "Improvement

#### ■ Energy intensity

Note: Energy Intensity = Total Energy Consumption (megajoules)/Revenue (thousand NTD)

of Electroplating Machine Allocation in Plant 1,” “Reduction of Energy Consumption in Air Compressors in Plant 1,” “Reduction of Energy Consumption in Air Compressors in Plant 2,” “Improvement of ED Coating Process Allocation in Plant 3,” “Improvement of ED Coating Process Operation Allocation in Plant 3,” and “Reduction of Electricity Consumption in Bicycle Grinding Machine in Plant 3.” These projects collectively saved 1,138,975 megajoules of energy, reduced CO<sub>2</sub>e emissions by 161 metric tons, and saved energy costs amounting to NT\$1.11 million. The average annual electricity-saving rate from 2015 to 2022 was 2.165%. In 2022, the energy intensity decreased by 5.38% compared to 2021. The Company will continue promoting energy conservation through active participation and plans to pass the BSI ISO 50001:2018 verification review.

### ● Green Energy Procurement

As electricity is the main energy source for the Company, efforts have been made to reduce the burden on the environment and support the government's renewable energy policies. In 2016 and 2017, the Company subscribed to 240,000 kWh of green electricity from Taiwan Power Company (Taipower). In 2019, the Company collaborated with World Harmony Co., Ltd. to install solar energy facilities on the rooftop, generating green energy for sale to Taipower. The electricity generated is used within the company, and from December 2019 to December 2022, a total of 7,895,929 kWh of electricity was generated across various plants, reducing CO<sub>2</sub>e emissions by 4,000.862 metric tons. These efforts align with national policies promoting renewable energy development.

	Period	2019/12-2020/12	2021/01-2021/12	2022/01-2022/12
Power generated (kWh)	Plant No.1	1,526,059	1,531,251	<b>1,538,901</b>
	Plant No.2	277,679	243,911	<b>251,966</b>
	Plant No.3	859,802	819,872	<b>846,487</b>
	Total	2,663,540	2,595,035	<b>2,637,354</b>

	Period	2019/12-2020/12	2021/01-2021/12	2022/01-2022/12
Carbon Emission Reduction (kg)	Plant No.1	776,764	768,688	<b>783,300</b>
	Plant No.2	141,339	122,444	<b>128,250</b>
	Plant No.3	437,639	411,576	<b>430,862</b>
	Total	1,355,742	1,302,707	<b>1,342,413</b>

## 4.3

### Energy Management

#### 4.3.2 Material Flow Cost Accounting (MFCA) and Circular Economy

In April 2020, the Company received technical guidance in ISO 14051 Material Flow Cost Accounting from the Industrial Technology Research Institute (ITRI). The Company conducted material flow cost accounting for motorcycle brake discs as the target product. This involved analyzing the relationship between inputs (materials, energy) and outputs (products and waste) in relevant processes to understand the cost data associated with product material flows. The goal was to reduce environmental impacts and enhance operational profits. On November 16, 2020, the Company received BSI certification for ISO 14051:2011 Environmental Management - Material Flow Cost Accounting.

Based on material flow cost accounting recommendations, a designated unit was established to design a multi-cavity mold for the brake discs. This design reduced material costs, creating a competitive advantage for the company. From 2021 to 2022, the production volume of brake discs with multi-cavity mold increased, material utilization rates were raised by 5%, and material savings are as shown in the table:

Project \ Year	2021	2022
<b>Unloading Production Volume (PCS)</b>	34,726	<b>154,262</b>
<b>Improvement in Material Utilization Rateization Rateization Rate(%)</b>	7	<b>5</b>
<b>Material Saving (KGS)</b>	2,451.08	<b>8,098.85</b>

## 4.4

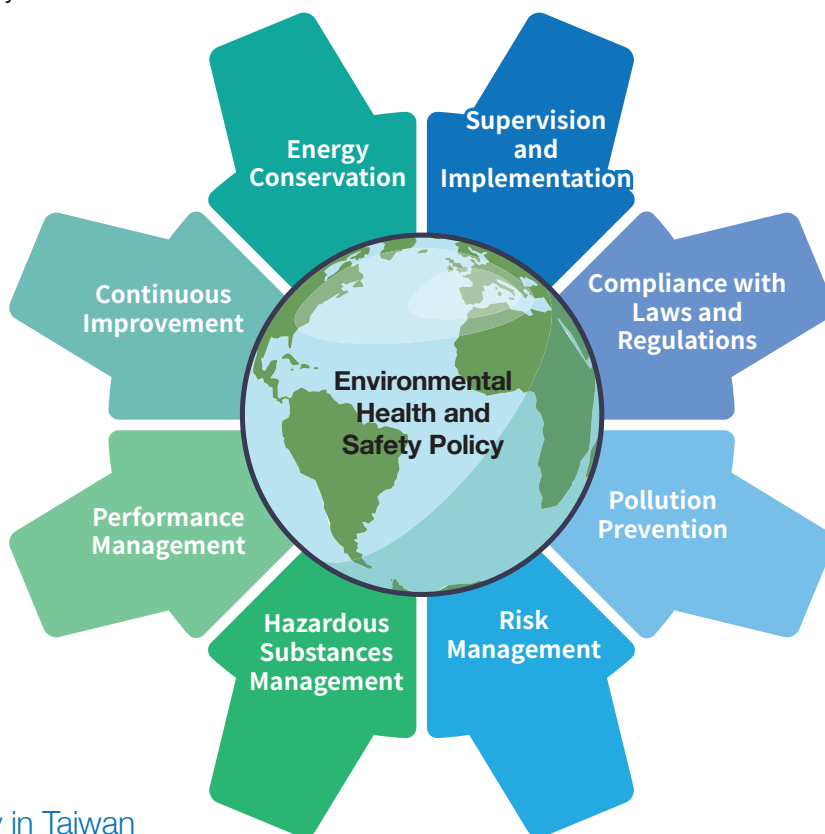

# Environmental Management Policy

## 4.4.1 Environmental Management System

### ● Environmental Health and Safety (EHS) Policy

The Company has achieved ISO 14001 and ISO 45001 certifications in Taiwan and has established the environmental, safety, and health policy as follows:

The Company is committed to establishing a positive working environment, complying with regulations, preventing pollution and accidents, reducing environmental impacts and unacceptable risks arising from products, materials, personnel, machinery, procedures, activities, and services, continuously promoting EHS improvements, promoting the concept of environmental safety and health, and fulfilling corporate social responsibility. We commit to the following policy:

### ● FBT Greenhouse Gas Policy in Taiwan

In response to the 2018 revision of ISO 14064-1, the Company reset the base year to 2021 and established the greenhouse gas policy for 2022, including the inventory of greenhouse gas emissions. The policy is as follows:

## 4.4

## Environmental Management Policy

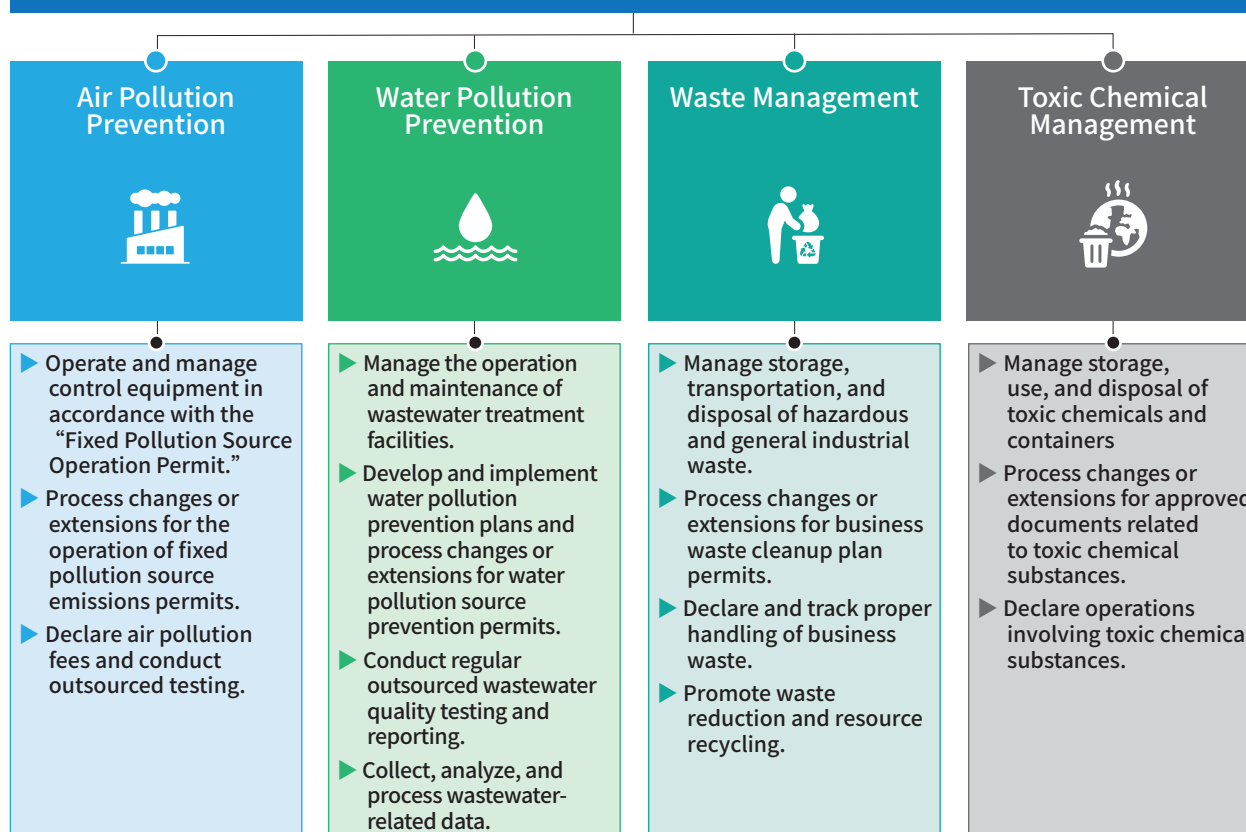

## ● FBT Energy Policy in Taiwan

The Company obtained ISO 50001 Energy Management System certification in August 2015 and established the energy policy as follows:

- 1** Continue to improve energy performance and reduce energy costs.
- Strictly comply with regulatory requirements and prioritize the purchase of energy-efficient products. **2**
- 3** Review energy goals and objectives and obtain energy information in a timely manner.
- Implement energy management systems to reduce greenhouse gas emissions. **4**
- 5** Raise awareness of energy conservation among all employees to create a sustainable business environment.

## ● Environmental Management Policy

## Fine Blanking &amp; Tool Environmental Responsibility and Management Policy

## ● FBT Environmental Performance in Taiwan

Over the years, the Company has consistently promoted improvement proposals. In 2022, the benefits of improvement proposals in energy conservation and waste reduction and pollution prevention reached NT\$7,236,726 (calculated according to internal improvement proposal management methods). Improvements included resource waste reduction (recycling waste materials, shared materials and molds, reducing obsolete materials, improving high-frequency cooling fixtures, mold development for reduced material usage), replacement of energy-consuming equipment, energy usage improvements, and equipment pollution prevention. In terms of environmental improvements, we continued to purchase oil mist recovery machines for on-site machinery equipment oil mist recovery and reuse, creating a more comfortable working environment. The Company has not incurred environmental liability insurance expenses.

### 4.4.2 Air Pollution Control

We formulated the “Waste Gas Management Regulations” according to the “Standards for Air Pollutant Emission from Stationary Pollution Sources” of the Environmental Protection Administration and the “Standards of Permissible Exposure Limits at Job Site” of the Ministry of Labor. These regulations specify control items and emission standards for various operations. The Safety Management Office commissions qualified testing organizations to conduct annual testing of control items. In 2022, external testing was conducted, and the results of multiple tests were significantly below the control standards. However, the monitoring result for ethylene glycol ether acetate in the painting automatic spray gun was 6.198 ppm, lower than the permissible concentration of 10 ppm, classified as a Level 2 managed chemical.

Mechanical ventilation and exhaust systems or dust collection devices are installed in sandblasting, welding, electroplating, painting, and other process equipment throughout the plant. In Plant No.1, a wash tower was added to address zinc plating, treating acid gases and volatile organic compounds from the electroplating process. Plant No. 3 installed water curtain adsorption for paint spraying and acid gas treatment in the painting process, achieving air pollution control. These measures provide a clean, comfortable, bright, and safe working environment.

Every quarter, the Company submits declarations through the Air Pollution Network Declaration System in accordance with Article 16 of the Air Pollution Control Act. The air pollution statistics for 2020-2022 are shown in the following chart:

## 4.4

## Environmental Management Policy

Description: 1. In May 2018, natural gas boilers replaced heavy oil boilers, resulting in no sulfur oxide emissions.

2. Plant No.3 obtained a fixed pollution source operating permit on September 1, 2020, and was included in air pollution declarations in 2021. Due to the use of natural gas and solvents in the painting process raw materials, nitrogen oxide and volatile organic compound emissions increased from 2021.

3. Starting in the fourth quarter of 2021, the Company began declaring particulate pollutants and air pollutants (hexavalent chromium), resulting in lower emissions compared to 2022.

## 4.4.3 Chemical Management

The Company has formulated the “Toxic Chemical Management Measures” in accordance with the regulations of the Environmental Protection Administration related to toxic substances. This includes controlled storage with locking mechanisms, clear labeling of operational sites, provision of safety data sheets, emergency response equipment, personal protective gear, and emergency eyewash facilities. The Company follows the Toxic and Concerned Chemical Substances Registration and Declaration System for online reporting on a monthly basis.

For chemical management in accordance with the Ministry of Labor’s “Regulations for the Labeling and Hazard Communication of Hazardous Chemicals,” the Company has established the “Hazardous Material Management Measures.” This includes creating a hazardous chemical substance list and a safety data sheet database. The Company follows the “Regulations for Governing Designating and Handling of Priority Management Chemicals” and the “Regulations Governing Designation and Handling Permission of Controlled Chemicals,” as well as the “CCB Chemical Control Banding Operational Manual.” Chemical reporting and permission platform applications are submitted online.

Measures to reduce the environmental impact of products and services include:

continuous use of n-heptane-based degreasing oil instead of n-hexane-based oil in process operations. This has reduced the water environmental hazard level from Level 1 to Level 2 (reduced slow toxicity).

#### 4.4.4 Peripheral Noise

The Company has established the “Noise Management Measures” in accordance with the “Noise Control Act” of the Environmental Protection Administration. External testing of peripheral noise is conducted annually, and it complies with standards.

#### 4.4.5 Environmental Expenditure

The Company’s environmental expenditure in 2022 was approximately NT\$12,968,000 (based on internal ERP reports and estimations).

Item	Content	Amount (thousand NTD)	Remarks
1	Wastewater treatment chemicals	1,688	Description 1
	Soil and pollution control	13	
	Air pollution control	146	
2	Routine equipment operation and maintenance fees	2,946	
3	Environmental treatment expenditure for water and electricity	700	Estimated value
4	Sewage fee	2,966	
5	Testing fee	509	
6	External training fee	106	
7	Personnel expenses for environmental department	1,250	
8	Outsourced waste collection and transportation fee	2,626	
Total		12,968	

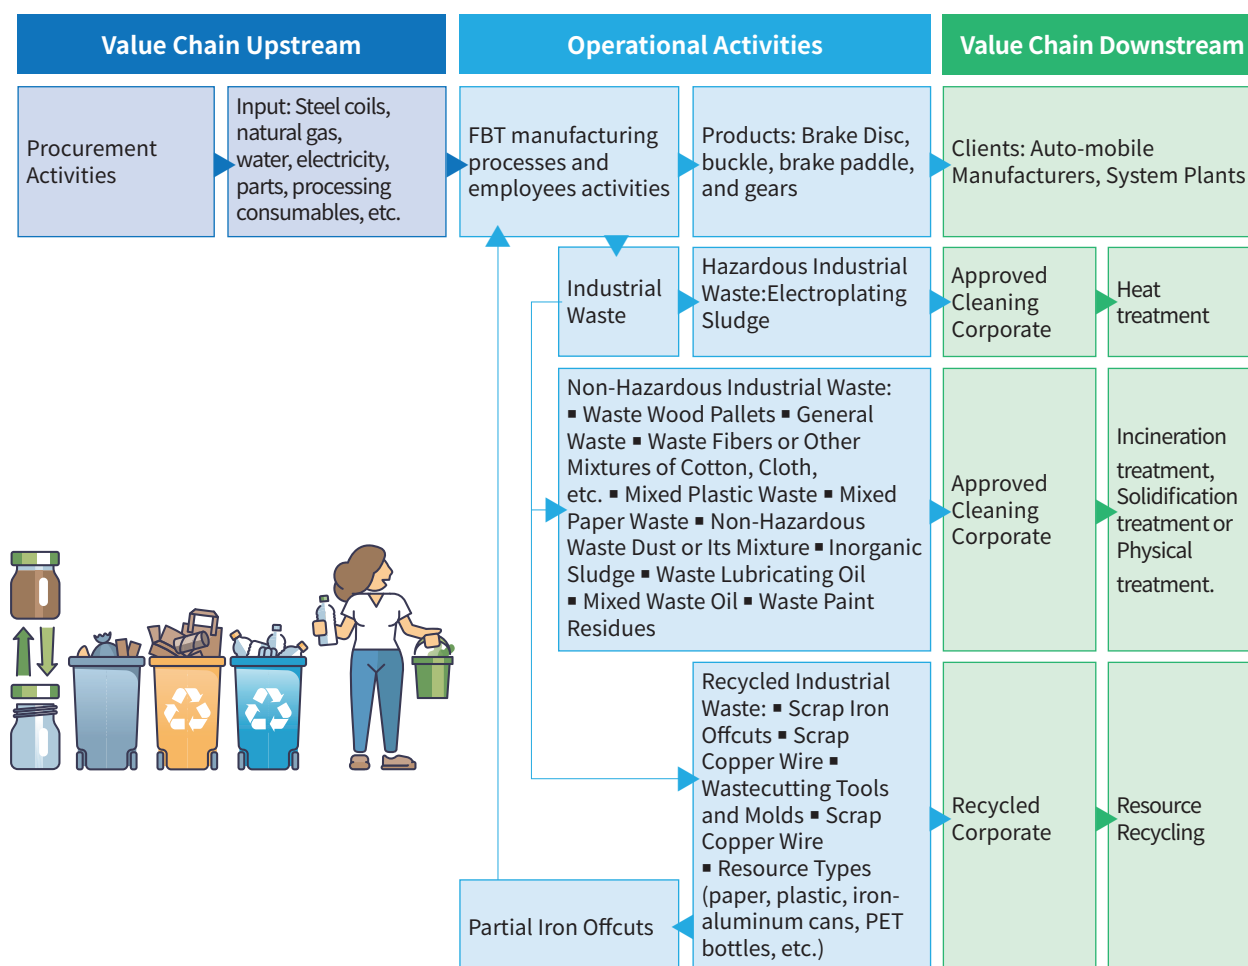

Description:1.According to the “Guidelines for Subsidies for Industrial Boilers in Changhua County to Switch to Clean Energy Sources” in May 2018, the introduction of natural gas boilers instead of heavy oil boilers significantly reduced air pollutant emissions.

2.In 2022, there were no environmental leaks or other violations of environmental laws and regulations,

## 4.5 Waste Management

The Company has established the “Waste Management Measures” in accordance with the “Waste Disposal” regulations of the Environmental Protection Administration. It controls industrial waste and follows the industrial waste declaration and management information system to report monthly waste production, temporary storage, and transportation quantities for Plants 1 and 3. In 2022, the Company continued its household waste reduction plan, created waste sorting labels in Vietnamese, Thai, and Cambodian languages, and conducted weekly inspections of sorting conditions in various units and safety management rooms. External waste collection was reduced from twice a week to once a week. In March 2019, a sludge dryer was introduced to significantly reduce the moisture content and weight of hazardous industrial waste.

The Company's waste value chain process is illustrated in the following diagram:

### ▪ Industrial Waste Statistics Table

Item/Year	2020	2021	2022
<b>A Hazardous Industrial Waste (metric tons)</b>	21.79	50.43	<b>37.47</b>
<b>D Non-Hazardous Industrial Waste (metric tons)</b>	126.23	123.685	<b>140.357</b>

## 4.5

## Waste Management

## ▪ Industrial Waste Statistics Table

Item/Year	2020	2021	2022
Total Weight of Waste (A+D)	148.02	174.115	177.827
Operating Revenue (NT\$ million)	1,197.9	1,457.6	1,497.7
Waste Intensity (Total Weight of Waste/Operating Revenue)	0.124	0.119	0.118

Waste Intensity decreased by 0.84% in 2022 compared to 2021.

The Company's waste categories, names, production weights, and disposal methods for 2022 are shown in the table below:

## ▪ 2022 FBT Waste Treatment Methods and Quantities

Category	Waste Name	Waste generated (metric tons)	Waste diverted from disposal (metric tons)	Waste directed to disposal (metric tons)	Disposal Method
Hazardous Industrial Waste (Total Weight)	Electroplating Sludge	37.470	0	37.470	Heat treatment
	Waste Wood Pallets	5.520	0	5.520	Incineration treatment
Non- Hazardous Industrial Waste	General Waste	62.200	0	62.200	
	Waste Fibers or Other Mixtures of Cotton, Cloth, etc.	0.055	0	0.055	
	Mixed Plastic Waste	2.080	0	2.080	
	Mixed Paper Waste	2.760	0	2.760	
	Non-Hazardous Waste Dust or Its Mixture	3.251	0	3.251	Solidification or Incineration treatment
	Inorganic Sludge	58.910	0	58.910	Solidification or physical treatment
	Waste Lubricating Oil	3.340	0	3.340	Physical treatment
	Mixed Waste Oil	1.040	0	1.040	
	Waste Paint Residues	1.200	0	1.200	Incineration treatment
Total Weight of Non-Hazardous Industrial Waste		140.357	0	140.357	
Total Weight of Hazardous + Non- Hazardous Industrial Waste		177,827	0	177.827	

Description:1. All of the Company's industrial waste is handled by approved domestic cleaning and processing plants under contracts. Waste disposal operators weigh the waste at the Plant No.3 weigh station before transportation. The responsible personnel create a triplicate form in the Industrial Waste Management System and deliver it to the operator. After processing, the operator provides proper disposal documentation to the Company for record-keeping. No hazardous industrial waste is exported abroad.

2.Plant No.2 is not subject to the industrial waste cleanup plan and is not included in the calculation.

3.Both hazardous and non-hazardous industrial waste are treated off-site.

4.Hazardous industrial waste accounts for 21.07%, and non-hazardous industrial waste accounts for 78.93%.

## 4.5 Waste Management

developed the “Resource Recycling Operation Standards.” This improves environmental hygiene and complies with regulatory requirements. Resource recycling is used to achieve waste resource utilization and economic benefits. In 2022, recycling totaled 3,032.661 metric tons, a decrease of 294.119 metric tons from 2021, mainly due to reduced scrap iron offcuts.

Recycled Item	Weight (metric tons)	Internal Recycling Percentage	External Recycling Percentage	Recycling Usage	Remarks
Scrap iron offcuts	2,972.930	3.52%	94.51%	Used internally for smaller blanking products, used externally for iron smelting or casting materials	2022 Waste Material Summary Statistics
Resource Types (paper, plastic, iron-aluminum cans, PET bottles, etc.)	53.227	0.00%	1.76%	Various raw materials for recycling and reuse	Monthly resource type statistics
Scrap copper wire	1.591	0.00%	0.05%	Recycled metal copper material	2022 Recycling Statistics
Waste cutting tools and molds	4.914	0.00%	0.16%	Recycled high-speed steel, mold steel, and other metal materials	2022 Recycling Statistics
<b>Total</b>	<b>3,032.661</b>	<b>3.52%</b>	<b>96.48%</b>		

Description: 1. The domestic cumulative shipment quantity in 2022 is currently: 111,174 PCS, achieving 100% recycling of packaging materials.

2. The recycling percentage for 2022 is 94.18%. (Recycling Weight / (Recycling Weight + Waste Weight)).

- From 2020 to 2022, scrap iron offcuts were internally recycled for smaller stamping products, as shown in the table below.

2022 recycled weight increased by 18.44% compared to 2021

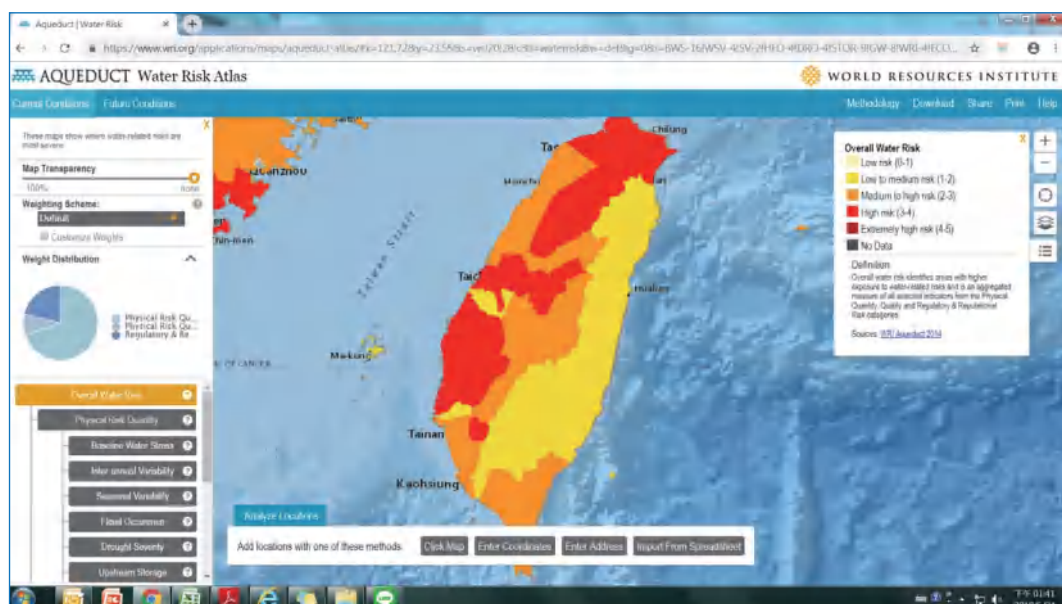

## 4.6

## Water Management

## 4.6.1 Water Resource Reutilization

Although Taiwan receives abundant rainfall, due to its small size, dense population, steep terrain, concentrated rainfall, and short rivers, most of the rainwater flows directly into the ocean. Taiwan has consistently been ranked as one of the countries with water scarcity issues. According to the analysis from the World Resources Institute website, the overall water risk for the location of the Company is classified as high risk level 3-4 (as shown in the diagram below). All of our operational sites in Taiwan rely on tap water for 100% of their process water needs. Additionally, the production process includes water-intensive electroplating and painting operations, making the water resource issue closely related to our operations. Therefore, guided by the principle of cherishing water resources, we have been actively promoting water conservation within our facility. For example: Various equipment in the process, such as spot welding machines, heat treatment equipment, chillers, ultrasonic cleaning machines, etc., and air conditioning units in office areas, all use recycled water. This practice of recycling wastewater has had significant positive effects on water quality improvement in the environment. In the grinding operation area, we have introduced cutting fluid recycling devices and installed recycling pipelines to filter out iron scraps from the recycled cutting fluid. The filtered cutting fluid is then directly supplied to the grinding equipment through pipelines for reuse. Additionally, we recycle pure water wastewater. Out of the pure water wastewater recycling and reuse (see the flow chart of pure water manufacturing machine for electroplating and coating production line), an estimated 21.487 million liters of pure water wastewater was recycled in 2022 (calculated by recycling water meter), and the total amount of water withdrawn is 180.258 million liters (calculated by water bill), with a recycling rate of 11.92%. The water intensity in 2022 was 120.35 (total water intake 180,258 cubic meters / revenue NT\$1,497.7 million), which decreased by 0.69% compared to 2021. The water consumption in 2022 was 1.897 million liters (water consumption = total water intake - total wastewater discharge).

Data Source: World Resources Institute website

## 4.6 Water Management

### 4.6.2 Water Pollution Control

The Company has formulated the “Wastewater Management Regulations” in accordance with the relevant regulations of the Environmental Protection Administration for water pollution control. This involves controlling industrial wastewater and following the wastewater detection and reporting forms for industrial or sewage drainage systems. Every six months, we submit reports through the Environmental Management System (EMS) for environmental protection permits. Wastewater from Plant No.2 is directly discharged to the sewage treatment plant in Chuansing Industrial Park. Plants 1 and 3 have their own wastewater treatment facilities and dedicated personnel for wastewater treatment. Through regular in-house wastewater testing operations, we ensure that the treated wastewater meets the standards before being discharged to the sewage treatment plant in Chuansing Industrial Park.

- Regulations for the use of the Chuansing Industrial Park sewage system (applicable in 2022):

Test Item	Unit	Sewage Quality Standard
Temperature	°C	Temperature Below 42° C
Hydrogen Ion Concentration Index (pH)	-	5~9
Suspended Solids (SS)	mg/L	480
Chemical Oxygen Demand (COD)	mg/L	560
Chloride Ion Paper Estimation Method	mg/L	0-2000
Zinc (Zn)	mg/L	3.5
Nickel (Ni)	mg/L	0.7
Total Chromium (Cr <sup>T</sup> )	mg/L	1.5
Fluoride (F)	mg/L	15
Grease	mg/L	50

Wastewater discharge volumes from each plant in 2022 are shown in the table below:

Plant	Plant Wastewater Discharge Volume (million liters)	By Wastewater Quality Classification Discharges (million liters)	By Discharge Destination Area Wastewater Discharges Volume (million liters)
Plant No.1	92.534	Wastewater is treated at the plant and then connected to the mains 177.177	Sewage treatment plant in Chuansing Industrial Park 178.361
Plant No.3	84.643		
Plant No.2	1.184	Raw water discharge 1.184	

Description: Discharged water from Plants 1 and 3 is calculated by flow meter at the outfall, while discharged water from Plant No.2 is calculated by tap water intake.

#### ▪ Process Flowchart for Wastewater Treatment at Plant No.1

#### ▪ Process Flowchart for Wastewater Treatment at Plant No.3

In 2022, the sampling values of wastewater from each plant are shown in the table below. Plant No.1 and Plant No.2 met the standards of the Chuansing Industrial Park sewage treatment plant, while Plant No.3 exceeded the standards for COD and oil and grease due to the discharge of excessively high concentration of wastewater on February 07, 2022. The report on the improvement of environmental safety and sanitation issues was prepared to determine the improvement and permanent measures and the case was closed on December 13, 2022.

Test Item	Unit	Plant No.1 Test Value	Plant No.2 Test Value	Plant No.3 Test Value	Sewage Quality Standard
Temperature	° C	20.2~31.9	24.9	18~34.3	Temperature Below 42° C
Hydrogen Ion Concentration Index (pH)	-	6.9~8.9	7.8	6.5~7.8	5~9
Suspended Solids (SS)	mg/L	7.6~55.5	52.7	4~357	480
Chemical Oxygen Demand (COD)	mg/L	18.9~180	183.0	21.5~3048	560
Chloride Ion Paper Estimation Method	mg/L	500~1000	500.0	500~1000	0-2000
Zinc (Zn)	mg/L	ND~2.1			3.5
Nickel (Ni)	mg/L	0.04~0.44		ND~0.25	0.7

Description:1.Plant No.1 conducted a trial run of galvanized wire in 2019, with the detection of metallic zinc beginning in February 2020. In 2022, no grease was detected.

2.For Plant No.2, annual testing is conducted, and only domestic wastewater is generated. Items marked with a slash do not require testing.

A stylized illustration of a harmonious workplace. In the center, two people are sitting on a large, grey, block-like structure, holding hands and looking at each other. Above them are two small, four-pointed stars. To the left, another person is standing and reaching up towards the structure. To the right, a person is sitting on the ground, looking up. In the background, there are more people and structures, suggesting a larger team or organization. The sky is grey with a few birds and clouds. The overall tone is positive and collaborative.

## Performance

### Highlights

Learning diversity - in 2022, the average training hours per employee reached **17.5** hours.

The average salary growth for non-supervisory full-time employees in 2022 was **4.55%**, and the median salary growth was **3.15%**.

In 2022, the return rate after maternity and parental leave was **100%**, and the retention rate was also **100%**.

Awarded the Health Promotion Badge - Accredited Healthy Workplace, by the Health Promotion Administration, Ministry of Health and Welfare, valid until 2024

There were **16** employees in ongoing positions who graduated from industry-academia collaboration programs.

## 5.1 Talent Recruitment and Retention

### 5.1.1 Industry-Academia Collaboration

To fulfill the Company's mission of nurturing talent and giving back to society, FBT established industry-academia collaboration programs with National Yunlin University of Science and Technology, National Chin-Yi University of Technology, Da-Yeh University, and Chienkuo Technology University. Since 2003, we have collaborated with National Shiou Shuei Senior Industrial High School, with a total of 123 participants to date. Currently, 16 of them are still employed. The university-industry collaboration internship program currently has one student intern. Among the past interns, three stayed in the company after internship ended and have been promoted to supervisors now, and five have become full-time engineers. In 2023, we plan to collaborate with National Huwei Agricultural and Industrial Vocational Senior High School for 3 interns. We continue to promote industry-academia collaboration, internships, and visits, utilizing school and company resources to ensure students receive practical education and training. This approach helps students adapt to the workplace, develop skills, and inherit technical knowledge, contributing to the cultivation of future talents and benefiting society.

### 5.1.2 Employee Care

#### ● Employee Structure

At the end of the year 2022, the total number of employees at our operational sites in Taiwan, China, and Vietnam were 370, 55, and 610, respectively. Among non-Vietnamese employees in Vietnam, 3 were included in the count for Taiwan operational sites. The combined total is 1,032, all of whom are full-time employees. There are no part-time employees but there are 8 directors.

## 5.1

## Talent Recruitment and Retention

## ▪ Human Resource Structure in 2022

Category	Group	Male 		Female 		Subtotal and Percentage for the Group	
		Number of People	Percentage within Group (%)	Number of People	Percentage within Group (%)	Number of People	Percentage of Total Employees (%)
Job Role	Managerial role	46	73.0%	17	27.0%	63	6.1%
	Indirect Labor	170	47.6%	187	52.4%	357	34.6%
	Direct Labor	404	66.0%	208	34.0%	612	59.3%
Work Location	Taiwan	252	68.7%	115	31.3%	367	35.6%
	China	29	52.7%	26	47.3%	55	5.3%
	Vietnam	339	55.6%	271	44.4%	610	59.1%
Age	Below 30	163	65.7%	85	34.3%	248	24.0%
	31-50	393	57.2%	294	42.8%	687	66.6%
	51 and above	64	66.0%	33	34.0%	97	9.4%
Employment Type	Full-Time Employees	620	60.1%	412	39.9%	1032	100.0%
	Interns	0	0.0%	0	0.0%	0	0.0%
Total		620	60.1%	412	39.9%	1032	100.0%

Note: 1. Formal employees refer to full-time employees under permanent employment. There are no temporary, hourly-guaranteed, or part-time employees.

2. The term "supervisor" refers to those at the managerial level and above. The data from the table show no significant changes compared to 2021.

## ▪ Distribution of Employee Education

## Stable and Healthy Workforce Structure

We emphasize gender equality and provide equal treatment for employment and promotion regardless of gender. The Company is committed that the production scale and labor demand in Taiwan can only increase but never decrease. All supervisors at our Taiwan operational sites are hired locally from the Changhua area. Most of our employees are also from the Changhua area. Only some direct labor personnel are recruited from overseas due to recruitment difficulties. In China, all (100%) supervisors are hired from China. In Vietnam, 79.3% of the managers at the division level and above are from Vietnam, and 20.7% are non-Vietnamese, with the majority being local managers.

We do not employ child labor and prohibit any form of forced labor. We treat all individuals equally regardless of region, race, nationality, religion, gender, age, social class, disabilities, family and marital status, and political affiliation,. As of 2022, no discriminatory incidents have occurred.

In a competitive market, maintaining corporate vitality and innovation consciousness is crucial, and reasonable allocation of human resources plays a significant role. In 2022, the male-to-female ratio for new employees was 18.4% to 7.5%, with an overall new hire rate of 25.87%. The male-to-female ratio for departing employees was 18.3% to 8.4%, with an overall turnover rate of 26.74%.

Number of departing employees	276				77				19				180			
End-of-Year Headcount	1032				370				55				607			

Note: Departures = Number of departures in the current year / Total number of employees at the end of the year All departures were voluntary.

The turnover rate is an important indicator for measuring internal human resource movement within a company. By examining the turnover rate, we can understand a company's attractiveness and satisfaction level for employees. Therefore, we investigate departing employees through supervisors or HR personnel, treating different types of departures differently, in order to implement appropriate improvement measures. This helps mitigate talent loss and enhance employee stability.

## Diverse Employee Development and Equal Employment Opportunities

The Company emphasizes diverse employee development and equal employment opportunities across four key areas:

(1) Caring for Local Development through Neighborly Policies:

We care about local development and actively participate in community welfare activities. We sponsor disadvantaged groups and provide good employment opportunities as part of our vision.

(2) Diverse Workforce:

Employees at our Taiwan operational sites come from various regions and nationalities. We employ 25 Thai workers, 52 Vietnamese workers, and 3 new immigrant workers. This demonstrates the flexibility of the labor market and the diversity of work patterns promoted by the Company.

(3) Vibrant and Well-Balanced Age Distribution:

In terms of age distribution, employees aged 31 to 50 account for approximately 66.6% of the total workforce. The male-to-female ratio is 6: 4.

(4) Excessive Employment of People with Disabilities:

In 2022, we were awarded the Merit Award for the Changhua County 2022 Excellent Vendor for Exceeding Employment Quota of Persons with Disabilities. To uphold the rights of people with disabilities and provide equal opportunities for their participation in the workforce, the Company is committed to improving the work environment and equipment. We aim to create a high-quality working environment for our friends with disabilities, promote their independence and development, and provide them with a sense of happiness and belonging through their work. This not only enhances our corporate culture but also creates a win-win situation by contributing to society.

### Workers who are not employees

At our Taiwan operational sites, there were 5 security personnel who were non-employee workers in 2021 and 2022. There were no hired temporary workers in 2021, but from March to August 2022, 6 temporary workers were employed as direct personnel in the production line. At the China operational sites, the number of temporary workers was 13 in 2021 and 17 in 2022, directly involved in the production line due to scheduling needs. The table below shows the number of non-employee workers at the end of 2021 and 2022.

類別	組別	2021		2022	
					
Operational Sites	Taiwan	5	0	5	0
	China	13	0	17	0
	Vietnam	0	0	0	0
	Total	18	0	22	0

## 5.2

# Talent Cultivation and Development

The foundation of the Company's sustainable operations at its Taiwan facility lies in effective employee training and adaptive development. Therefore, the Company is committed to planning and promoting an education and training system. The Company has formulated by the "Education and Training Manual", which serves as the basis for implementing the training management system. Every year, we regularly apply for the "Corporate Human Resources Enhancement Program" to conduct employee education and training. This initiative aims to strengthen the Company's overall structure while simultaneously enhancing employees' career competitiveness, fostering mutual growth and success. In 2022, the Company achieved the Talent Quality-Management System (TTQS) certification. An application for the TTQS was approved for subsidy reimbursement of NT\$164,865, with the funds being allocated in January 2023.

### ▪ Education and Training System

According to the Company's "Education and Training Management Guidelines," every new employee undergoes company regulations introduction as well as education and training in personal data protection, safety and health, and the corporate social declaration. Subsequently, they receive on-the-job training in their respective departments. For current employees, the Company provides diverse and rich learning channels and development resources based on their individual job needs, performance evaluations, and career development requirements. These resources include on-the-job training, work guidance, and job rotation. Through the Company's diverse education and training avenues, employees enhance their personal capabilities, indirectly impacting the organization's learning climate. A systematic approach ensures employees gain proficiency in skills, from the basics to mastery, making them adept at their job responsibilities. Through education and training, employee awareness of quality is elevated, reducing process defects, improving customer service efficiency, strengthening customer relationships, stabilizing revenue, accumulating sustainable company capabilities, and achieving annual goals together.

## 5.2.1 Regular Employee Performance Evaluation and Career Development

The Company has formulated the “Performance Evaluation Method” and conducts it twice annually: mid-year and year-end evaluations. The mid-year evaluation serves as a reference for the year-end appraisal. Year-end evaluation results determine year-end bonuses, salary adjustments, promotions, and the distribution of employee compensation. Employee performance evaluations are treated confidentially, and personal information is not to be disclosed. In 2022, the regular performance evaluation rate in Taiwan was 95.68%.

Gender	Direct	Number of Direct Review	Review Rate	Indirect	Number of Indirect Review	Review Rate	Managerial	Number of Managerial Employees under Review	Review Rate	Foreign Employees	Number of Foreign Employees under Review	Review Rate	Total	Number of Total Reviews	Review Rate

Description: Unassessed individuals include 1 chairperson, 1 consultant, and 1 deputy manager, totaling 3 individuals.

## 5.2 Talent Cultivation and Development

ssment Form” to each unit supervisor to register the new items of direct online training for his/her staff and evaluate the proficiency level. It serves as a reference for adjusting training and gauging individual training effectiveness while evaluating employees’ future career development abilities. For employee career development, a variety of training courses are offered and linked to job promotions as assessment criteria. For instance, entry-level management training, time management and meeting operation skills, and presentation skills are criteria for promoting to manager or specialist positions.

Each supervisor possesses deep professional knowledge and skills. To foster their management and leadership capabilities, the Company introduced the Dale Carnegie Leadership Training Course in March 2012. This training aims to enhance supervisory management skills. Based on operational demands throughout the year and the Company’s dedication to nurturing quality talents, periodic participation in the “Carnegie Manager Leadership Course” and “Carnegie Effective Communication and Interpersonal Relationship Course” training is organized. However, due to the impact of the pandemic in 2022, training assignments were postponed and adjusted to internal specialized training. In 2022, two classes of “Carnegie Cohesive Communication and Cohesion Training Course” were held. It is planned that two classes of “Carnegie Cohesive Communication and Cohesion Training Course” and one class of “Carnegie Manager Leadership Course” will be held in 2023.

Carnegie Courses in 2022		Accumulated Participants Up to 2022
Course title	Number of Participants	
Carnegie General Manager Excellence Course	0	1
Carnegie Manager Leadership Course	0	4

▲ Dale Carnegie Course\_Cohesive Communication and Cohesion Training - 2022 Class 2

## 5.2.2 Employee Learning and Effectiveness

The Company conducts an annual education and training plan survey to identify competency gaps across various job levels. It then formulates yearly training plans and objectives. In 2022, the Company organized a total of 416 training sessions at its Taiwan operational sites, with the participation of 6,610 individuals. Among them, training hours for new immigrants amounted to 30 hours, foreign workers accumulated 246 hours, and training for individuals with disabilities reached 171 hours. The total training hours for all employees were a total of 14,678.5 hours. For female managerial roles, accounting supervisors are required to pursue annual professional development to meet specified legal hours. In 2022, the training hours for these roles totaled 231 hours, accounting for 15.18% of training hours for female managers and 3.99% of overall managerial training hours. Consequently, the training hours for female managers exceeded those for male employees. At Suzhou Fine Blanking & Tool, an operational site in China, 174 individuals attended training, accumulating 1,061 training hours. At GSK Vietnam, an operational site in Vietnam, 1,351 individuals participated in training, with a cumulative training time of 2,321 hours. Combining training efforts across Taiwan and its overseas subsidiaries, the total training hours amounted to 18,060.5 hours, successfully achieving the 2022 training objectives.

Initiatives like team-building camps enhance employee morale and cohesion. Regular health seminars provide employees insights on maintaining a healthy lifestyle beyond working hours. As per the annual Environmental Safety and Health Plan, new and existing employees undergo environment, safety, and health education training. This equips employees with knowledge on how to protect themselves while working on-site, mitigating the risks of occupational accidents. Through education and training, employee awareness is elevated, leading to a reduction in process defects. This in turn improves customer service efficiency and strengthens customer relationships, ultimately stabilizing revenue and contributing to the Company's sustainable capabilities, thereby achieving annual goals.

Data from 2022 below demonstrates no significant difference in training hours between male and female employees, validating the Company's non-discriminatory approach to talent development. The Company aims to provide diverse learning channels to enable employees to enhance their professional skills.

Taiwan employees possess professional certifications such as Occupational Safety and Health Managers, crane operation, and forklift operation. A total of 114 employees hold 236 professional certification certificates.

The combined statistics for 2022 education and training are presented in the chart below:

### ▪ Education and Training Statistics in 2022

Course Category	Number of Courses	Training Hours	Number of Participants
<b>Management</b>	55	5,345.0	1,547
<b>Administrative and Financial</b>	72	1,048.5	110
<b>Functional Sales and Marketing</b>	22	110.0	65
<b>Logistics and Production Management</b>	192	5,017.5	3,772

## 5.2

# Talent Cultivation and Development

Course Category	Number of Courses	Training Hours	Number of Participants

Education and Training Analysis Chart and Classroom Implementation Photos at Taiwan Operational Sites in 2022:

### ▪ Training Status of Male Employees in 2022

Job Category	Number of people	Hours	Average
<b>Management Role</b>	25	4,258.5	170.34
<b>Indirect Labor</b>	85	3,172.5	37.32
<b>Direct Labor</b>	185	1,855.5	10.03
<b>Total</b>	<b>295</b>	<b>9,286.5</b>	<b>31.48</b>

### ▪ Training Status of Female

Job Category	Number of people	Hours	Average
<b>Management Role</b>	5	1,521.5	304.30
<b>Indirect Labor</b>	84	2808	33.43
<b>Direct Labor</b>	55	1,062.5	19.32
<b>Total</b>	<b>144</b>	<b>5392</b>	<b>37.44</b>

### ■ Training Status of Male and Female Employees - Average

Description:1.The training participant count includes employees who left during 2022, which is why the number of training participants is greater than the year-end headcount for 2022.

2.For female managers, training hours are predominantly for legally mandated courses. Female direct employees have more quality inspection roles, leading to more quality training courses. The training hours for male indirect employees are higher due to occupational safety and health retraining courses.

		New Immigrants	Foreign Workers	Employees with Disabilities	General	Total
Male	Number of People	0	99	7	189	295
	Hours	0	246	243	8,797.5	9,286.5
Female	Number of People	5	0	0	139	144
	Hours	30	0	0	5,362.0	5,392.0
Total	Number of People	5	99	7	328	439
	Hours	30	246	243	14,159.5	14,678.5
Average		6.0	2.48	34.71	43.17	33.44

Description:The training for new immigrants and foreign workers is mainly on-service labor safety and health education training and internal Standard Operating Procedures (SOP) or One Point Lesson (OPL) training, but there are no other types of courses, so the number of hours of training is relatively small.

	Results of Management Policy Evaluation	<ol style="list-style-type: none"> <li>1. The average employee benefit expenses at Taiwan operational sites in 2022 and 2021 were NT\$705,000 and NT\$672,000 respectively, with a growth of 6.1%.</li> <li>2. The average annual salary for non-supervisory full-time employees at Taiwan operational sites in 2022 and 2021 was NT\$574,000 and NT\$549,000 respectively, representing an increase of NT\$25,000, with a growth of 4.55%.</li> </ol>
	Management Policy Adjustments	We have set targets for the net income after tax for the five years starting from 2022, and will continue to maximize the benefits for the Company and its stakeholders in the future.

### 5.3.1 Employee Salaries

For the Company's Taiwan operational sites, based on regulations such as the "Remuneration Committee Organizational Regulations," "Directors' Remuneration and Employees' Remuneration Approval and Issuance Rules," "Year-End Bonus Management Rules," "Salary Management Regulations," and "Employee Pension Management Regulations," the total compensation for the highest governing body members comprises fixed and variable pay based on performance. The remuneration of high-level personnel is correlated with business performance. According to the Company's Articles of Incorporation, if the Company generates profits based on yearly performance, at least 2% should be allocated as employee compensation, not exceeding 5% for director remuneration. These matters must be approved by the Remuneration Committee and the Board of Directors, with reporting to shareholders and subject to stakeholder oversight.

## 5.3

## Remuneration and Benefits

In terms of retirement benefits, high-level managers do not receive different benefits compared to other employees. Regarding the remuneration of directors and senior executives, apart from being determined by the Remuneration Committee in accordance with the law, relevant information has been disclosed in the 2022 annual report to ensure transparency for all stakeholders. Shareholders can express their opinions through the annual report or contact points on the Company's website.

The Company upholds the philosophy that employees are its most valuable assets. With the concept of taking care of the welfare of employees and the interests of shareholders, we provide the most competitive overall salary to attract and retain the best talents. Employee compensation will not differ based on factors such as gender, religion, race, nationality, or political affiliation. The salary standards for both male and female employees in the Company are the same. The salary-to-base pay ratio for male and female employees in entry-level positions is 1:1. The Company rewards an introduction bonus of NT\$3,000 to employees who have worked for at least six months. An additional bonus of NT\$3,000 is given after one year.

The multiplier for the total salary of the President and total employee compensation, as well as the percentage increase, is shown in the table below:

Year	President's Total Salary Compared to the Previous Year	Other Employees' Total Salary Compared to the Previous Year	Multiplier for the Total Salary of the President and Other Employees	Multiplier for the Total Salary of the President and Other Employees, and Percentage Increase
2021	30%	14%	6-7 times	2~3 times
2022	15%	4%	7~8 times	3~4 times

Description: Salary components include wages, year-end bonuses, employee compensation, referral bonuses, exemplary employee bonuses, and senior employee bonuses.

Description: Salary components include wages, year-end bonuses, employee compensation, referral bonuses, exemplary employee bonuses, and senior employee bonuses.

The Company's employee salaries are determined based on education, experience, individual professional competence, and job performance. There will be no differences due to factors like gender, religion, race, nationality, and political affiliation. Salary and labor conditions fully comply with local labor laws and international human rights conventions.

Female and Male Compensation Ratios:

Job Role	Female/Male Ratio	Reasons for Lower Female Compensation Ratio
General Employees	1:1.15	No rotational or night shift allowance
Section Chief	1:1.12	Fewer years of service, smaller number of employees, predominantly working in indirect units
Division Chief	1:1.12	Fewer years of service, smaller number of employees, predominantly working in indirect units
Managers and above	1:1.29	Predominantly male, including President and Executive Vice-President

For the Company's Taiwan operational sites, in 2022 and 2021, the annual average number of non-supervisory full-time employees as per competent authority regulations was 332 and 346, respectively, indicating a decrease of 14 individuals. The average annual salary for these non-supervisory full-time employees in 2022 was NT\$574,000, compared to NT\$549,000 in 2021, representing an increase of NT\$25,000. The median annual salary for non-supervisory employees in 2022 was NT\$524,000 compared to NT\$508,000 in 2021, showing an increase of NT\$16,000.

#### Statistics of Benefits Costs for Non-Supervisory Full-time Employees:

Unit: Person/Amount (NTD)

Item	2021 (A)	2022 (B)	Difference (=B-A)
Number of full-time employees	346	332	-14
Average Salary/Person/Month	45,782	47,798	2,016
Median Salary/Person/Month	42,295	43,657	1,362

## 5.3

# Remuneration and Benefits

### 5.3.2 Employee Benefits

For the Taiwan operational sites, the Company provides comprehensive benefits for local full-time employees, including base salary, bonuses, employee compensation, retirement benefits, and other perks. Comprehensive Employee Insurance Plans: The Company provides comprehensive insurance coverage for all employees, including labor insurance, National Health Insurance, and group accident insurance. This coverage starts from the day of joining the Company, ensuring that employees are well protected.

Attractive Compensation System: The Company allocates year-end bonuses based on revenue ratios every month, and annual employee compensation is provided according to the Company's regulations.

#### Other Benefits: The Employee Welfare Committee provides various welfare measures.

- ▶ Holiday Bonus: Bonuses are provided based on seniority.
- ▶ Birthday Bonus: Gift vouchers and small gifts are given.
- ▶ Childbirth Bonus: Employees or their spouses receive a bonus of NT\$3,000 along with congratulatory gifts upon childbirth.
- ▶ Marriage Bonus: Bonuses are provided based on seniority.
- ▶ Funeral Consolation Money: Consolation money are given based on the level of kinship.
- ▶ Housewarming Celebration: Bonuses are provided based on job title and seniority.
- ▶ Domestic Travel
- ▶ Labor Day Activities
- ▶ Departmental meals are subsidized once per quarter.
- ▶ Emergency Aid
- ▶ Discount benefits from over 1,000 affiliated stores
- ▶ Employee travel

Note: In 2022, due to the pandemic, employee travel and Labor Day activities were canceled. Instead, travel allowances were provided.

### 5.3.3 Comprehensive Pension Scheme

Based on the "Labor Standards Act" and the "Labor Pension Act," the Company's Taiwan operational sites have established the Employee Retirement Regulations. The Company has a sound financial system in place to provide stable retirement withdrawal and payment. Professional actuaries assess the retirement reserve annually to ensure sufficient withdrawal and payment funding for future retirement benefits, protecting the rights of employees who will claim retirement benefits.

#### Retirement pension based on Labor Standards Act

Retirement benefits are calculated based on employee years of service and the average salary during the last six months before retirement. As of the end of 2022, the old system's retirement reserve amount was NT\$374,808 (cumulative account balance of NT\$8,929,515).

#### Retirement pension based on Labor Pension Act

Retirement benefits are accrued by contributing 6% of each employee's monthly salary to an individual account. In 2022, the new system's retirement reserve amount was NT\$7,964,526.

### ▪ Retirement Planning at Different Operational Sites

#### Taiwan

Establishment of a “Labor Retirement Reserve Supervisory Committee” with a majority of labor representatives. Monthly contributions of 2% of the total monthly salary. Implementation of the new pension system since July 2005, allowing employees to contribute 6% of their full salary to their personal accounts while retaining years of service under the old system. Pension benefits will be provided according to the law upon retirement. Pension benefits cover 100% of employees.

#### China

Participation in social insurance according to the “Social Insurance Law,” with old-age insurance contributing to retirement benefits. Monthly contributions amount to 42% of the total monthly salary. Pension benefits cover 100% of employees.

#### Vietnam

Entitlement to retirement benefits as per the “Law on Social Insurance,” calculated based on the total salary paid for social insurance premiums, with 21.5% being contributed to social insurance. Pension benefits cover 100% of employees.

## 5.3.4 Friendly Workplace and Childcare

For the Taiwan operational sites, the Company promotes gender equality and supports the needs of employees by offering unpaid parental leave for all employees with children under three years of age. In 2022, 5 male and 6 female employees in Taiwan were eligible for parental leave. Only 1 female employee actually applied for the leave. Due to cultural differences, no employees applied for parental leave in overseas locations. Return-to-Work and Retention Rates:

	Male	Female	Total
Number of employees applied for unpaid parental leave in 2022	0	1	1
Number of employees expected to return from unpaid parental leave in 2022 (A)	0	4	4
Number of employees expected to return from unpaid parental leave in 2022 and actually returned (B)	0	4	4
Reinstatement Rate (B/A)	—	100%	100%
Number of employees applied for unpaid parental leave in 2021, and has been employed for over a year (C)	0	1	1
Number of employees applied for unpaid parental leave in 2021 and actually returned (D)	0	1	1
Retention Rate (C/D)	—	100%	100%

Continuously promote TPM improvement activities.</li> </ol>

## 5.4 Occupational Health and Safety

The Company has established an employee health management platform to continually optimize the system, allowing for E-based health self-management, health checkup inquiries, epidemic prevention information, and health promotion messaging. The system uses an intranet and designated area Wi-Fi connection, with employees logging in using personal accounts and passwords to ensure data protection and information security.

In 2022, the Company continued to participate in the Ministry of Labor's National Workplace Safety and Health Week activity series and received a participation certificate issued by the Occupational Safety and Health Administration.

### 5.4.1 Health Protection

Employees are crucial assets to the Company, and as such, the Company places special emphasis on their health and well-being. In addition to regular health examinations held in accordance with regulations such as the Labor Health Protection Regulations, employees under the age of 65 undergo regular general health checks every three years, exceeding regulatory requirements. Senior executives undergo advanced health checks every two years. In addition to the routine health checks, special health checks for employees engaged in jobs with specific health hazards are conducted annually. These hazardous jobs include tasks involving noise, chromic acid, dust, nickel, hexane, benzene, and other categories, in compliance with regulations. The status of employees working in environments with specific health hazards in 2022 is shown in the following chart.

#### Number of People Engaged in Special Hazardous Health Operations

#### Number of Checks for Hazardous Jobs

Employees exposed to chemicals are provided with appropriate protective equipment and measures. For example, the use of cleaning agents containing hexane has been replaced with cleaning agents containing lower-hazard heptane due to health risks. Work sites where tasks involving dust, chromic acid, nickel, and benzene are performed are equipped with local exhaust systems to protect employee health. Apart from protection for workers engaged in jobs with specific health hazards, health protection measures also target individuals at high risk for cardiovascular diseases. Health protection measures also involve identifying and assessing high-risk groups among employees aged 45 and above and those engaged in shift work. Consultations with physicians are provided for those in high and moderate-risk categories.

#### ▪ Photo Highlights of Health Checks

▼ Health Check - Height and Weight Measurement

▲ Health Check - Lung Function Test

▼ Health Check - Hearing Test

## 5.4.2 Health Consultation

Since June 2012, the Company has employed a certified occupational health physician who visits the factory every month to provide services. Since March 2017, a physical therapist has been stationed on-site to provide physical therapy services, and since August 2017, a psychological counselor has provided monthly counseling services. Based on health check results and data from the employee health management platform, the factory nurse schedules consultations with the physician, physical therapist, and psychological counselor to provide health-related services. In 2022, a total of 365 consultations were provided, covering areas such as hearing protection, abnormal workload, maternal protection, human factors engineering, injury and illness care, general counseling, physical therapy, and psychological counseling.

## 5.4.3 Healthy Environment

The healthy environment is equipped with tools such as body scales, blood pressure monitors, and tape measures to provide employees with the means to understand their health status at any time. A lactation room is also available to support breastfeeding employees. The Company received recognition in the Changhua County 2016 Friendly Breastfeeding Room Competition, achieving outstanding performance in the workplace category. The Company has also received the Friendly Breastfeeding Room certification from Changhua County (2020 to 2023). Additionally, an Automatic External Defibrillator (AED) is available to respond to unforeseen emergencies.

## 5.4 Occupational Health and Safety

### 5.4.4 Worker Health

#### ● Health Promoting Activities

Health promotion has become an integral part of the Company's culture, and various health promotion activities are regularly organized. Activities include daily morning exercises, monthly self-health management measurements for weight, blood pressure, and waist circumference, as well as quarterly health promotion series events with different themes. These events include fun competitions such as ping-pong bingo, darts shooting, and ball tossing. These activities help relieve stress, promote health, and provide incentives to encourage employee participation. Winners of self-health management activities are recognized during the Company's monthly all-staff meetings. Annual events, such as blood donation drives and year-end banquets, are organized. In 2022, due to the pandemic, the Labor Day event was temporarily suspended.

In March 2009, the Company purchased a group golf membership card from Nan Fong International Co., Ltd. This not only strengthened relations with customers and suppliers but also included quarterly group employee golf tournaments as part of a leisure fitness initiative. This also provides employees with another avenue for leisure and fitness activities and offers related courses to promote health.

## ● Health and Safety Education

New and existing employees receive annual safety and health courses to enhance their basic knowledge of workplace safety. The Company also offers stress-relief courses and health lectures throughout the year. In 2022, various courses were offered, covering topics such as creative wire crafts - pea-shaped hanging ornament / tortoise shell netting (including plants) / romantic sky garden (including succulent hanging baskets) / bird's nest (including chains), "You're not fat, you just don't know that you can control your weight - fat loss concept lecture," "Impact of Heavy Metal on Daily Life," "Invisible Occupational Injuries - Let's Talk about Workplace Bullying," "Enhancing the Immune System in the Post-Pandemic Era," "The Devil is in the Details of Food Labels," as well as environmental safety and hygiene education training and other education and training for personnel. Health-related information is posted regularly through health posters and activity posters. Employees also receive emails from time to time containing health-related knowledge, while a health information system was introduced in 2016 to continually optimize the new version of the health management platform. We continue to establish another interactive knowledge platform with our employees, providing health e-information, e-health self-management, health checkups and inquiries, epidemic prevention information, and health promotion messages to strengthen employee' awareness of epidemic prevention and health.

The system uses an intranet and designated area Wi-Fi connection, with employees logging in using personal accounts and passwords to ensure data protection and information security.

### ▪ Health Information System

## 5.4 Occupational Health and Safety

### ● Emerging Infectious Disease Preparedness

The Company has a dedicated occupational health and safety unit (Safety Management Office) responsible for monitoring emerging infectious diseases. Based on past epidemic experiences, such as the H1N1 influenza outbreak in 2009, and considering the current threat posed by COVID-19, the Company assesses potential impacts and develops an infectious disease epidemic prevention and response plan tailored to the workplace. In the event of an emerging infectious disease threat, the Company follows the epidemic prevention measures issued by the Taiwan's Centers for Disease Control. An "Epidemic Prevention Emergency Response Team" will also be immediately convened to formulate epidemic prevention strategies. These strategies include educating employees about prevention and response, providing guidance to management, setting guidelines for sick leave processing, and installing hand sanitizer facilities. The team is also responsible for monitoring employees' sick leave status and developing a business continuity plan to address the impact of staff shortages.

Preventive measures include:

- ★ Temperature checks for those entering the premises, individuals with a temperature exceeding 37.5°C are politely declined entry and advised to seek medical attention promptly.
- ★ For on-site operations, office work, and meetings, guidelines include wearing masks, frequent handwashing, maintaining social distance, practicing respiratory hygiene, and observing cough etiquette.
- ★ Communal meals are replaced with individually packed meals to ensure staggered dining time. Conversation during meals is discouraged. Restaurants feature cubicle seating with partitions, and daily cleaning and disinfection are carried out by the catering company.
- ★ Large gatherings involving all employees are transformed into events attended by senior-level managers and above. A distancing of at least 1 meter and mask-wearing are mandated. (According to the Centers for Disease Control guidelines for Level 3 and Level 4 alerts, large gatherings are to be canceled.)
- ★ Dormitories for foreign employees undergoing health self-management are provided with separate rooms and individual dining arrangements. Dormitory supervisors record temperature readings in the morning and evening. If an employee feels unwell, an on-site translation staff, wearing masks throughout, arranges for a medical visit.
- ★ For Taiwanese employees undergoing health self-management, factory nurses record temperature readings in the morning and evening and arrange immediate medical attention for those feeling unwell.
- ★ Unnecessary domestic and international business trips are reduced, and employees are advised to wash hands frequently, wear masks, and maintain social distancing.
- ★ 75% medical alcohol hand sanitizers are provided at the entrances of various factories, the main switchboard, and the cafeteria.
- ★ Continuous collection of information related to epidemic situations and epidemic prevention is utilized for internal employee education and dissemination through announcements and news tickers.
- ★ Epidemic prevention drills are conducted, and individuals with suspected symptoms are required to report to the designated department (1922 hotline), initiating the epidemic prevention contingency plan.

## 5.4.5 Healthy Workplace Certification

The Company's Safety Management Office is responsible for applying for health workplace certification. In November 2012, the Company received the "Badge of Self-Accredited Healthy Workplace" and the "Happy Workplace Health Award" from the Health Promotion Administration. In 2015, 2018, and 2021, we were approved for the "Badge of Accredited Healthy Workplace" by the Health Promotion Administration, Ministry of Health and Welfare (certificate valid for 3 years, from January 1, 2016, to December 31, 2024).

## 5.4.6 Worker Safety Management

### ● Occupational Health and Safety Certification

Providing a safe working environment for employees has been a continuous goal of the Company. We continue with the implementation of the occupational safety and health management system. Since 2009, the Company has obtained TOSHMS (CNS15506) and OHSAS 18001 occupational safety and health management system certifications. In 2019, the Company obtained CNS 45001:2018 and ISO 45001:2018 version transition certification. In 2022, a re-assessment certification was obtained to ensure the continuous operation of the system.

The occupational safety and health management system covers activities, products, and services that can affect occupational safety and health performance, within the Company's control or influence. Workers include employees (362 individuals), security personnel, and catering staff (7 individuals). The ratio of employees to non-employees is approximately 52: 1.

### ● Hazard Identification, Risk Assessment, and Incident Investigation

Routine and non-routine occupational hazard identification and risk assessment are conducted by the environmental safety key members and supervisors of various units, who have received training based on ISO 45001 (Hazard Identification). Qualified verifiers execute the internal "Hazard Identification and Risk Assessment Management Procedures" to enhance the safety and health awareness among all levels of workers. Hazard identification and risk assessment are carried out proactively and continuously for potential safety and health hazards related to operational activities, products, and service processes. This process aims to assess safety and health risks and opportunities, striving for zero accidents. Through continuous hazard identification and risk assessment, opportunities to eliminate or reduce safety and health risks are identified to achieve the safety and health policy and meet continuous improvement requirements.

## 5.4 Occupational Health and Safety

Occupational accident investigations are carried out according to the internal “Incident Investigation Management Procedures.” This involves unit supervisors, operational personnel, employee representatives, the Safety Management Office, and other relevant professionals. Effective corrective and preventive measures are taken to ensure safety and health management performance. Workers are encouraged to report near-miss incidents and observations of safety actions. An incentive system tied to the “Improvement Proposal Management Procedures” is used to promote full staff participation.

### ● Safety and Health Meetings

In addition to the Occupational Safety and Health Committee, which meets at least once every three months, the “Environmental Safety Subdivision Committee” is held monthly, involving labor representatives from various units. This is conducted based on Article 12 of the Occupational Safety and Health Act. Representatives from each unit are responsible for identifying unsafe environments or unsafe behaviors related to work within their respective units and present these for review and improvement at the meetings. Occupational safety and health-related information is provided through digital learning platforms or bulletin boards. The operation level of the aforementioned Occupational Safety and Health Committee includes top management and labor representatives from various departments, up to the President. There are a total of 10 labor representative members on the committee, accounting for 40% of the total committee members.

### ● Safety Environment

In addition to self-conducted environmental testing each year, external operational environment monitoring is also regularly outsourced. Regular inspections of hazardous machinery or equipment within the factory are also conducted. Weekly safety and health inspections, fire safety inspections, and notification of deficiencies and follow-up improvements are carried out. Monthly incidents of near-miss events are investigated, and operational safety observations are implemented to ensure a safe working environment for employees.

### ● Safety Drills

In addition to necessary safety and health education training, an emergency response drill plan was scheduled in 2022, with a total of 13 items regularly included in the drill. This ensures that employees are prepared to handle and respond to incidents. The Company has also joined the regional joint defense organization of Chuansing Industrial Park and the Central Taiwan Joint Defense Organization for Toxic Chemical Substances. We regularly participate in meetings and drills and intermittently updates the Company’s joint defense organization network information.

**Emergency Response Training -  
Fire Fighting Training**

**Personal Protective  
Equipment Training**

## ● Safety Performance

In alignment with the Occupational Safety and Health Management Plan, regular environmental and workplace inspections are conducted. Self-care systems, responsibility care systems, contractor management, toxic chemical substance management, and emergency drills are promoted. Through the systematic application of the PDCA spirit, continuous improvement is pursued. In addition to compliance with laws and customer requirements, multiple environmental safety and health goals, targets, and plans are developed annually through system operations such as environmental assessment and hazard identification, fostering continuous improvement. Hazard prevention measures for all workers are implemented, aiming to achieve the highest goal of zero occupational injuries.

### Worker Participation and Consultation

#### Occupational Safety and Health Committee

The committee comprises 25 members and holds quarterly meetings. The President serves as the Chairperson. Labor representatives are elected from various departments, totaling 10 members, accounting for 40% of the committee.

#### Labor-Management Meetings

A total of 11 representatives from labor and management sides hold quarterly meetings to coordinate labor-management relations, promote labor-management cooperation, and address labor conditions. (Details can be found in section 5.5.4)

#### TPM Environmental and Safety Subcommittees

The subcommittee consists of 13 members, with the Safety Management Office manager serving as chairman and the section chief serving as executive secretary. Labor representatives from each department are also ex-officio members. Monthly meetings are held to promote occupational safety management programs.

### Occupational Safety and Health Training, Emergency Response, and Promotion

#### New and Existing Employee Education

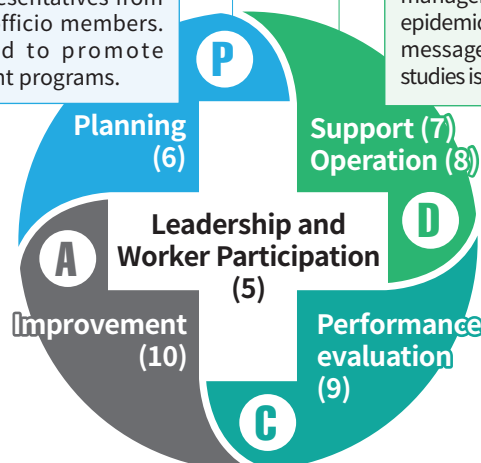

- ▶ General safety and health education and training.
- ▶ Special operation education and training.
- ▶ General education on Regulations for the Labeling and Hazard Communication of Hazardous Chemicals.
- ▶ Defensive driving training for traffic safety.
- ▶ Health stress relief seminars.

#### Emergency Response Drills

Annually, at least one simulation or test is conducted for relevant emergency response plans. Designated units simulate or test based on the emergency response plan and record the results (e.g., epidemic response drills, protective equipment drills, self-defense fire drills, chemical leak response drills, etc.).

#### Safety and Health Promotion

Using digital learning platforms and health management platforms, continuous promotion of epidemic prevention information, health promotion messages, and relevant occupational safety case studies is carried out.

## 5.4 Occupational Health and Safety

Organize strategies and measures for addressing and managing occupational safety and health risks and opportunities. To establish the identification of occupational safety and health issues and risks and opportunities related to workers and stakeholders, to respond to changes in occupational safety and health risks and opportunities, and to assess and manage such risks and opportunities. Countermeasures and control measures are taken in advance, as shown in the table below:

Identification Method	
The Risk Management Committee is responsible for collecting internal and external issues related to risk or opportunities, workers, and stakeholders on a regular basis or when specific organizational changes occur. Material issues and corresponding measures are identified through risk and opportunity assessment. Objectives, plan proposals, and implementation status feedback are presented to the organization.	
Risk or Opportunity Topics	
Safety Protective Equipment	Health Management / Health Promotion
Reason	
Safety protective equipment may be modified or removed, resulting in the loss of the original safety protection mechanism.	In accordance with guidelines issued by the Ministry of Labor, the 2023 prevention plan for occupational hazards due to human factors, prevention plan for diseases triggered by abnormal workloads, workplace maternity protection plan, hearing protection plan, and measures to prevent illegal infringement during job execution are implemented.
Targets in 2023	
<ul style="list-style-type: none"> <li>▶ 0 cases of occupational safety incidents</li> <li>▶ 100% Safety and health inspections and fire improvement</li> </ul>	Health management achievement rate: 97%
Countermeasures or Control Measures	
<ul style="list-style-type: none"> <li>▶ Special education on safety protective equipment for new and existing employees</li> <li>▶ Safety protective equipment point checks conducted by workers</li> <li>▶ Safety protective equipment inspections conducted by Safety Management Office and Facilities Safety Management Division</li> <li>▶ Continuously promote TPM improvement activities</li> </ul>	<ul style="list-style-type: none"> <li>▶ Execution of annual workplace health promotion activities, health management plans, and the four major plans</li> <li>▶ Daily health promotion morning exercise</li> <li>▶ Monthly self-measurement of weight, blood pressure, and waist circumference for health management</li> <li>▶ Quarterly series of health promotion events with different themes</li> <li>▶ Monthly on-site services by company doctors, physical therapists, and counseling psychologists</li> </ul>
2022 Performance	
<ul style="list-style-type: none"> <li>▶ 0 cases of occupational safety incidents</li> <li>▶ 100% Safety and health inspections and fire improvement</li> </ul>	Health management achievement rate: 98.1%

▪ **Achievement Rate of FBT Occupational Safety and Health Goals: 2020-2022 and 2023 Targets**

Goal	Achievement in 2020	Achievement in 2020	Achievement in 2020	Targets in 2023
<b>Safety and health inspections and fire improvement</b>	100%	100%	<b>100%</b>	<b>100%</b>
<b>Achievement rate of safety observation and near-miss accident investigations</b>	(99/60 cases) 100%	(83/60 cases) 100%	<b>(77/60 cases) 100%</b>	<b>60 cases/year</b>
<b>Achievement rate of health management tracking for health promotion</b>	(97.8/97%) 100%	(98.4/97%) 100%	<b>(98.1/97%) 100%</b>	<b>97% ↑</b>

The company implements an occupational safety and health management system, and the safety and health performance is as follows (excluding traffic incidents).

Year	Category	Work Hours	Number of Fatalities	Number of Permanent Disabilities	Death Rate (Note 1)	Severe Occupational Injury Rate (Note 2)	Disabling Frequency Rate (Note 3)	Total Recordable Injury Frequency Rate (TRIFR) (Note 4)
<b>2019</b>	Employees	792,202	0	0	0	0	0	0
	Contractors	19,488	0	0	0	0	0	0
<b>2020</b>	Employees	749,784	0	0	0	0	0	0
	Contractors	19,552	0	0	0	0	0	0
<b>2021</b>	Employees	793,186	0	0	0	0	0	0
	Contractors	19,560	0	0	0	0	0	0
<b>2022</b>	Employees	768,465	0	0	0	0	0	0
	Contractors	19,384	0	0	0	0	0	0

Note 1: Death Rate is calculated as the number of deaths per one million working hours: (Number of deaths from occupational injuries) x 1,000,000 / Total working hours

Note 2: Severe Occupational Injury Rate is calculated as the number of disabilities (excluding deaths) per one million working hours: (Number of disabled cases) x 1,000,000 / Total working hours

Note 3: Disabling Frequency Rate (FR) is calculated as the number of disabilities (including deaths) per one million working hours: (Number of disabled cases + Number of deaths) x 1,000,000 / Total working hours

Note 4: Total Recordable Injury Frequency Rate (TRIFR): calculated as the number of recordable occupational injuries per one million working hours, including deaths and disabled cases: (Number of recordable injuries x) 1,000,000 / Total working hours.

## 5.4 Occupational Health and Safety

### ▪ 2022 FBT Occupational Injury and Illness Incident Statistics (Excluding Commuting Accidents)

Item	Male	Female	Male Contractors	Female Contractors
Work-related injuries (cases)	0	0	0	0
Occupational deaths (cases)	0	0	0	0
Occupational diseases (cases)	0	0	0	0
Lost workdays (days)	0	0	0	0
Occupational Disease Incidence Rate (%)	0%	0%	0%	0%
Sick Leave Days (days)	265	154	-	-
Absentee Rate (%)	0.43%	0.54%	-	-
Disabling Frequency Rate (FR)	0.00	0.00	0.00	0.00
Disabling Injury Severity Rate (SR)	0.00	0.00	0.00	0.00
Frequency-Severity Indicator (FSI)	0.00	0.00	0.00	0.00

Note: 1. Severe Injury Rate (SR) = Number of days of severe injuries x One million working hours / Total accumulated working hours.

2. Frequency-Severity Indicator (FSI) =  $\sqrt{(FR \times SR) \div 1000}$ .

3. Occupational Disease Incidence Rate = Number of occupational disease cases x One million working hours / Total accumulated working hours.

4. Absence Rate = (Total number of days absent ÷ Total work hours) × 100%.

5. Absentee: Employees absent due to loss of labor capacity, excluding work injuries or illnesses. It does not include statutory holidays such as national holidays, official leave, maternity leave (and paternity leave), bereavement leave, and marriage leave. Only sick leave and work injury leave data are counted.

6. Contracted male employees refer to on-site security personnel, and contracted female employees refer to catering and cleaning personnel. If on-site personnel take leave, the contracted unit will send a representative, so the absence rate is not included in the statistics.

7. No occupational accidents occurred in 2022.

8. Occupational injury types: refer to the Occupational Safety and Health Administration, Ministry of Labor website <https://statdb.mol.gov.tw/html/com/st0803.html> for classification.

9. Occupational disease types: refer to the Occupational Safety and Health Administration, Ministry of Labor website <https://www.osha.gov.tw/48110/48363/133456/48395/nodelist> for classification.

## 5.5

## Human Rights and Communication

The Company upholds its core value of “Inclusive Growth” and supports the United Nations Universal Declaration of Human Rights (UDHR) and related international concepts of respecting human rights. At the same time, we adhere to the local regulations of all global operating locations, and treat all employees with dignity and respect. The Company adheres to various labor laws and relevant regulations, with no major violations or labor disputes in 2022.

## 5.5.1 Human Rights Protection Training

At the Taiwan operational sites, we launched diverse human rights protection training programs in 2022, including factory safety and health, emergency response, and first aid training. The total training hours amounted to 1,714 hours, with a total of 594 employees completing the training, accounting for 100% of the total workforce, with a total participation of 6,610 times.

## 5.5.2 Human Rights Concerns and Practices

Topics	Subject	Approach	High-Risk Count
<b>Provide a Safe, Healthy, and Harassment-Free Working Environment</b>	All employees	<ul style="list-style-type: none"> <li>▶ Implement occupational disease prevention and promote employees' physical and mental well-being.</li> <li>▶ Manage risks associated with specific harmful working environments.</li> <li>▶ Provide medical consultation services.</li> <li>▶ Set up an employee complaint mailbox.</li> </ul>	0
<b>Diverse Employment and Elimination of Unlawful Discrimination</b>	Newly Hired Employees	<ul style="list-style-type: none"> <li>▶ Adhere to government labor laws, internal regulations, and policies.</li> <li>▶ Follow international human rights conventions, such as gender equality, labor rights, and prohibition of discrimination, respecting employees of different cultures and beliefs.</li> <li>▶ Provide recruitment training for supervisors on “talent acquisition” and remind them of interview considerations.</li> <li>▶ Advertise job openings externally with no discriminatory qualification requirements to ensure equal job opportunities.</li> </ul>	0
<b>Prohibition of forced labor and child labor</b>	All employees Newly Hired Employees	<ul style="list-style-type: none"> <li>▶ Adhere to government labor laws, not coercing or compelling any unwilling individuals to perform labor. Clearly stipulate in work rules that overtime requires employee consent and can be applied for overtime pay as required by law.</li> <li>▶ Never employ involuntary workers or individuals under the age of 16. Use employment notifications to fully explain the rights, obligations, and benefits of the employed party, maintaining an equal and transparent employment relationship."</li> </ul>	0

## 5.5

# Human Rights and Communication

Topics	Subject	Approach	High-Risk Count

## 5.5.4 Labor-Management Meetings, Employee Welfare Committee, and Unions

The Company's Taiwan operational sites have not established a union, but labor-management meetings are held quarterly according to the Labor Standards Act. Employee Welfare Committee meetings are held quarterly according to the "Employee Welfare Management Regulations." Labor-management meetings and Employee Welfare Committee have representatives from each unit, and these committee representatives communicate and disseminate all welfare information to employees.

The China operational sites have established a union, with members elected by employees. The union members then internally elect a president, vice president, and committee members. In 2022, the union covered all employees in the region, accounting for 100% of the total workforce. The union members hold regular monthly meetings and collaborate with the management department to plan and conduct group activities, enhancing team cohesion and morale.

The Vietnam operational sites have also established a union, with representatives appointed from each unit, and then internal elections for the president and committee members. In 2022, the union covered all employees in the region, accounting for 100% of the total workforce. The labor union holds meetings from time to time according to the needs of the activities. Union members represent the employees to hold meetings and communicate all welfare information, so as to provide a channel of communication and coordination between labor and employer, and to prevent conflicts and strikes between the labor side and the employer side.

The Company implements the resolutions of labor-management meetings and employee welfare committees at the Taiwan operational sites, as well as the decisions of unions in China and Vietnam operational sites, to ensure that the rights of all employees across all locations are protected. All company-held activities are voluntarily participated in by all employees. For example, employee trips, year-end parties, and health promotion activities. Employees can voice their opinions through labor-management meetings or the Employee Welfare Committee or union representatives, and there were no violations of freedom of association and collective bargaining in 2022.

The channels for filing complaints at the Company's operating locations are listed below:

1. Employees can provide feedback through labor-management meetings, employee welfare committees, union representatives, suggestion boxes, complaint hotlines, and email.

2. If human rights complaints are received, the Human Resources Arbitration Committee may convene a meeting to record the details of the incident. The committee consists of managers at the department level, with the President serving as the chairperson. The committee votes to determine whether punishment is necessary.

### ● Harmonious Labor Relations

The Company's various operational sites respect employee complaint channels. Over the years, the Company's labor-management relationship has remained harmonious, and communication has been extremely smooth. As a result, up to this point, there have been no instances affecting the rights of personnel due to operational changes.

The Taiwan operational sites have established open communication channels, emphasizing two-way communication. Apart from planning necessary communication systems in accordance with regulations, various auxiliary communication platforms have been set up, including: face-to-face communication, bulletin boards, quarterly labor-management meetings, morning meetings, department meetings, and more. Through employee feedback channels, the Company can fully understand employee needs, provide clear guidance and assistance in work, and ensure the effectiveness of communication through relevant legal regulations. Additionally, FBT actively promotes gender equality in the workplace, introducing various policies and measures to prevent and address sexual harassment, promoting a gender-equal working environment. In the event that employment is terminated due to labor relations reasons in the future, after approval by the competent authority, those who have served for over three months but less than one year will receive a notice period of ten days; those who have served for over one year but less than three years will receive a notice period of twenty days; those who have served for over three years will receive a notice period of thirty days. For those whose contracts are terminated without notice, wages for the notice period will be provided.

A stylized illustration depicting social welfare and care. In the upper left, a woman in a blue shirt and pink skirt holds a jar with a heart on it, while a man in a grey shirt and dark pants holds a large coin with a dollar sign. In the center, two large brown hands hold a large red heart. In the lower right, a person in a wheelchair is being assisted by another person. The background features clouds, birds, and a green landscape.

## Performance

### Highlights

Since 2013, the Taiwan operational sites have been engaged in roadside tree adoption and greening activities around the factory area for **10** years.

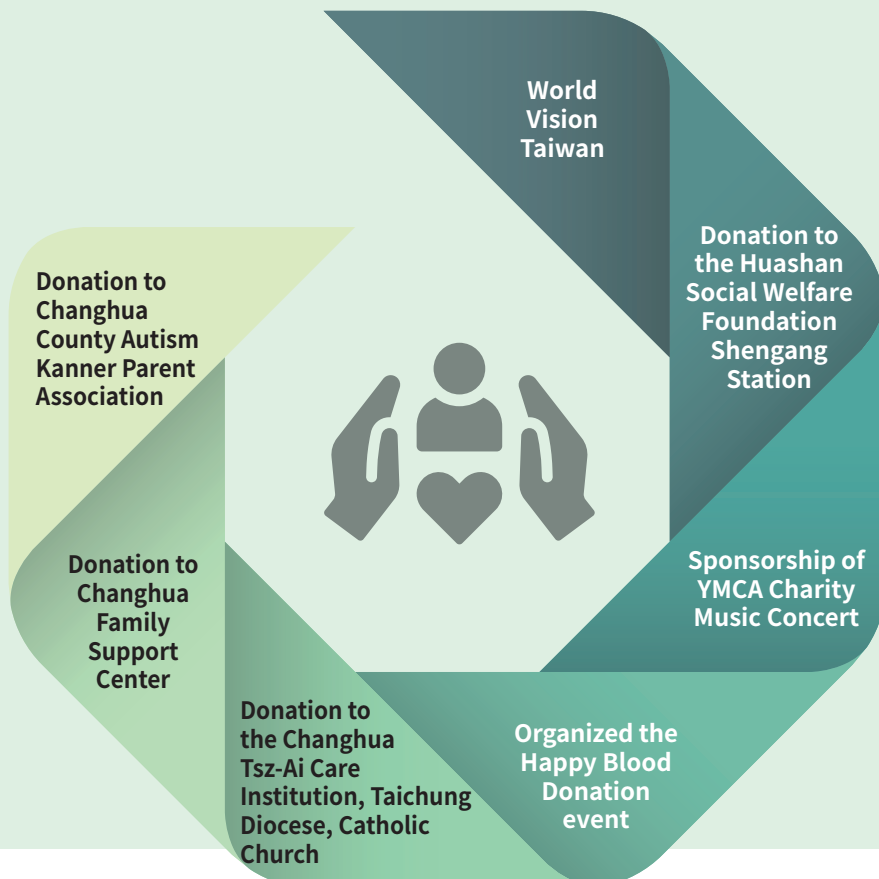

In 2022, the Company participated in **16** public welfare or donation activities.

In 2022, the Company organized the “FBT Occupational Safety Family Happy Blood Donation” event, resulting in a total of **72** blood bags of 250CC each.

Participation in rural remote health promotion public welfare programs, achieving a Social Return on Investment (SROI) of **4.112**.

## 6.1 Social Welfare Donations

In 2022, the Company actively engaged in community care activities, including donations to organizations such as the Huashan Social Welfare Foundation, Changhua Family Support Foundation, Changhua Tsz-Ai Care Institution, Changhua Family Support Center, World Vision Taiwan, Huashan Social Welfare Foundation Shengang Station, YMCA Charity Concert, and National Kaohsiung Normal University research projects. The Company also regularly participated in regional defense organization activities, including scenario simulations and live drills, as well as regular meetings of the Central Taiwan Joint Defense Organization for Toxic Chemical Substances. In the future, the Company will continue to participate in public welfare activities and contribute to society based on the principle of giving back.

## 6.2

# Social Impact

In 2022, to give back to society, the Company participated in rural remote health promotion public welfare programs. Collaborating with the Digital Humanitarian Association, the Company worked with the Xidi Community Development Association in Shengang Township, Changhua County, and the Fangyuan Church in Changhua to introduce digital applications that enable the elderly to actively age and maintain proper health in a familiar environment. Through remote teaching and health consultations, the program provide the elderly with a wide range of health promotion activities and senior health information, enhancing their self-awareness and knowledge of health and reducing acute event occurrence rates among seniors. The Social Return on Investment (SROI) was 4.112 (SROI value = impact/investment, NT\$616,738/NT\$150,000, based on the Digital Humanitarian Association's 2022 closing report). The program's effectiveness was excellent, and it will continue to be promoted in 2023.

(SROI Definition: SROI is a measurement and evaluation of the tangible and intangible impacts and changes generated by companies and organizations in social, environmental, and economic dimensions. These impacts are assigned monetary values and presented as a return on investment, illustrating the causal relationship between inputs and outcomes.)

In 2022, the Company collaborated with the County Department of Labor Affairs, Public Health Bureau, Chuansing Industrial Park Service Center, and industry associations to organize the "FBT Occupational Safety Family Happy Blood Donation" event. The event saw a total of 48 blood donors, with 72 blood bags (250CC each).

### ■ Tree Adoption Activity

Since 2013, the Company has been cooperating with the Chuansing Industrial Park to promote greening beautification efforts. We have participated in the beautification and management of public green spaces within the industrial park and adopted the maintenance responsibilities. We adopted the trees along the boundaries of three factory areas. The adoption maintenance work includes seasonal care, fertilization, pest control, and tree trimming.

#### ■ Maintenance and Management Tasks - Roadside Trees

Note 1:7th Corporate Governance Review/Review Year In 2020, there were a total of 905 listed and 712 OTC companies, 8th Corporate Governance Review/Review Year: In 2021, there were a total of 913 listed and 726 OTC companies, 9th Corporate Governance Review/Review Year: In 2022, there were a total of 928 listed and 734 OTC companies. The Company's assessment results from the 1st to the 9th reviews are listed among the top 6% to 20% of companies.

Note 2:2020: One applicant returned to work in 2022. Three people who returned to work were those who applied in 2019.  
2021: Three applied, one returned to work, and the other two will not be reinstated until 2022.  
2022: One applied, 4 reinstatements: 1 in 2022, 2 in 2021, 1 in 2020.

Note 3:The greenhouse gas emissions were categorized into six major sources in 2018. The revision is based on the year 2021, and the categories are as follows:  
Category 1 (burning of natural gas), Category 2 (purchased electricity), Category 3 (transportation of steel coils), Category 4 (use of upstream steel coils, electricity, natural gas, gasoline, diesel), Category 5 and Category 6 (not audited in 2022).

Note 4:Direct energy use includes natural gas, diesel, and gasoline, while indirect energy use refers to electricity.

Note 5:Resource recycling includes types such as [waste iron scraps, waste copper wires, waste knives, molds, waste paper, waste aluminum and iron cans, waste plastics, waste PET bottles].

Note 6:The arrow direction indicates that the indicator data is in the positive range

Independent Third-Party Verification Opinion  
Statement

## INDEPENDENT ASSURANCE OPINION STATEMENT

## Fine Blanking &amp; Tool Co., Ltd. 2022 ESG Report

The British Standards Institution is independent to Fine Blanking & Tool Co., Ltd. (hereafter referred to as FBT in this statement) and has no financial interest in the operation of FBT other than for the assessment and verification of the sustainability statements contained in this report.

This independent assurance opinion statement has been prepared for the stakeholders of FBT only for the purposes of assuring its statements relating to its sustainability report, more particularly described in the Scope below. It was not prepared for any other purpose. The British Standards Institution will not, in providing this independent assurance opinion statement, accept or assume responsibility (legal or otherwise) or accept liability for or in connection with any other purpose for which it may be used, or to any person by whom the independent assurance opinion statement may be read.

This independent assurance opinion statement is prepared on the basis of review by the British Standards Institution of information presented to it by FBT. The review does not extend beyond such information and is solely based on it. In performing such review, the British Standards Institution has assumed that all such information is complete and accurate.

Any queries that may arise by virtue of this independent assurance opinion statement or matters relating to it should be addressed to FBT only.

## Scope

The scope of engagement agreed upon with FBT includes the followings:

1. The assurance scope is consistent with the description of Fine Blanking & Tool Co., Ltd. 2022 ESG Report.
2. The evaluation of the nature and extent of the FBT's adherence to AA1000 AccountAbility Principles (2018) and assessment of sustainability disclosure to be in conformance with the applicable SASB industry standard(s) in this report as conducted in accordance with type 1 of AA1000AS v3 sustainability assurance engagement and therefore, the information/data disclosed in the report is not verified through the verification process.
3. The assessment of disclosure to be in conformance with the applicable SASB industry standard(s) in this report as conducted in accordance with type 1 of AA1000AS v3 sustainability assurance engagement.

This statement was prepared in English and translated into Chinese for reference only.

## Opinion Statement

We conclude that the Fine Blanking & Tool Co., Ltd. 2022 ESG Report. provides a fair view of the FBT sustainability programmes and performances during 2022. The sustainability report subject to assurance is free from material misstatement based upon testing within the limitations of the scope of the assurance, the information and data provided by the FBT and the sample taken. We believe that the performance information of Environment, Social and Governance (ESG) are fairly represented. The sustainability performance information disclosed in the report demonstrate FBT's efforts recognized by its stakeholders.

Our work was carried out by a team of sustainability report assurers in accordance with the AA1000AS v3. We planned and performed this part of our work to obtain the necessary information and explanations we considered to provide sufficient evidence that FBT's description of their approach to AA1000AS v3 and their self-declaration in accordance with GRI Standards were fairly stated.

## Methodology

Our work was designed to gather evidence on which to base our conclusion. We undertook the following activities:

- a review of issues raised by external parties that could be relevant to FBT's policies to provide a check on the appropriateness of statements made in the report.
- discussion with managers on approach to stakeholder engagement. However, we had no direct contact with external stakeholders.
- 11 interviews with staffs involved in sustainability management, report preparation and provision of report information were carried out.
- review of key organizational developments.
- review of the findings of internal audits.
- review of supporting evidence for claims made in the reports.
- an assessment of the organization's reporting and management processes concerning this reporting against the principles of Inclusivity, Materiality, Responsiveness and Impact as described in the AA1000AP (2018).
- an assessment of the organization's use of metrics or targets of SASB Standard(s) to assess and manage topic-related risks and opportunities.

## Conclusions

A detailed review against the Inclusivity, Materiality, Responsiveness and Impact of AA1000AP (2018), GRI Standards and SASB Standard(s) is set out below:

### Inclusivity

This report has reflected a fact that FBT has continually sought the engagement of its stakeholders and established material sustainability topics, as the participation of stakeholders has been conducted in developing and achieving an accountable and strategic response to sustainability. There are fair reporting and disclosures for the information of Environment, Social and Governance (ESG) in this report, so that appropriate planning and target-setting can be supported. In our professional opinion the report covers the FBT's inclusivity issues.

### Materiality

FBT publishes material topics that will substantively influence and impact the assessments, decisions, actions and performance of FBT and its stakeholders. The sustainability information disclosed enables its stakeholders to make informed judgements about the FBT's management and performance. In our professional opinion the report covers the FBT's material issues.

### Responsiveness

FBT has implemented the practice to respond to the expectations and perceptions of its stakeholders. An Ethical Policy for FBT is developed and continually provides the opportunity to further enhance FBT's responsiveness to stakeholder concerns. Topics that stakeholder concern about have been responded timely. In our professional opinion the report covers the FBT's responsiveness issues.

### Impact

FBT has identified and fairly represented impacts that were measured and disclosed in probably balanced and effective way. FBT has established processes to monitor, measure, evaluate and manage impacts that lead to more effective decision-making and results-based management within the organization. In our professional opinion the report covers the FBT's impact issues.

### GRI Sustainability Reporting Standards (GRI Standards)

FBT provided us with their self-declaration of in accordance with GRI Standards 2021 (For each material topic covered in the applicable GRI Sector Standard and relevant GRI Topic Standard, comply with all reporting requirements for disclosures). Based on our review, we confirm that sustainable development disclosures with reference to GRI Standards' disclosures are reported, partially reported or omitted. In our professional opinion the self-declaration covers the FBT's sustainability topics.

### SASB Standards

FBT provided us with their self-declaration of in accordance with SASB Standard(s) (AUTO PARTS Sustainability Accounting Standard). Based on our review, we confirm that the sustainability disclosure topics & accounting metrics of SASB Standard(s) (AUTO PARTS Sustainability Accounting Standard) are reported, partially reported or omitted. In our professional opinion the self-declaration covers disclosure topics, associated accounting metrics and activity metrics for applicable SASB industry standard(s).

### Assurance level

The moderate level assurance provided is in accordance with AA1000AS v3 in our review, as defined by the scope and methodology described in this statement.

The moderate level assurance provided is in accordance with AA1000AS v3 in our review of SASB Standard(s).

### Responsibility

The sustainability report is the responsibility of the FBT's chairman as declared in his responsibility letter. Our responsibility is to provide an independent assurance opinion statement to stakeholders giving our professional opinion based on the scope and methodology described.

### Competency and Independence

The assurance team was composed of Lead auditors experienced in relevant sectors, and trained in a range of sustainability, environmental and social standards including AA1000AS, ISO 14001, ISO 45001, ISO 14064 and ISO 9001. BSI is a leading global standards and assessment body founded in 1901. The assurance is carried out in line with the BSI Fair Trading Code of Practice.

...making excellence a habit.™
